1. Environmental establishments are defined as establishments that earned revenues from the sale of environmental goods or services. Industry groups are based on the North American Industry Classification System (NAICS). Excludes establishments involved in environmental engineering construction.

2. For reference year 2004, a change was made to the methodology for producing estimates of revenues related to environmental engineering construction. For 2004, estimates of revenues for environmental engineering construction are derived from environmental capital expenditures reported by businesses and governments, supplemented with revenues reported to the Environment Industry Survey for renewable energy production facilities only. Previously, estimates of revenues for environmental engineering construction were derived from environmental capital expenditures reported by businesses and governments, supplemented with revenues reported to the Environment Industry Survey for all types of environmental engineering construction.

3. Includes Recyclable material wholesaler-distributors.
