

Life tables, Canada, provinces and territories, 2005 to 2007, 2006 to 2008 and 2007 to 2009

Released at 8:30 a.m. Eastern time in *The Daily*, Tuesday, March 12, 2013

The publication *Life Tables for Canada, Provinces and Territories* is now available for the periods 2005 to 2007, 2006 to 2008 and 2007 to 2009.

Complete life tables are available for Canada and nine provinces: Newfoundland and Labrador, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

Abridged life tables are available for Prince Edward Island, Yukon, the Northwest Territories and Nunavut.

The life tables are computed using death counts from the Vital Statistics and Population Estimates programs of Statistics Canada.

The methods used to construct complete and abridged life tables are available in a separate document, *Methods for Constructing Life Tables for Canada, Provinces and Territories*. The methods were revised compared with those used for the preceding life tables of Statistics Canada.

Life tables for Canada, provinces and territories will now be produced on an annual basis, once new death counts are available from the Vital Statistics Program.

Definitions, data sources and methods: survey numbers 3233 and 3604.

The publication *Life Tables, Canada, Provinces and Territories, 2005 to 2007, 2006 to 2008 and 2007 to 2009* (84-537-X), is now available from the *Browse by key resource module* of our website under *Publications*.

The publication *Methods for Constructing Life Tables for Canada, Provinces and Territories* (84-538-X) is also now available from the *Browse by key resource module* of our website under *Publications*.
