Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1-800-263-1136. The service standards are also published on www.statcan.ca under About us > Providing services to Canadians.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- E use with caution
- F too unreliable to be published

National balance sheet accounts - highlights

Second quarter 2008

National net worth rose 2.0% in the second quarter of 2008, as an increase in the value of non-financial assets was moderated by the rise in net foreign indebtedness. National net worth, total assets less financial liabilities, increased \$111 billion in the second quarter of 2008, resulting in a per capita national net worth of \$174,300, up from \$171,500 in the previous quarter.

Chart H.1

National net worth continues to advance

% change, not seasonally adjusted

National wealth, defined as the sum of economy-wide non-financial assets, amounted to \$5.9 trillion, up 2.7% from the previous quarter. This was an increase from the 2.4% growth posted for the same quarter last year. Residential real estate accounted for about half of the gain in national wealth.

The second quarter of 2008 showed a substantial improvement in saving for the corporate sector. The expansion in corporate saving resulted from significant price driven growth in profits, particularly for energy products. Saving in the corporate sector remains a driving force behind the gains in national net worth.

Note to readers

The national balance sheet accounts are statements of the balance sheets of all of the various sectors of the economy. They consist of the non-financial assets owned in the various sectors of the economy and of financial claims outstanding.

National wealth is the sum of non-financial assets (produced assets, land surrounding structures and agricultural land) in all sectors of the economy.

National net worth is national wealth less net foreign liabilities (i.e., what is owed to non-residents less what non-residents owe to Canadians). Alternatively, it is the sum of the net worth of the persons and unincorporated business, corporate and government sectors.

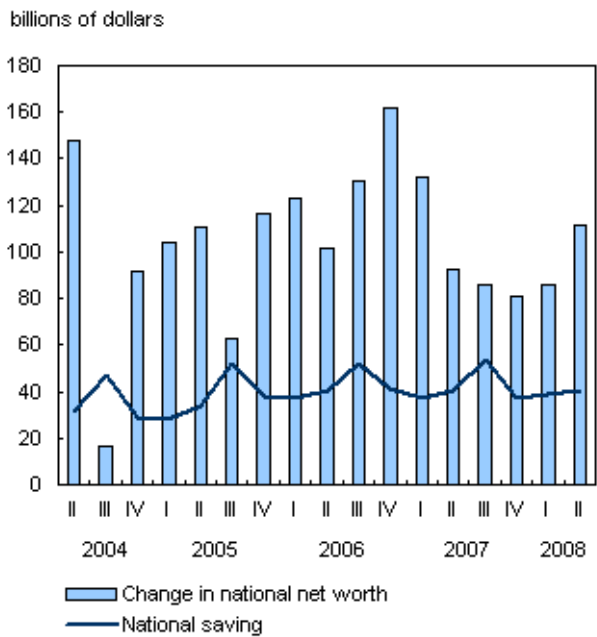

National saving is the sum of saving of the persons and unincorporated business, corporate and government sectors. National saving and investment contribute to change in national net worth.

The revaluation of assets and liabilities also contributes to changes in national net worth. The causes of revaluation include changes in non-financial asset prices, equity prices, interest rates, exchange rates and loan allowances.

Quarterly series, both book and market value, are available from the first quarter of 1990. Marketable securities are at market value, unless otherwise stated. For more information on the market value estimates, consult the *Balance sheet estimates at market value* page of our website.

Canada's net foreign indebtedness (with tradable securities on a market value basis) increased during the second quarter following a decrease in the first quarter of 2008. Growth in Canadian liabilities to non-residents, particularly net new Canadian bond issues, exceeded growth in Canadian assets abroad. The value of foreign assets held by Canadians decreased during the quarter, as asset growth was constrained by the appreciating Canadian dollar. However, non-resident holdings of Canadian equities were up strongly during the quarter, reflecting the gains in Canadian stock markets.

Chart H.2
Revaluations of assets drive continued increase in national net worth

Growth in household net worth advances

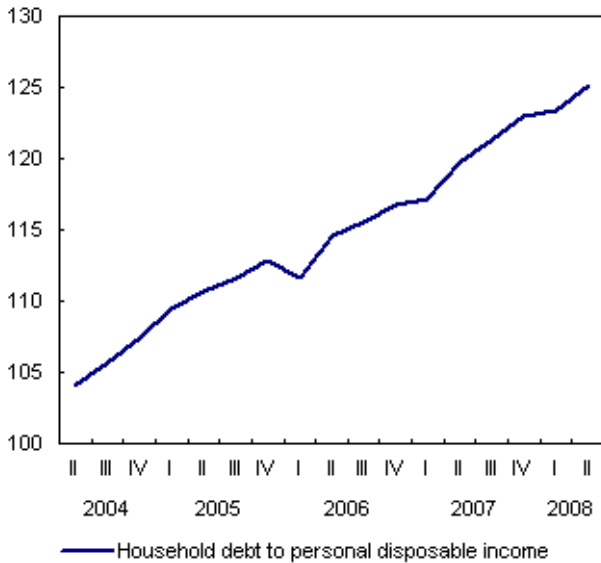

In the second quarter of 2008, household net worth expanded by 2.8%, following a 0.5% increase in the first quarter. Gains in the market value of equities were the largest contributor to the advance in household net worth, followed by residential real estate.

Household debt (consumer credit and mortgage liabilities), as a percentage of net worth, held steady during the quarter, with increases in debt offset by gains in financial assets. Households had 19.6 cents of debt for every dollar of net worth and \$1.25 of debt for every dollar of personal disposable income.

Chart H.3

Household debt to income creeps up

as a % of personal disposable income, seasonally adjusted data

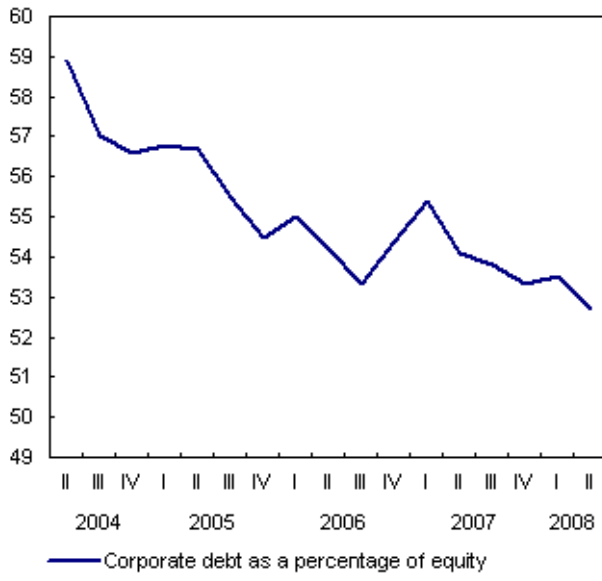

Corporate debt-to-equity continues to trend down

Increased saving in the corporate sector translated into a further decline in non-financial private corporations' leverage, which has trended down for most of the last two decades. In the second quarter of 2008, corporations had about 52.7 cents of debt for every dollar of equity (at book value). Continued generation of undistributed corporate profits has helped the corporate sector remain a net lender to the rest of the economy, a trend which emerged in the 1990's.

Chart H.4

Corporate leverage continues to ease

as a % of equity, not seasonally adjusted data

Financial institutions asset growth reflects an upswing in the stock market

The portfolios of institutional investors, such as mutual funds and trustee pension plans, benefited from an upswing in the equities market. Increases in mortgage and consumer credit holdings also contributed to the increase in financial sector assets.

Government net debt-to-GDP declines further

Government net debt declined in the second quarter of 2008. Government net debt (at book value) as a percentage of gross domestic product (GDP) edged down to just over one-third of GDP, down considerably from over 90% in the mid-1990's.

Concepts, methodology, data quality

The following information should be used to ensure a clear understanding of the basic concepts that define the data provided in this product, of the underlying methodology, and of aspects of data quality. This information will provide users with a better understanding of the strengths and limitations of the data, and how they can be effectively used and analysed.

Concepts and variables measured

The **National Balance Sheet Accounts** (NBSA) are statements of the non-financial assets owned/used in the sectors of the economy and of the financial claims outstanding among the economic units in the sectors in the economy. They consist of the **National Balance Sheet** for the nation as a whole, as well as the underlying sector balance sheets.

At the core of the NBSA are assets and liabilities and the concept of wealth, or net worth. In nominal terms, wealth accumulates as the result of: economic and financial activity in the **Income and Expenditure Accounts** and **Financial Flow Accounts**, respectively; and, changes in the prices of assets and liabilities.

Sector Balance Sheets

The NBSA is an integrated set of balance sheets—non-financial assets, financial assets, liabilities and net worth—for the sectors of the economy. This comprises four major sectors of the economy: persons and unincorporated businesses, corporations, governments and non-residents. The non-resident sector is the detail on Canada's International Investment position. The corporate sector is broken down into a number of sub-sectors with the bulk of this detail comprising the balance sheets of the financial institutions, reflecting the importance of the financial system. The government sector assets and liabilities are available by level of government. In total, there are 30 unique sectors in the NBSA. Financial instruments covered include deposits, bonds, shares, short-term paper, trade accounts, consumer credit, mortgages etc. Users can access credit market debt of the sectors, gross and net debt of government sectors, the structure of household net worth, the composition of the assets of the large institutional investors to name some uses.

National wealth; National net worth

Sector balance sheets excluding the non-resident sector can be aggregated to produce the **National Balance Sheet** (NBS). **National Wealth** is defined as the sum of the non-financial assets in the economy. The standard measure is comprised of produced assets (residential structures, non-residential structures, machinery and equipment, consumer durable goods, inventories) and land. A broader measure of wealth is produced annually which includes the value of natural resources—specifically, timber and major deposits of subsoil assets.

National economies are either net creditor or net debtors, with respect to their financial position vis-à-vis the rest of the world. **National Wealth** adjusted for the net international investment position yields **National Net Worth**, and this measure is equivalent to net worth on the NBS.

Coverage

All traditional assets and liabilities are in scope. Major natural resources are measured, but for certain others (e.g., diamonds, fish stocks) estimates are yet to be developed. NBSA currently excludes certain intangible assets, such as research and development. Human capital is currently out of scope.

Valuation

Data are measured in current dollars, though constant dollar estimates of certain components of **National Wealth** will soon be available.

There are two sets of current dollar NBSA data which are published—a set at book values (published at the detailed sector level) and a set at market values (published at the 4 sector level with the corporate sector split between non-financial and financial corporations). Non-financial assets are at current values, in both sets. In the market value NBSA, only tradable securities (assets and liabilities) are estimated at market values.

Data sources and methodology

The NBSA measure financial positions on a quarterly basis and relies heavily on a wealth of information from various areas of Statistics Canada.

Sources

A very large amount of information from various survey divisions within the bureau, along with other data, are compiled, integrated and analysed as part of the process of producing balance sheet estimates for the Canadian economy.

Major suppliers of data within Statistics Canada include Agriculture Division, Investment and Capital Stock Division, Income Statistics Division, Balance of Payments Division, Industrial Organization and Finance Division, Public Institutions Division. There are also a number of external and administrative sources of data used.

General methodology

Assets and liabilities, by detailed categories, are compiled for the major sectors of the economy. Data are analysed for time series consistency, links to current economic events, issues arising from the source data, and finally with respect to coherence. Estimates are reconciled with data in the *Income and Expenditure Accounts* and *Financial Flow Accounts*.

For further details on definitions, concepts, sources and methods, please refer to *Financial Flow and National Balance Sheet Accounts – Concepts, Definitions, Sources and Methods*, catalogue no. 13-563E.

Seasonal adjustment

Quarterly NBSA data series are largely unadjusted for seasonal variation. However, selected quarterly aggregate data series are available on a seasonally-adjusted basis.

Revisions

Statistical revisions are carried out in order to incorporate the most recent information from quarterly and annual surveys, taxation statistics, public accounts, censuses, etc.

Estimates for each quarter are revised when those for subsequent quarters of the same year are published and when those for the first quarter of each of the next four years are published. They are not normally revised again except when historical revisions are carried out, usually once per decade. However, the conversion of the NBSA to quarterly frequency (2003) and incorporation of market value estimates (2004) have resulted in the accounts being open back to 1990 at the time of the first quarter in June of 2003 and 2004.

Reference period

Data are released approximately 75 days after the reference period.

Data quality (accuracy)

No direct measures of the margin of error in the estimates can be calculated. The quality of the estimates can be inferred from analysis of revisions and from a subjective assessment of the data sources and methodology used in the preparation of the estimates.

Comparability of data and related sources

It is not possible to produce an equivalent to the National Wealth or National Net worth; nor is it possible to construct a balance sheet for the household sector, except periodically from household surveys. However, certain sub-sectors of the NBSA are largely comparable to estimates produced by source data divisions (e.g., pension funds, levels of government).
