## Note to readers

*The demographic estimates for the second quarter of 2024 released today are considered preliminary and will be updated following the standard procedure followed by Statistics Canada for decades. They are based on 2021 Census counts, adjusted for census net undercoverage and incompletely enumerated reserves and settlements. To these counts, the population growth estimates for the period from May 11, 2021, to the date of the estimate are added.*

### Canada's population clock (real-time model)

*Canada's population clock (real-time model) was updated today with the most recent data from quarterly population estimates released by Statistics Canada.*

*Canada's population clock is an interactive learning tool aiming to give Canadians a sense of the pace of the country's population renewal. The [population estimates](#) and [census counts](#) remain the measures used by various government programs.*

### Acknowledgements

*The Demographic Estimates Program of Statistics Canada is grateful for the ongoing partnership with Immigration, Refugees and Citizenship Canada (IRCC), which greatly contributes to the accuracy of the estimation of permanent and temporary immigrants, as well as for the permanent support from IRCC.*
