

Survey of Household Spending: Population rebasing, 2010 to 2012

Released at 8:30 a.m. Eastern time in *The Daily*, Wednesday, April 6, 2016

The revised Survey of Household Spending (SHS) estimates from 2010 to 2012 are now available in CANSIM.

Statistics Canada has an established practice of applying a standard revision to SHS estimates following the release of final population estimates from each census. The SHS estimates from 2010 to 2012 were reweighted based on population projections from the 2011 Census, ensuring comparability with estimates from 2013 and 2014, which are based on the same census.

For more information on estimation methods used for the SHS and on historical revisions of SHS estimates, refer to the "[User Guide for the Survey of Household Spending, 2014](#)."

Available in CANSIM: tables [203-0021](#) to [203-0028](#).

Definitions, data sources and methods: survey number [3508](#).
