Note to readers

Every five years, following the Census of Agriculture, the methods and concepts used to estimate the balance sheet series are reviewed. Estimates for the balance sheet integrate a variety of administrative and survey data sources. Consequently, this review is used as an opportunity to improve data sources, coverage and estimation methods. As a result of this review, revisions back to 2005 are now available and are reflected in the data in CANSIM.

Available in CANSIM: table 002-0020.

Definitions, data sources and methods: survey number 5029.
