

Student worksheet 5: Immigrant population by period of immigration and by province, 1961 Census

Table 2 on page 218 of the *Canada Year Book 1967* describes all the immigrants living in Canada on June 1, 1961, with respect to when they arrived in Canada. Choose a province or territory, perhaps your own, and record its immigrant arrivals for the given time periods.

Province or territory: _____

Period	Number of immigrant arrivals
1941 to 1945	
1946 to 1950	
1951 to 1955	
1956 to 1961	

1. Create a line graph showing the immigrant arrivals from 1941 to 1961 for the province or territory you have chosen.

2. Can you suggest one or two reasons to account for the pattern in the graph?
3. Why do you think we chose the time periods 1941 to 1945, 1946 to 1950, 1951 to 1955 and 1956 to 1961 to compare, but not 1931 to 1940 and before 1930?
