

Agriculture and Agri-Food Economic Account, 2016

Released at 8:30 a.m. Eastern time in *The Daily*, Tuesday, June 30, 2020

The Agriculture and Agri-food Economic Account for 2016 is now available. The data for 2015 have been revised.

Note to readers

The Agriculture and Agri-food Economic Account greatly enhances the industrial detail available for the agricultural and agri-food manufacturing sector within the national accounting framework.

Within the Supply and Use Tables, which comprise the core of production and gross domestic product measures, the 3 agriculture industries have been expanded into 14 industries and the 9 agri-food manufacturing industries have been expanded into 16 industries.

This enhanced detail provides a better perspective of the farming and agricultural processing industries. It also allows users to analyze the supply and use of products across a broader range of activities, and facilitates the comparison of economic relationships and impacts across more industries than is possible in the core Supply and Use Tables.

Available tables: table [36-10-0623-01](#).

Definitions, data sources and methods: survey number [1401](#).

The product "[Agriculture and Agri-Food Economic Account](#)," which is released as part of the series *Statistics Canada — Data Visualization Products* ([71-607-X](#)), is now available.

To request the Agriculture and Agri-Foods Economic Account data tables, or to enquire about the concepts, methods or data quality of this release, contact Andreas Trau (343-551-0882; andreas.trau@canada.ca), Industry Accounts Division.
