Note to readers

Starting with October 2022, the "Aircraft Movement Statistics: Major airports" series has been replaced by "Aircraft Movement Statistics: Major and select small airports." This series collects data on itinerant and local aircraft movements from both major airports (those with towers and flight service stations operated by NAV CANADA) as well as a selection of airports previously available in the small airport data series. This enhancement will improve the overall coverage of aircraft movements in Canada.

Releases in The Daily are now accompanied by a new set of data tables (23-10-0296-01 to 23-10-0304-01), of which two, 23-10-0296-01 and 23-10-0302-01, contain historical data beginning with 2019. The remaining tables (23-10-0297-01 to 23-10-0301-01, 23-10-0303-01 and 23-10-0304-01) have data commencing with reference year 2022.

Data prior to 2022 for the major airports can be found in tables 23-10-0002-01 to 23-10-0015-01. Data prior to 2019 for the selected small airports can be found in tables 23-10-0016-01 and 23-10-0017-01.

An aircraft movement is defined as a take-off, landing or simulated approach by an aircraft, as defined by NAV CANADA.

Data for February 2022 may have been revised.

The data in this monthly release are not seasonally adjusted.
