The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic price as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations and World Bank.

Annual averages of seasonally adjusted data are identical to annual levels except for minor variations which are due to rounding.

1. Real gross domestic product increases in August 7
2. Oil and gas extraction rebounds in August 8
3. Main industrial sectors' contribution to the percent change in gross domestic product - August 2010 9

Highlights

Real gross domestic product increased by 0.3% in August after a 0.1% decline in July.

Note to readers

The monthly gross domestic product (GDP) by industry data at basic prices are chained volume estimates with 2002 as their reference year. This means that the data for each industry and aggregate are obtained from a chained volume index multiplied by the industry's value added in 2002. For the 1997 to 2007 period, the monthly data are benchmarked to annually chained Fisher volume indexes of GDP obtained from the constant-price input-output tables.

For the period starting with January 2008, the data are derived by chaining a fixed-weight Laspeyres volume index to the prior period. The fixed weights are the industry output and input prices of 2007. This makes the monthly GDP by industry data more comparable with the expenditure-based GDP data, chained quarterly.

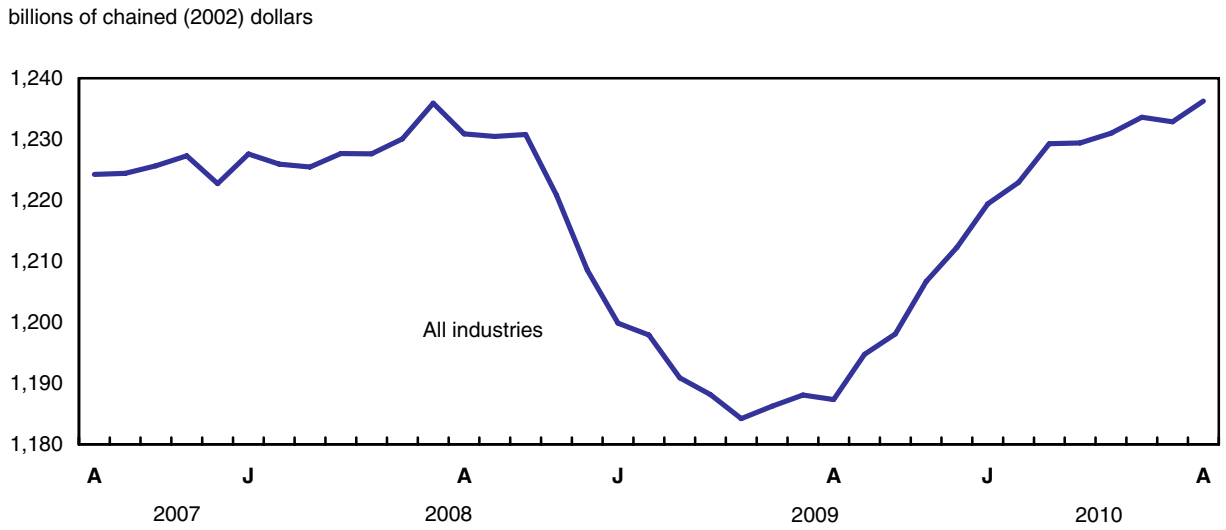
Revisions

With this release of monthly GDP by industry, revisions have been made back to January 2010. For more information about monthly GDP by industry, see the National economic accounts module on our website (*www.statcan.gc.ca/nea-cen/index-eng.htm*).

Analysis

Real gross domestic product increased by 0.3% in August after a 0.1% decline in July. Oil and gas extraction, wholesale trade and manufacturing were the main sources of growth in August. Increases were also recorded in the finance and insurance sector, by real estate agents and brokers, in construction and retail trade. Utilities and forestry decreased while public sector output was unchanged.

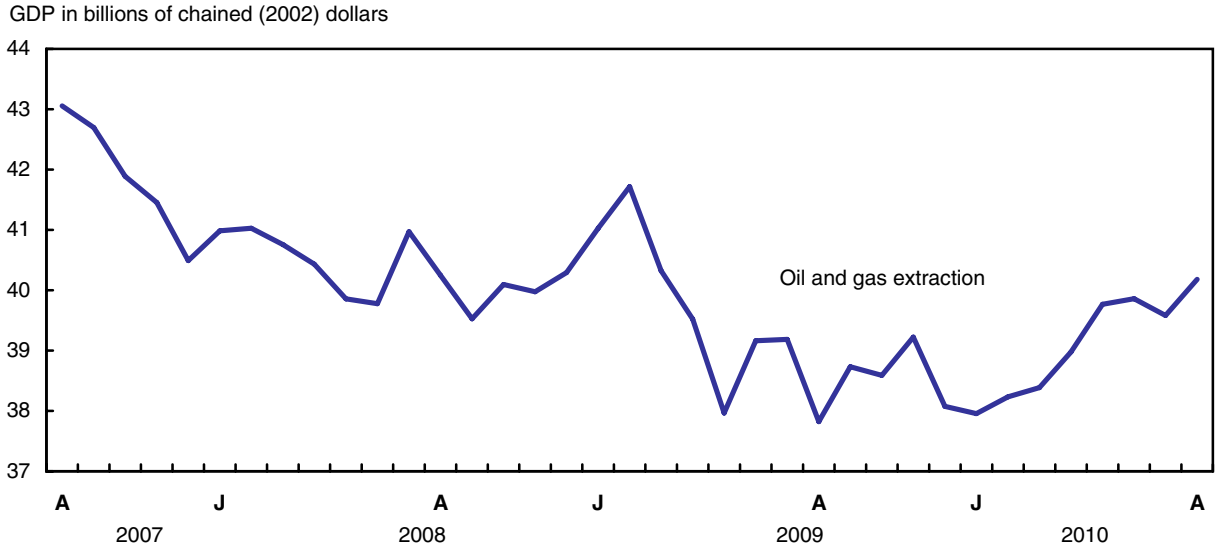
Chart 1
Real gross domestic product increases in August



Mining and oil and gas extraction increases

Mining and oil and gas extraction rose 0.5%. Oil and gas extraction rebounded (+1.5%), with both the production of natural gas and oil advancing. These increases were partially offset by decreases in metal ore mining and in support activities for mining, oil and gas extraction.

Chart 2
Oil and gas extraction rebounds in August



Wholesale trade advances

After three consecutive monthly declines, wholesale trade rose 1.1% in August. All major sectors posted gains, with the exception of food, beverage and tobacco as well as personal and household goods. The largest increases were recorded in the wholesaling of machinery and equipment and of petroleum products.

Manufacturing rises

Manufacturing grew 0.5% with 13 of the 21 major groups advancing. Manufacturers of non-durable goods increased their production by 0.8%, notably of chemical products. Durable goods manufacturing advanced 0.2%, led by fabricated metal products, furniture, machinery and non-metallic mineral products. Conversely, the manufacturing of primary metal products decreased in August after a surge in July.

Increase in the finance and insurance sector

The finance and insurance sector advanced 0.6% in August. This rise was mainly attributable to increases in financial intermediation (personal and business loans, residential mortgages, mutual funds sales) and higher volume of trading on the stock exchanges.

Construction and real estate transactions increase

Construction rose 0.4% with all major components (residential and non-residential buildings as well as engineering and repair works) increasing. The home resale market rebounded in August after three consecutive monthly declines. This translated into a 5.8% increase in the output of real estate agents and brokers.

Retail trade edges up

Retail trade edged up 0.1% in August. Increases were recorded at new car dealers, home furnishings stores, supermarkets and gasoline stations. Conversely, decreases were recorded at beer, wine and liquor stores as well as clothing and general merchandise stores.

Other sectors

Accommodation and food services were up 0.7%. Utilities declined 0.8% as the demand for electricity decreased, and forestry and logging contracted (-4.0%) for a second consecutive month. The public sector (education, health and public administration combined) was unchanged.
