

Canadian Tourism Activity Tracker, January 2020 to February 2021

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, May 14, 2021

The impacts from travel restrictions and province-wide lockdowns to combat the COVID-19 pandemic were felt immediately by the tourism sector. Statistics Canada has created a monthly experimental tourism tracker to estimate the effects of the pandemic on Canadian tourism by combining measures of travel with accommodation and hospitality services. Please use our "[Canadian Tourism Activity Tracker](#)" interactive tool to view and navigate the data.

Note to readers

These monthly estimates are drawn from numerous sources. Some of these Statistics Canada data are officially released after initial estimates are first combined into the experimental tourism tracker. As such, this monthly tracker should be viewed as preliminary estimates that are subject to revision as the published survey estimates become available.

Available tables: table [24-10-0049-01](#).

Definitions, data sources and methods: survey number [5232](#).

The product "[Canadian Tourism Activity Tracker](#)," part of the *Data Visualization Products* series ([71-607-X](#)), is now available.
