Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published
- * significantly different from reference category ($p < 0.05$)

Note

Due to rounding, the sums of individual items may not agree exactly with the totals.

Five-year averages exclude years without data.

Concepts, methods and sources published annually in the October issue.

This publication was prepared under the direction of:

- **Rita Athwal**, Unit Head, Grain Marketing Unit

Situation Report — July 2012

Canadian farmers report planting record areas of canola, corn and soybeans

As of June 7, 2012, Prairie farmers had either planted, or intended to plant, a record area of canola and larger areas of wheat, dry field peas and barley, reports Statistics Canada in the June 27th release of *Field Crop Reporting Series* (Stocks of Principal Field Crops). Farmers in Manitoba and Ontario reported seeding record areas of corn and soybeans.

The June Farm Survey collects information on crop seeded areas in Canada. In 2012, the survey was conducted with approximately 25,000 farmers from May 28 to June 7. Farmers were asked to report their seeded areas of grain, oilseeds and special crops.

Overall, the area seeded to field crops in 2012 returned to levels seen prior to the 2011 floods in parts of Manitoba and Saskatchewan. Farmers in these two provinces reported significantly fewer summerfallow acres.

Producers in the Prairies reported a record area of 21.0 million acres seeded in canola, up by 2.4 million acres or 12.8%. This was the sixth consecutive annual record for canola area.

Farmers reported 23.8 million acres seeded in wheat, up by 2.3 million acres or 10.9% from 2011. This increase was mainly a result of higher acreage seeded in durum and hard red spring wheat.

For a second consecutive year, Prairie farmers reported an increase in durum. The area of acres seeded in durum increased 17.3% to 4.7 million acres in 2012 from 4.0 million acres in 2011.

The area of hard red spring wheat increased 6.4% to 15.1 million acres. Saskatchewan accounted for most of this increase, with 845,000 additional acres seeded to hard red spring wheat.

Prairie farmers reported seeding 6.9 million acres of barley in 2012, compared with 6.0 million acres in 2011.

The area planted in dry field peas on the Prairies was reported at 3.5 million acres, up 50.1% from 2.3 million acres in 2011. Increases were seen in all three Prairie provinces with the most significant increase in Saskatchewan, where the reported acreage was up 61.7% to 2.5 million acres.

Farmers in Manitoba reported seeding 52.2% more soybean area in 2012, at 875,000 acres, which exceeded the record of 575,000 acres set in 2011.

In Ontario, soybean area increased by 210,000 acres, or 8.6%, to 2.7 million acres. This area surpassed the record area of 2.4 million acres set in 2010 and equaled in 2011.

Meanwhile, Quebec farmers reported a slight decrease in soybean area of 19,800 acres, or 2.7%, to 721,500 acres.

Ontario farmers reported seeding 2.3 million acres of corn for grain in 2012. This area exceeded the record of 2.2 million acres set in 1981.

Quebec farmers planted 1.0 million acres of corn for grain, up 13.4% from the 2011 area of 882,200 acres.

Manitoba farmers reported a record corn for grain area of 300,000 acres, up 66.7% from 2011. The previous record of 225,000 acres was set in 1981.

USDA reports decreased global wheat, coarse grain and oilseed supplies

The United States Department of Agriculture released the World Agriculture Supply and Demand Estimates on July 11 and reported a reduction of 4.6 million metric tonnes for global wheat supplies for 2012/13.

Supplies of global coarse grains for 2012/13 are lowered 43.2 million metric tonnes, reflecting the 41.9 million metric tonnes projected reduction in the U.S. corn crop.

Global oilseed production for 2012/13 is projected at 422.5 million metric tonnes, down 4.6 million from the previous estimates released in June, mostly due to lower projected production of soybeans in the U.S.

001-0020	Estimated area, yield, production, average farm price and total farm value of selected principal field crops: dry beans (white and coloured), in imperial units, annual
001-0040	Stocks of grain and oilseeds at March 31, July 31 and December 31, 3 times per year
001-0041	Supply and disposition of grains in Canada as of March 31, July 31, August 31 (soybeans only) and December 31, 3 times per year
001-0042	Supply and disposition of corn in Canada and selected provinces as of March 31, August 31 and December 31, 3 times per year
001-0043	Farm supply and disposition of grains as of March 31, July 31, August 31 (soybeans only) and December 31, 3 times per year
001-0044	Milled wheat and wheat flour produced, Canada, monthly
002-0010	Supply and disposition of food in Canada, annual
002-0011	Food available in Canada, annual
002-0019	Food available by major groups in Canada, annual
003-0080	Nutrients in the food supply, by source of nutritional equivalent and commodity, annual

Selected surveys from Statistics Canada

3401	Field Crop Reporting Series
3403	Miller's Monthly Report
3404	Reports of Crushing Operations
3443	Miller's Annual Report
3464	Survey of Commercial Stocks of Corn and Soybeans
3476	Survey of Commercial Stocks of the Major Special Crops
5046	Feed Grain Purchases

Selected summary tables from Statistics Canada

- *Field and specialty crops*
- *Food available, by major food groups*

1. Number 1 and number 2 represent the grade and quality of the grain.

2. Includes flour that is not specified.

3. Millfeeds are the by-products of the milling process used mainly for animal feed.

Total	23,824	22,550	20,505	20,097	17,719	19,478	1,555

1. Excluding durum.

2. Includes British Columbia.

Note(s): Deliveries are as reported by the Canadian Grain Commission (with any adjustments prorated monthly) plus estimates for unlicensed deliveries. Includes deliveries to condominium storage as of August, 2003. Negative deliveries may indicate that farmers removed more grain from condominium storage than they delivered.

1. Includes unlicensed shipments to U.S. markets.

2. Includes British Columbia.

Note(s): Deliveries are as reported by the Canadian Grain Commission (with any adjustments prorated monthly) plus estimates for unlicensed deliveries. Includes deliveries to condominium storage as of August, 2003. Negative deliveries may indicate that farmers removed more grain from condominium storage than they delivered

1. Beginning in June, 2002 excludes deliveries to process elevators.

2. Includes unlicensed shipments to U.S. markets.

3. Includes wheat (excluding durum), durum wheat, oats, barley, rye, flaxseed and canola.

4. Includes British Columbia.

Note(s): Deliveries are as reported by the Canadian Grain Commission (with any adjustments prorated monthly) plus estimates for unlicensed deliveries. Includes deliveries to condominium storage as of August, 2003. Negative deliveries may indicate that farmers removed more grain from condominium storage than they delivered.
