

Monthly Energy Transportation and Storage Survey, April 2021

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, June 18, 2021

Data for April on the transportation and storage of crude oil and other liquid petroleum products are now available.

Note to readers

Crude oil and equivalents data from the Crude oil and petroleum products movements table ([25100077](#)) have been revised from October 2020 to March 2021.

Hydrocarbon Gas Liquids and Refined Petroleum Products data from the Crude oil and petroleum products movements table ([25100077](#)) have been revised from April 2020 to March 2021.

Analysis of these data will be presented as part of the Daily article "Energy statistics," which will be available soon.

The Monthly Oil and Other Liquid Petroleum Products Pipeline Survey has been redesigned: the survey coverage has been expanded, new content has been added and a new questionnaire has been developed. The name of the survey is now the Monthly Energy Transportation and Storage Survey (METSS). The redesign took effect as of the January 2020 reference month.

The METSS content has been designed to reflect the evolving petroleum industry. In addition to pipeline companies, rail and marine transportation companies are now in the sample, as well as an expanded product list. These data will be available in the future. New variables have been added, while other variables have been discontinued. Because of the change in methodology, the current estimates may not be comparable with the estimates available in the tables published for the reference period prior to January 2020.

Available tables: [25-10-0075-01](#) and [25-10-0077-01](#).

Definitions, data sources and methods: survey number [5300](#).
