

Real-time local business conditions, January 23 to 29, 2023

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, February 3, 2023

Weekly data on real-time local business conditions are now available for January 23 to 29.

Note to readers

The Real-time Local Business Conditions Index is released as an experimental statistic to measure business activity in real time during the COVID-19 pandemic and beyond. The index tracks business conditions in Abbotsford, Barrie, Calgary, Edmonton, Guelph, Halifax, Hamilton, Kanata, Kelowna, Kingston, Kitchener, London, Milton, Moncton, Montréal, Oshawa, Ottawa–Gatineau, Quebec, Regina, Saskatoon, Sherbrooke, St. Catharines–Niagara Falls, St. John's, Toronto, Trois-Rivières, Vancouver, Victoria, White Rock, Windsor, and Winnipeg.

A rising index reflects improving business conditions in an urban centre, while a declining index signals deteriorating business conditions.

The Index has three components that combine alternative data sources with Statistics Canada's data holdings: the first is a static component to measure the economic size of a business district at the local level; the second tracks operating conditions of the businesses in a given area; and the third measures the level of business activity in the area using road traffic data.

Next release

Data on real-time local business conditions for January 30 to February 5 will be released on February 10.

Available tables: table [33-10-0398-01](#).

Definitions, data sources and methods: survey number [1105](#).

The "[Real-time Local Business Conditions Index](#)" includes the latest data in easy-to-read tables and charts, as well as a detailed explanation of how the index was designed.
