

Urban ecosystem accounts: Greenness, 2021

Released at 8:30 a.m. Eastern time in *The Daily*, Wednesday, December 1, 2021

Data for two urban greenness measures by population centre are now available for 2000 to 2021.

Note to readers

Measures of urban greenness provide information on the condition of urban ecosystems, as part of the [Canadian System of Environmental-Economic Accounting – Ecosystem Accounts](#). Both greenness measures were computed from the Normalized Difference Vegetation Index (NDVI), derived from satellite imagery from the moderate resolution imaging spectroradiometer (MODIS).

For more information on data sources and methods, please see "[Urban greenness, 2001, 2011 and 2019](#)."

Available tables: table [38-10-0149-01](#).

Definitions, data sources and methods: survey number [5331](#).
