

# Census of Environment: data portal

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, March 22, 2024

---

The new [Census of Environment](#) portal is now available and provides one central and easy-to-access location for all of our data.

The Census of Environment (CoE) tracks the area of ecosystems across Canada, reports on their condition and highlights the services they provide to society, including benefits to human well-being. The portal includes:

- a page about the CoE, including information on the types of ecosystems that will be covered and the scope of ecosystem accounting efforts in Canada
- access to all CoE tables, articles, publications and geospatial files
- a mapping tool that displays data from the CoE
- information about our partners, engagement, related frameworks and reference materials

The latest data and tools from the CoE will be made available on this portal.

## Did you know we have a mobile app?

Get timely access to data right at your fingertips by downloading the [StatsCAN app](#), available for free on the [App Store](#) and on [Google Play](#).

## Definitions, data sources and methods: survey number [5331](#).

The product "[Census of Environment Geospatial Explorer](#)," part of *Statistics Canada - Data Visualization Products (71-607-X)*, is now available.
