

Census of Environment: Iceberg fact sheet

Released at 8:30 a.m. Eastern time in *The Daily*, Thursday, June 6, 2024

Icebergs interact with ocean ecosystems and provide economic and cultural benefits, particularly in Newfoundland and Labrador.

Discover more about icebergs in our latest environment fact sheet.

Note to readers

Statistics Canada's *Census of Environment* program reports on ecosystems in Canada, providing information to help Canadians make evidence-based decisions to protect, rehabilitate, enhance and sustain our environment. It follows the internationally accepted environmental-economic standard for producing information on ecosystems' extent, their condition and the services they provide.

This fact sheet presents data collected by the International Ice Patrol and the Canadian Ice Service on icebergs reported off the coast of Newfoundland and Labrador.

For more information, see [Canadian System of Environmental-Economic Accounts – Ecosystem Accounts \(5331\)](#).

Definitions, data sources and methods: survey number [5331](#).

The fact sheet "[Just the tip of the iceberg](#)" is now available in the series *Environment Fact Sheets (16-508-X)*.
