

Food services and drinking places, December 2023

Released at 8:30 a.m. Eastern time in *The Daily*, Monday, February 19, 2024

Food services and drinking places data for Canada and the provinces are now available for December 2023.

Looking for more insight?

In addition to the data table published on February 19, a [short article](#) is also available in *StatsCAN Plus*.

Further information is also available in the "Food Services and Drinking Places Sales" dashboard, where users can consult data on sales in food services and drinking places for Canada and by province and territory. This application allows users to compare provincial and territorial data through interactive maps and charts.

Our latest article in *StatsCAN Plus*: "[Canadians spend more money at food services places in November, less at drinking establishments.](#)"

Get timely access to data right at your fingertips by downloading the [StatsCAN app](#), available for free on the [App Store](#) and on [Google Play](#).

Note to readers

Unless otherwise noted, all data in this release are seasonally adjusted and expressed in current dollars. Seasonally adjusted data are data that have been modified to eliminate the effect of seasonal and calendar influences to allow for more meaningful comparisons of economic conditions from period to period. For more information on seasonal adjustment, see [Seasonally adjusted data – Frequently asked questions](#).

Trend-cycle data are included in selected charts to complement the seasonally adjusted series. These data represent a smoothed version of the seasonally adjusted time series and provide information on longer-term movements, including changes in direction underlying the series. For information on trend-cycle data, see the page [Trend-cycle estimates – Frequently asked questions](#).

Data for the current reference month are preliminary. Usually, unadjusted data are revised for the previous two months, and seasonally adjusted data are revised for the previous three months. Both seasonally adjusted data and trend-cycle estimates are subject to revision as additional observations become available. These revisions could be large and could even lead to a reversal of movement, especially for reference months near the end of the series or during periods of economic disruption.

Find these data and more statistics on the [Business and consumer services and culture statistics portal](#).

Available tables: table [21-10-0019-01](#).

Definitions, data sources and methods: survey number [2419](#).
