

## Student worksheet 2: Men and women living in Canada

**Task:** Using the *Canada Year Book 1947*, Table 9 on page 113 (years 1871 and 1941), and the *Canada Year Book 1967*, Table 10 on page 194 (years 1951 and 1961), choose four additional years to consider and record the number of males and females living in Canada for each year. Make sure the years you select have data in your year books. Have each group member chose a different province or territory and record that data as well.

	Canada		Selected province or territory:	
	Males	Females	Males	Females
1871				
1941				
1951				
1961				

What generalizations can you make about the ratio of males to females in Canada and in specific provinces during the specified time periods?
