

# Crop Condition Assessment Program, July 9 to October 14, 2018

Released at 8:30 a.m. Eastern time in *The Daily*, Wednesday, October 24, 2018

---

The Normalized Difference Vegetation Index (NDVI) database from July 9 to October 14, 2018, is now available.

The database holds the mean value of the one-kilometre resolution satellite picture elements within each of the census agriculture regions, census divisions, and census consolidated subdivisions of Canada with pasture and/or cropping activity. The Crop Condition Assessment Program (CCAP) database is updated weekly from mid-April to mid-October. Since 2000, NDVI data have been disseminated through the CCAP application, which is available on Statistics Canada's website.

## Note to readers

*Agriculture and Agri-Food Canada has partnered with Statistics Canada to provide the Crop Condition Assessment Program (CCAP). The Canada Centre for Mapping and Earth Observation, part of Natural Resources Canada, has also contributed by providing software for processing the input satellite data.*

**Available tables:** table [32-10-0453-01](#).

**Definitions, data sources and methods:** survey number [5177](#).

The publication *Crop Condition Assessment Program, 2018* ([22-205-X](#)) is available online.

Weekly satellite images from the start of the 2018 growing season have been processed and are now available on the [Crop Condition Assessment Program](#) website.
