Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed standards of service that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under “About us” > “The agency” > “[Providing services to Canadians](#).”

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Standard table symbols

The following symbols are used in Statistics Canada publications:

- not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^P preliminary
- ^r revised
- X suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published
- * significantly different from reference category ($p < 0.05$)

Enviro Fact Sheet

Canadians and Nature: Homegrown fruits, herbs, vegetables and flowers, 2013

by Environment, Energy and Transportation Statistics Division

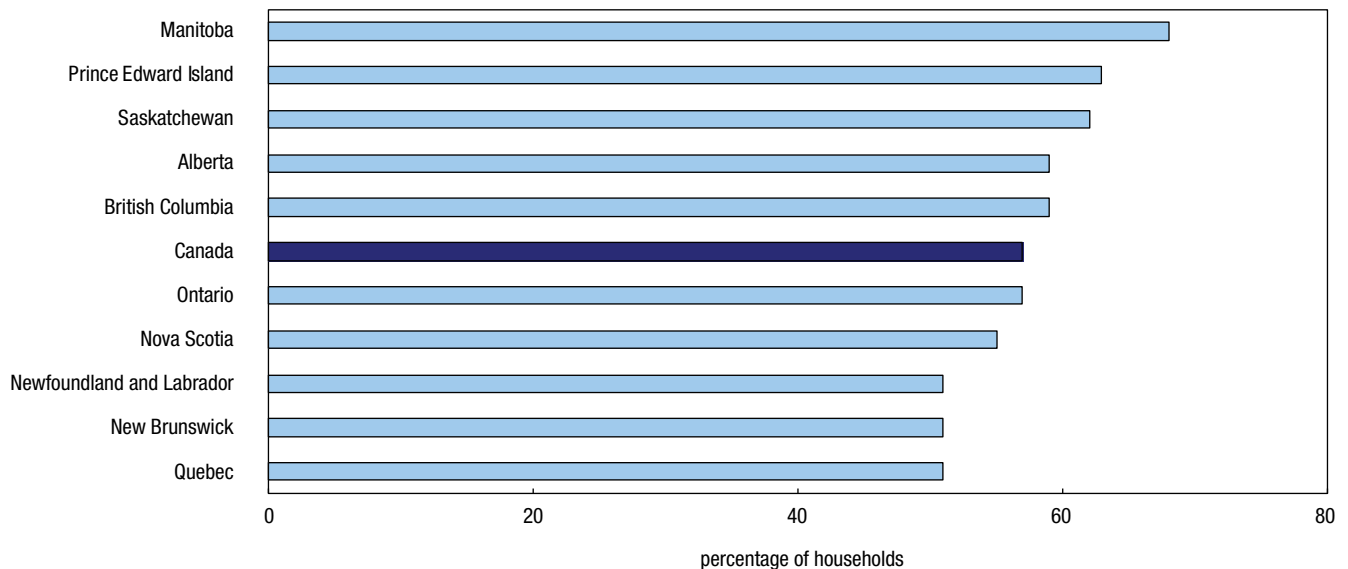

In 2013, more than half of Canadian households (57%) reported that they grew fruits, herbs, vegetables or flowers for personal use in the last twelve months. Households in Manitoba (68%) were the most likely to have done this. Newfoundland and Labrador, New Brunswick and Quebec households were the least likely (51%) to have grown fruits, herbs, vegetables or flowers.

The most common place to have grown these types of plants was in the yard (81% of these households), however balconies (30%) and indoors (22%) were also frequently reported locations. Four percent of households that grew fruit, herbs, vegetables or flowers for personal use grew them in community gardens, with households in Quebec reporting this more frequently

Chart 1

Canadians and Nature: Homegrown fruits, herbs, vegetables and flowers, 2013

(9%) than households in other provinces. Community gardens were used by 5%^F of households in low-rise apartments that reported growing their own fruit, herbs, vegetables or flowers.

Households composed exclusively of people between 45 and 64 years old (57%), senior-only households (52%), and those with children and teens (68%) were more likely to have grown fruit, herbs, vegetables or flowers than households composed solely of people between 20 and 24 years of age (41%^F) and 25 and 44 years of age (43%).

Households that owned the dwelling they lived in were almost twice as likely to report growing fruit, herbs, vegetables or flowers as households that rented their homes (65% compared to 34%). While households that owned their dwelling were also almost twice as likely as those who didn't to have grown these plants in the yard (88% compared to 46%, respectively), they were less likely to have grown them on balconies (27% of owners compared to 43% of non-owners) or indoors (20% of owners compared to 32% of non-owners).

About the Households and the Environment Survey

The Households and the Environment Survey asks Canadian households about their activities and behaviours with respect to the environment. It covers a wide variety of topics including water and energy consumption and conservation, hazardous products used in the home, and the household's interactions with nature. Data from the survey are used by governments to guide policies and programs, by researchers to learn more about Canadians and by individuals to see how they compare to the rest of the country.

The target population of the 2013 Households and the Environment Survey consisted of households in Canada, excluding households located in Yukon, Northwest Territories and Nunavut, households located on Indian Reserves or Crown lands, and households consisting entirely of full-time members of the Canadian Armed Forces. Institutions and households in certain remote regions were also excluded.

Definitions, data sources and methods: [Survey number 3881](#).

Available in CANSIM: tables 153-0156 to 153-0158.
