Monthly Survey of Smelters and Metal Refineries, March 2018

Released at 8:30 a.m. Eastern time in The Daily, Tuesday, May 22, 2018

Data for March from the Monthly Survey of Smelters and Metal Refineries are now available on the *Monthly Statistics of Mineral Production* page of the Natural Resources Canada website.

These data are published as part of the Production of Canada's Leading Minerals.

Note to readers

This release presents estimates that are not seasonally adjusted. These data are subject to revision. Data for the previous two months have been revised.

The Monthly Survey of Smelters and Metal Refineries measures the quantities of outputs produced in Canada, including Canadian production originating from external sources.

The survey covers Smelters and Metal Refineries for a variety of commodities, including copper, lead, nickel and zinc. For the complete list of commodities, visit Natural Resources Canada's Monthly Statistics of Mineral Production page.

Definitions, data sources and methods: survey number 5238.
