

Data on income of families and individuals: Subprovincial data from the T1 Family File, 2021

Released at 8:30 a.m. Eastern time in The Daily, Wednesday, July 12, 2023

Family and individual income data for 2021 are now available from the T1 Family File for Canada, the provinces, the territories and various subprovincial and subterritorial geographic areas. Income data from this release include amounts associated with government income support programs and benefits for COVID-19 issued in 2021.

Note to readers

Data for families in these products are based on the census family concept. A census family refers to a married or a common-law couple, with or without children at home, or a lone-parent family. Products also include data for persons not in a census family. Data are derived from personal income tax returns filed in spring 2022 and are not adjusted on the basis of Statistics Canada's population estimates.

Data based on specific government income support programs and benefits for COVID-19 can be found in tables 11-10-0100-01 and 11-10-0101-01. Data based on the after-tax census family low income measure methodology can be found in tables 11-10-0018-01 and 11-10-0020-01. Data in this release have been tabulated according to the 2021 Standard Geographical Classification used for the 2021 Census.
