The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic price as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations and World Bank.

Highlights

- Economic activity increased 0.2% in October. Increases in manufacturing and wholesale trade propelled the growth, while a decline in mining dampened it.

Note to users

The monthly gross domestic product (GDP) by industry data are chained volume estimates with 2002 as their reference year. This means that the estimates for each industry and aggregate are obtained from a chained volume index multiplied by the industry's value added in 2002. For the 1997 to 2004 period, the monthly estimates are benchmarked to annually chained Fisher volume indexes of GDP obtained from the constant-price input-output tables.

For the period starting with January 2005, the estimates are derived by chaining a fixed-weight Laspeyres volume index to the prior period. The fixed weights are the industry output and input prices of 2004. This makes the monthly GDP by industry estimates more comparable with the expenditure-based GDP data, chained quarterly.

Revisions

With this release of monthly GDP by industry, revisions have been made back to January 2007.

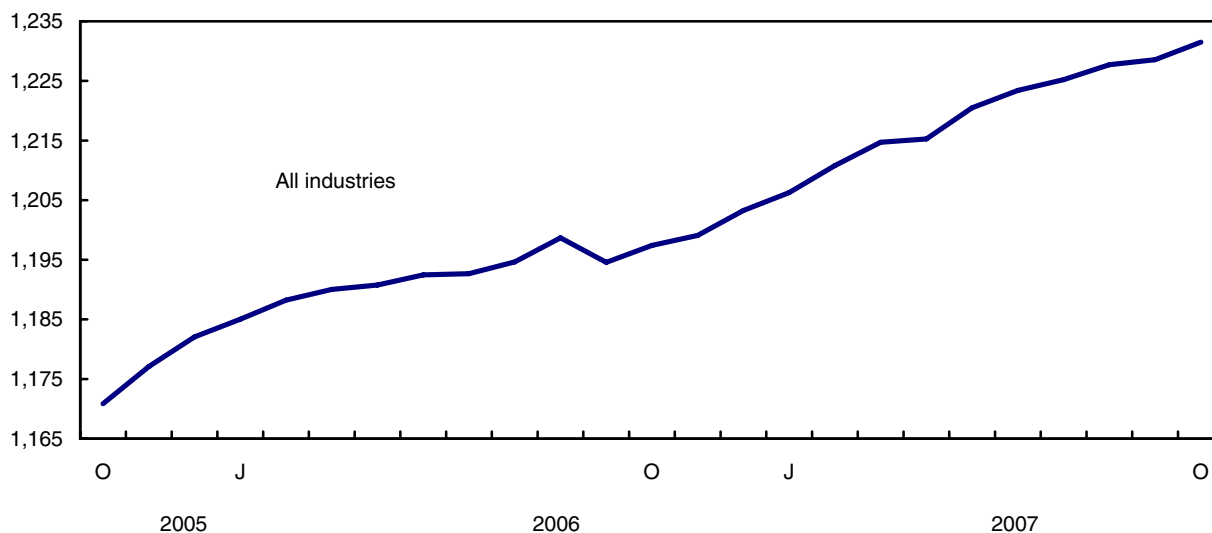

For more information about monthly GDP by industry, see the National Economic Accounts module on our website (<http://www.statcan.ca/nea>).

Analysis

Economic activity increased 0.2% in October, after growing 0.1% in September. These increases occurred as the dollar appreciated significantly vis-à-vis its U.S. counterpart in both months. Both the goods- and services-producing industries advanced. Increases in manufacturing and wholesale trade propelled the growth, while a decline in mining dampened it. Growth was also recorded in the financial sector and retail trade. Conversely, agriculture and forestry declined.

Wholesale trade continues to rise significantly

Wholesale trade rose 1.5% in October. Widespread gains pushed wholesale forward for the sixth consecutive month. The wholesaling of building materials, machinery and electronic equipment, automotive products, personal and household goods, all posted significant increases. These increases were dampened by declines in the wholesaling of grains, farm and petroleum products.

Chart 2

Manufacturing sector rises in October

Manufacturing output increased 0.8% in October, after declining for two months. This growth came mainly from higher production of durable goods, helped in part by increased foreign demand. The growth in manufacturing occurred while the dollar appreciated 5.1% in October and 3.2% in September with respect to its U.S. counterpart.

The production of durable goods (+1.5%) significantly outpaced the decline of non-durable goods (-0.3%). Of the 21 major manufacturing groups, 11 increased, these accounting for 74% of total manufacturing value added.

Manufacturing of motor vehicles, machinery, and primary and fabricated metal products, propelled the increase. The declines in refineries, sawmills, and the manufacturing of paper products partially offset the gains. The volume of manufacturing inventories declined for a third straight month.

Energy sector retreats

The energy sector slipped 0.9% in October. Natural gas and petroleum extraction contracted 1.8%. Notable declines in output occurred in Eastern Canada due to production difficulties. Electricity production edged forward 0.6% in October while natural gas distribution advanced at a rapid pace (+3.7%).

The output of the mining sector excluding oil and gas fell 2.1% in October. Both metal ore (-1.5%) and non-metallic mineral mines (-2.9%) lost ground. However, mining support activities (which include oil and gas exploration) leaped 3.5%. In particular, the amount of contract drilling was up.

Industrial production (the output of mines, utilities and factories) increased 0.1% in October. The strength in manufacturing and utilities was partially offset by the decline in mining. In the United States, industrial production decreased 0.7% in October, with all three sectors losing ground.

Chart 3
Main industrial sectors' contribution to total growth – October 2007

1. Education, health and public administration.

Retail trade advances

Retail trade advanced 0.3% in October. A surge in sales by new car dealers, gasoline stations, building and outdoor home supplies stores, and pharmacies, propelled the sector. However, sales of clothing, convenience, and general merchandise stores (which include department stores), retreated.

Construction up slightly

The construction sector edged up 0.1% in October. The increases in non-residential building construction (+0.2%) and engineering and repair work (+0.4%) slightly outpaced the drop in residential construction (-0.6%). The strength in commercial buildings was partially offset by the declines in industrial and public building construction. The gains in the construction of apartments and in residential alterations and improvements work were not enough to offset the decline in single-family homes.

Despite a general downward trend over the last few months, the home resale market registered a slight increase for October. As a result, the real estate agents and brokers industry posted a gain of 0.6% for the month.

Other industries

Activities in the finance and insurance sector increased 0.5%. Strong trading on the stock markets combined with healthy sales of mutual funds fuelled the sector. There was however a decline in new issues of securities. The forestry sector (-0.5%) continued to be affected by a major labour dispute that ended toward the end of October.
