

Computer and peripherals price indexes, January 2017

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, February 24, 2017

The price of desktop and similar computers, laptop and tablet computers, and servers decreased 0.3% in January.

The decline was attributable to lower prices for laptop computers (-0.8%) and desktop and similar computers (-0.4%). Higher prices for tablet computers (+0.8%) moderated the decline in the index, while prices for servers were unchanged.

Prices for smartphones fell 0.3% in January.

The price for computer monitors and computer printers increased 0.1%, as a result of higher prices for computer printers (+0.2%), more specifically inkjet printers (+1.8%).

Year over year, prices for desktop and similar computers, laptop and tablet computers, and servers declined 2.3%. Prices for computer monitors and computer printers advanced 0.3%.

Note to readers

The computer and peripherals price indexes are monthly series that measure the changes over time in the price of computers, computer peripherals and smartphones sold to governments, businesses and households. With each release, data for the previous six months may have been revised. The indexes are not seasonally adjusted.

These indexes are available at the Canada level only.
