

Mining industries: Annual principal statistics, 2019, 2020 and 2021

Released at 8:30 a.m. Eastern time in *The Daily*, Tuesday, August 1, 2023

Principal statistics from the Annual Mineral Production Survey are now available for the 2019, 2020 and 2021 reference years. The tables present employment and financial data for the mining industry using the North American Industry Classification System at the national, provincial and territorial levels.

Note to readers

Beginning with data collection for the 2019 reference year, the Annual Mineral Production Survey has been conducted as part of Statistics Canada's Integrated Business Statistics Program. This transition followed a full content review and redesign of the Minerals and Metals Production Statistics Program in the fall of 2018, in partnership with Natural Resources Canada.

Data for Quebec are collected by the Institut de la Statistique du Québec. Data on aggregates, clay and refractory mineral mining and quarrying (North American Industry Classification System Industry Group Code 2123) for Quebec for 2020 and 2021 are not available but will be released later.

Data from previous years can be found on the [Mineral production](#) page of the Natural Resources Canada website.

Available tables: [16-10-0031-01](#) and [16-10-0032-01](#).

Definitions, data sources and methods: survey number [5246](#).
