

Canadian domestic export concentration, 2017

Released at 8:30 a.m. Eastern time in *The Daily*, Friday, October 5, 2018

Concentration ratios and indexes (2012=100) for Canadian domestic exports are now available for reference year 2017, with revisions applied to reference years 2015 and 2016.

These indicators represent the degree to which Canadian exports are distributed evenly across products, destination markets, and provinces of production, as well as how this distribution has changed over time.

The new table 12-10-0129-01 includes additional breakdowns for concentration by destination market, with new categories for partner countries and provinces. This table replaces archived table 12-10-0102-01.

Available tables: table [12-10-0129-01](#).

Definitions, data sources and methods: survey number [2201](#).
