

Water use in Canada, by sector, 2005 (revised), 2007 (revised) and 2009

Released at 8:30 a.m. Eastern time in The Daily, Tuesday, October 9, 2012

Revised data for 2005 and 2007, as well as data for 2009 from the Material and Energy Flow Accounts on water use by industries, governments and households are now available. The revisions are due to revisions in the underlying data and methods used to compile the accounts and to the correction to the Industrial Water Survey data released on September 7, 2012.

The Material and Energy Flow Accounts describe the annual flows of materials and energy between the Canadian environment and economy.

These data are available at the national level only.

Available without charge in CANSIM: table 153-0101.

Definitions, data sources and methods: survey number 5115.
