

# Question-level quality indicators for long-form content of the 2021 Census of Population

*Released at 8:30 a.m. Eastern time in The Daily, Wednesday, November 30, 2022*

---

Data quality indicators for some questions asked on the 2021 Census of Population long-form questionnaire are now available. These quality indicators include [non-response rates](#) and [imputation rates](#) for the questions on housing and Indigenous peoples. Indicators for other questions asked on the long-form questionnaire will become available in the coming months.

Data tables containing question-level quality indicators for the 2021 Census of Population are produced for many geographic levels. More information on quality indicators is available in the [2021 Census Data Quality Guidelines](#), as well as in the reference guides for each domain of interest, available on the page [Reference materials, 2021 Census](#).

**Available tables:** [98-10-0557-01](#) to [98-10-0560-01](#) .

**Definitions, data sources and methods:** survey number [3901](#).
