

Causes of death

Chapter XII

2003

Chapter XII: Diseases of the skin and subcutaneous tissue (L00 to L99), by age group and sex, Canada

- 1 Data source: Statistics Canada, Canadian Vital Statistics, Death Database
- 2 World Health Organization (WHO), International Statistical Classification of Diseases and Related Health Problems, Tenth Revision (ICD-10)
- 3 The cause of death tabulated is the underlying cause of death. This is defined as (a) the disease or injury which initiated the train of events leading directly to death, or (b) the circumstances of the accident or violence which produced the fatal injury. This underlying cause is selected from a number of conditions listed on the death registration form.
- 4 Counts in this table exclude deaths of non-residents of Canada.
- 5 To reduce the size of the table, only causes of death with a frequency of one or more in Canada are reported. Over the years, more causes of death will be added as needed.
- 6 Missing data on sex of the deceased were imputed based on death registration number.
- 7 The following standard symbols are used in this Statistics Canada table: (..) for figures not available for a specific reference period and (...) for figures not applicable.

Chapter XII: Diseases of the skin and subcutaneous tissue (L00 to L99), causes of death, by age group and sex, Canada, 2003

	Total, all ages	Under 1 year	1 to 4 years	5 to 9 years	10 to 14 years	15 to 19 years	20 to 24 years	25 to 29 years	30 to 34 years	35 to 39 years	40 to 44 years
