Released at 8:30 a.m. Eastern time in *The Daily*, Wednesday, November 8, 2023

The national, provincial and territorial supply and use tables are now available for 2020.

Supply and use tables present an integrated picture of the economy in terms of industries, products and final use categories. The tables illustrate the flows of goods and services from their origin (domestic production or imports) to their destination (inputs by industries to produce other products; capital investments by industries; changes in inventory; exports; or final use by households, governments and non-profit institutions).
