

Aviation

Civil Aviation, Monthly Key Operating Statistics, Major Canadian Air Carriers

January to December 2010

Highlights

- For the 12-month period, January to December 2010, for the scheduled and charter services, the major Canadian air carriers reported a 7.2% increase in passengers and a 10.0% growth in passenger-kilometres compared with the same period in 2009. WestJet reported that total passenger-kilometres flown rose 12.9% during the period, while the operations of Air Canada increased 9.1%.
- In 2010, both Air Canada and WestJet reported their highest volume of scheduled passenger traffic in August. It is also during that month that these two carriers posted the highest number of passenger-kilometres flown on their scheduled operations. During the 12-month period, the average passenger trip length ranged between 3,077 kilometres in April and 3,503 kilometres in September for Air Canada, while it ranged between 1,595 kilometres in both September and October and 1,711 kilometres in December for WestJet.
- In 2010, Air Canada and WestJet increased their system capacity, as measured by available seat-kilometres, for their scheduled services, by 7.8% and 13.7%, respectively when compared with 2009. The capacity of Air Canada increased in all months, except for April, when a 0.3% decrease was recorded; the capacity of WestJet climbed in all months—the increases ranged from 10.4% in June to 19.5% in February. This strong growth is partly related to the 2010 Vancouver Winter Olympics.
- Both Air Canada and WestJet reported an improvement in their scheduled passenger load factor (a measure of the fullness of their aircraft). For the 12-month period, January to December 2010, Air Canada's passenger load factor reached 83.1% and WestJet's passenger load factor stood at 79.8%.
- For the 12-month period, January to December 2010, both Air Canada and WestJet recorded double-digit increases in terms of turbo fuel consumed from the same period in 2009. Air Canada consumed 3.4 billion litres (+11.3%) of turbo fuel and WestJet used nearly one billion litres (+10.6%).

Release date: September 2011

Symbols

The following standard symbols are used in Statistics Canada publications:

.	not available for any reference period
..	not available for a specific reference period
...	not applicable
0	true zero or a value rounded to zero
0 ^s	value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
P	preliminary
r	revised
x	suppressed to meet the confidentiality requirements of the <i>Statistics Act</i>
E	use with caution
F	too unreliable to be published
*	significantly different from reference category ($p < 0.05$)

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed *standards of service* that its employees observe.

To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under "About us" > "The agency" > "Providing services to Canadians."

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.
