

# Fertilizer Shipments Survey, second quarter 2021/2022

Released at 8:30 a.m. Eastern time in *The Daily*, Monday, February 21, 2022

Shipments of urea within Canada decreased by 247 000 tonnes to 1 533 000 tonnes in the second quarter of the 2021/2022 fertilizer year, down 13.9% from the same quarter a year earlier.

Over the same period, shipments of urea to the United States increased 45.8% to 245 000 tonnes.

These trends were consistent with shipments of several other fertilizer products, as strong demand continued south of the border.

## Note to readers

*Data on the shipments, production and market inventories of fertilizer in Canada are now available for the second quarter of the 2021/2022 fertilizer year.*

*Shipments and production data are cumulative, compiled on a fertilizer year basis starting July 1 and ending June 30 the following year.*

*Data on fertilizer statistics have been revised back to the first quarter of the 2020/2021 fertilizer year.*
