

Canadian Health Measures Survey: Medication data, 2014 and 2015

Released at 8:30 a.m. Eastern time in *The Daily*, Thursday, July 6, 2017

The Canadian Health Measures Survey Cycle 4 (2014 and 2015) Medication data file is now available.

The file includes collected information from the household and clinic questionnaires on self-reported medication use. It also includes collected and derived information for a subset of prescription or over-the-counter medication or other health products containing one of the following ingredients: calcium, folic acid, iodine, iron, magnesium, omega-3, omega-6, vitamin B12, vitamin C, vitamin D, or zinc.

Note to readers

The Canadian Health Measures Survey Cycle 4 was conducted from January 2014 to December 2015.

Weight files and instructions are available for combining cycle 4 Canadian Health Measures Survey data (where possible) with equivalent data from cycles 1 to 3.

Definitions, data sources and methods: survey number [5071](#).
