

Consumer Price Index: New basket weights, 2023 update

Released at 8:30 a.m. Eastern time in The Daily, Tuesday, June 20, 2023

Updated basket weights for the goods and services in the Consumer Price Index (CPI), representing consumer spending patterns in 2022, are now available. The 2022 basket will combine expenditure data from the [Household Final Consumption Expenditures](#), the [Survey of Household Spending](#) and alternative data sources to account for shifts in spending.

The updated weights will be incorporated into the May 2023 CPI, which will be released on June 27, 2023. They will replace the previous weights, which were based on 2021 expenditure patterns.

The weight reference period for the new basket is 2022. The index base period for the all-items CPI remains 2002=100.

For more detailed information, consult the document entitled "[An Analysis of the 2023 Consumer Price Index Basket Update, Based on 2022 Expenditures](#)."

Available tables: [table 18-10-0007-01](#).

Definitions, data sources and methods: [survey number 2301](#).
