The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic price as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations and World Bank.

Annual averages of seasonally adjusted data are identical to annual levels except for minor variations which are due to rounding.

| 3. | Main industrial sectors' contribution to the percent change in gross domestic product - January 2010 | 9 |

Highlights

Real gross domestic product advanced 0.6% in January, a fifth consecutive monthly increase. Goods-producing industries increased 1.3% largely on the strength of manufacturing and construction, while the production of services advanced 0.4%.

Note to readers

The monthly gross domestic product (GDP) by industry data at basic prices are chained volume estimates with 2002 as their reference year. This means that the data for each industry and aggregate are obtained from a chained volume index multiplied by the industry's value added in 2002. For the 1997 to 2006 period, the monthly data are benchmarked to annually chained Fisher volume indexes of GDP obtained from the constant-price input-output tables.

For the period starting with January 2007, the data are derived by chaining a fixed-weight Laspeyres volume index to the prior period. The fixed weights are the industry output and input prices of 2006. This makes the monthly GDP by industry data more comparable with the expenditure-based GDP data, chained quarterly.

Revisions

With this release of monthly GDP by industry, revisions have been made back to January 2009. For more information about monthly GDP by industry, see the National Economic Accounts module on our website (www.statcan.gc.ca/nea-cen/index-eng.htm).

Analysis

Real gross domestic product advanced 0.6% in January, a fifth consecutive monthly increase. Goods-producing industries increased 1.3% largely on the strength of manufacturing and construction. Mining and oil and gas extraction also increased in January. The production of services advanced 0.4%, led by wholesale trade. Retail trade, the finance and insurance sector, transportation and the public sector also rose. Conversely, the output of real estate agents and brokers, some tourism-related industries as well as agriculture and forestry retreated.

Chart 1

Real gross domestic product advances for a fifth consecutive month in January

Manufacturing continues to increase

After a 1.2% advance in December, manufacturing increased 1.9% in January, with 17 of the 21 major groups advancing. Notable increases were recorded by manufacturers of fabricated and primary metal products, chemicals, plastics and rubber products. In contrast, motor vehicle production fell 2.4%.

Chart 2
Manufacturing sector increases significantly with widespread gains in January

GDP in billions of chained (2002) dollars

Widespread advances in wholesale trade

The volume of wholesaling activity increased 2.9% in January. All wholesaling trade groups posted gains, with the exception of apparel and alcohol and tobacco. The most notable increases were in motor vehicles, petroleum products, pharmaceuticals and food products.

Residential construction strengthens

The construction sector advanced 1.7% in January. The increases recorded in residential construction (+4.0%) and in engineering and repair work (+1.0%) overshadowed the 0.5% decrease in non-residential building construction. In residential construction, there were increases in all types of structures except apartments, with alterations and improvements work leading the advance.

Mining and oil and gas extraction moves ahead

Mining and oil and gas extraction increased 0.9% in January. Oil and gas extraction rebounded 0.5%, with the production of natural gas increasing and that of oil receding. The mining sector excluding oil and gas advanced 2.3%, with increases at potash and gold and silver ore mines. Foreign demand for these products had increased in January. Support activities for mining and oil and gas extraction also were up in January (+1.2%).

The finance and insurance sector increases

The finance and insurance sector advanced 0.6%. This gain was largely attributable to an increase in the volume of trading on the stock exchanges.

Retail trade up

Value added in the retail trade sector rose 0.8% in January. Significant increases were registered in building and outdoor home supplies stores, home furnishings stores as well as food and beverage stores. Conversely, decreases were recorded at new and used car dealers and at gasoline stations. Retail trade excluding new car dealers advanced 1.3%.

Chart 3

Main industrial sectors' contribution to the percent change in gross domestic product - January 2010

1. Education, health and public administration.

Activity of real estate agents and brokers retreats

Sales of existing homes decreased significantly in several parts of the country, resulting in a 6.7% decrease in the output of real estate agents and brokers. Despite this decline, the level of output of this industry remained close to its May 2007 peak.

Other industries

After an increase in December, several tourism-related industries declined in January, mirroring the decline in the number of overnight travellers to Canada. Railway operators benefited from the higher production of goods. The public sector (health, education and public administration combined) increased slightly.
