

Wholesale trade: Early indicator, June 2024

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, July 26, 2024

Statistics Canada is providing an advance estimate of sales in the wholesale trade sector for June. The advance results for June indicate that wholesale sales (excluding petroleum, petroleum products, and other hydrocarbons and excluding oilseed and grain) fell 0.6%. The decline reflects lower sales in the motor vehicle and motor vehicle parts and accessories subsector and in the food, beverage and tobacco subsector.

This estimate was calculated based on a weighted response rate of 66.1%. The average final response rate to the survey over the 12 preceding months was 80.7%. As Statistics Canada continues to collect data for the June reference month, this early indicator is subject to a higher revision rate than the regular monthly release.

Download our mobile app and get timely access to data at your fingertips! The [StatsCAN](#) app is available for free on the [App Store](#) and on [Google Play](#).

Note to readers

Petroleum, petroleum products, and other hydrocarbons and oilseed and grain data continue to be available in data tables but will be excluded from monthly analysis until historical data are available for proper monthly and annual analysis.

The percentage change is calculated using seasonally adjusted data in current dollars.

This early indicator is a special product published to provide Canadians with timely information on the wholesale sector. In an effort to increase efficiency, at the next release of the wholesale early indicator, Statistics Canada will only be providing an estimate for total wholesale sales (excluding petroleum, petroleum products, and other hydrocarbons and oilseed and grain).

The official estimate of wholesale sales for the month of June, which will be based on a more complete set of survey and administrative data, is scheduled for release on August 15.
