

Zero-emission vehicles in British Columbia, 2020

Battery electric vehicles (BEVs) account for the largest share of new zero-emission vehicle (ZEV) registrations in British Columbia.

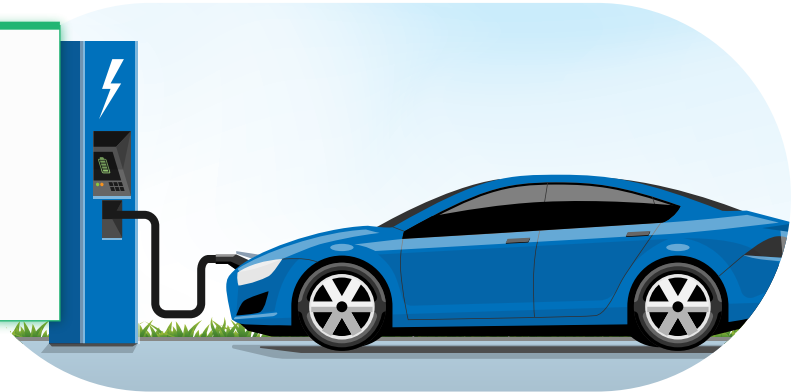

New ZEV registrations represented **8.4%** (15,211) of total new vehicle registrations in British Columbia in 2020, up from **7.8%** a year earlier.

Nevertheless, new ZEV registrations edged down (-1,769) year over year.

Almost four-fifths of the new ZEVs registered in British Columbia in 2020 were BEVs (**79.5%**).

Victoria had the highest proportion of new ZEVs (**12.9%** or 1,222 vehicles), followed by Vancouver (**10.9%** or 10,594 vehicles).
