1. Pregnancies equal the sum of live births, fetal loss and induced abortions.
2. Live birth counts are based on registrations in the Birth Database.
3. Induced abortion counts are taken from the Therapeutic Abortion Survey that collects information on abortions performed in hospitals and clinics in Canada, as well as on abortions performed on Canadian residents in selected American states, for data years prior to 2004.
4. Fetal loss is the sum of stillbirth registrations in the Stillbirth Database and cases of miscarriages, illegal abortions and unspecified abortions reported in the Hospital Morbidity Database.
