## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

## Acknowledgements

Statistics Canada would like to thank all of the respondents and data suppliers whose participation has enabled us to provide the statistical information contained in this publication.

The information found in this publication could not have been produced if not for the cooperation of our respondents and data suppliers.

This publication was prepared by the Aviation Statistics Centre, of the Transportation Division, Statistics Canada under the general direction of **Fred Barzyk**, Director, Transportation Division and **Norah Hillary**, Chief, Aviation Statistics Centre. **Kathie Davidson**, **Rose Krakower**, **John Scolli**, **Bev Pomfret** and **Jim Charinos** contributed to the preparation of this publication.

## Note to users

Data presented in this issue of the publication supersede previously published statistics.

## Highlights

---

- The number of aircraft take-offs and landings at Canadian airports with NAV CANADA air traffic control towers and flight service stations decreased by 3.4% in 2010. Ninety-three airports reported almost 5.7 million movements in 2010 compared with 5.9 million movements in 2009.
- Itinerant movements (flights from one airport to another) decreased 2.5% (-105,618 movements) in 2010 compared with 2009.
- Local movements (flights that remain in the vicinity of the airport) declined 5.6% (-100,570 movements) in 2010 compared with 2009.

## Analysis

---

Aircraft take-offs and landings at the 93 Canadian airports with NAV CANADA air traffic control towers and flight service stations decreased 3.4% (-203,107 movements) in 2010 from 2009. These airports reported 5.7 million movements in 2010 compared with 5.9 million movements in 2009 and 6.2 million in 2008. In 2010 the spread of dense volcanic ash from Iceland in April and May as well as the severe winter storms in February and again in December resulted in the cancellation of numerous flights. Toronto/Lester B Pearson International, Ontario (419,044 movements) followed by Vancouver International, British Columbia (296,511 movements) were the most active sites in 2010.

There were 4.1 million itinerant movements (flights from one airport to another) reported in 2010. This represents a 2.5% decrease (-105,618 movements) compared with the previous year. The year-over-year variations ranged from an increase of 34.9% at Toronto/Billy Bishop Toronto City, Ontario to a decline of 25.0% at Boundary Bay, British Columbia. Year-over-year increases in the number of itinerant aircraft movements were reported by 43 airports.

In 2010, there were 1.6 million local movements (flights that remain in the vicinity of the airport) recorded. This represents a decrease of 5.6% (-97,489 movements) compared with the previous year. Montréal/St-Hubert, Quebec (100,570 movements) followed by Toronto/Buttonville Municipal, Ontario (94,518 movements) reported the largest number of local movements in 2010.

### **Itinerant movements: domestic, transborder and international**

The number of domestic itinerant movements at 93 Canadian airports decreased for the second consecutive year. There were 136,415 fewer domestic itinerant movements reported in 2010. Vancouver International, British Columbia (221,053 movements) followed by Calgary International, Alberta (184,200 movements) reported the greatest number of domestic itinerant movements.

Ninety-three airports reported 504,769 transborder itinerant movements (between Canada and the United States) in 2010, up 5.1% (+24,642 movements) from the previous year. Year-over-year increases were reported by 53 airports. Toronto/Lester B Pearson International, Ontario reported 183,067 movements. This represents 36.3% of the total transborder itinerant movements.

In 2010, seventy-two airports reported 136,792 other international itinerant movements, continuing the upward trend for the 4<sup>th</sup> consecutive year with a 4.7% increase (+6,155 movements) from 2009. Toronto/Lester B Pearson International, Ontario (56,852 movements) followed by Montréal/Pierre Elliott Trudeau International, Quebec (26,155 movements) and Vancouver International, British Columbia (18,836 movements) reported the largest number of other international movements in 2010. The movements reported by these three airports represent 74.5% of the total other international itinerant movements.

# Methodology

---

## Survey universe

### Coverage

The survey covers all aircraft movements at Canadian airports with NAV CANADA air traffic control towers and flight service stations.

## Methodology survey

The Itinerant movement record is designed to capture:

- Aircraft identification
- Aircraft type
- The last station before landing at the reporting airport or the next station after take-off
- Arrival or departure
- Time of movement
- Runway used
- Flight rules (Instrument Flight Rules or Visual Flight Rules).

The Local aircraft movement record provides for reports of local movements by:

- Hour
- Single engine aircraft
- Multi-engine aircraft
- Jet aircraft
- Military aircraft
- Date of movement

Processing of aircraft movement statistics involves several stages. Monthly data by class of operation are released in Aircraft Movement Statistics - Monthly report, catalogue nos. 51-007-X and 51-008-X (TP-141). Annual tables, which may reflect revisions, are released in the two annual publications, catalogue 51-209-X Aircraft Movement Statistics – NAV CANADA Towers and Flight Service Stations: Annual report (TP-577) and catalogue 51-210-X Aircraft Movement Statistics – Airports Without Air Traffic Control Towers: Annual report (TP-577). In particular, data on itinerant movements by type of operation may reflect revisions as various sources of comparative information (data collected from commercial air carriers by the Aviation Statistics Centre, Statistics Canada) become available during the processing cycle. Finally, when revisions are required after the release of 51-209-X and 51-210-X, they are contained in the five year historical summary of subsequent editions of these reports. These revisions are also reflected in the CANSIM tables, both monthly and annual.

The records are completed daily, based on a twenty-four hour clock running from zero hour to 23:59. The times recorded are Coordinated Universal Time (UTC); however, published statistics are shown in local times. The records are transmitted to the Aviation Statistics Centre.

The Aviation Statistics Centre maintains a data base of parameter files of current information on all registered aircraft. The storage of this information reduces the reporting burden of the survey respondents and limits the element of human error associated with the preparation of source documents.

Other parameter files information includes registered aircraft identifications and their corresponding aircraft types, gross take-off weights, types of power plant (piston, jet or turboprop); whether the aircraft are fixed wing, helicopters or gliders. This information also provides a basis for identifying type of flights (commercial, private and government) and the geographical area in which the flights take place.

The parameter files also include airport environment information against which the airport category is checked; the reported runway is validated and the time difference between UTC and Local is assigned.

## **Data for airports are displayed in the section pertaining to the airport's tower category for the reference period**

### **2010**

Fredericton, New Brunswick – The flight service station closed and an air traffic control tower was opened in January 2010.

### **2008**

Sudbury, Ontario – The air traffic control tower closed and a flight service station was opened in June 2008.

Fort McMurray, Alberta – The flight service station closed and an air traffic control tower was opened in October 2008.

Montréal/Mirabel International, Quebec – The air traffic control tower closed and a flight service station was opened in December 2008.

Kuujuarapik, Quebec – the flight service station closed in December 2008. For data, please refer to the Aircraft Movement Statistics: Airports Without Air Traffic Control Towers: Annual Report (TP 577) Statistics Canada catalogue 51-210-X.

St. Anthony, Newfoundland and Labrador – the flight service station closed in December 2008. For data, please refer to the Aircraft Movement Statistics: Airports Without Air Traffic Control Towers: Annual Report (TP 577) Statistics Canada catalogue 51-210-X.

### **2006**

Sydney, Nova Scotia – the flight service station closed in February 2006. For data, please refer to the Aircraft Movement Statistics: Airports Without Air Traffic Control Towers: Annual Report (TP 577) Statistics Canada catalogue 51-210-X.

Roberval, Quebec – the flight service station closed in November 2006. For data, please refer to the Aircraft Movement Statistics: Airports Without Air Traffic Control Towers: Annual Report (TP 577) Statistics Canada catalogue 51-210-X.

Dawson Creek, British Columbia – the flight service station closed in June 2006. For data, please refer to the Aircraft Movement Statistics: Airports Without Air Traffic Control Towers: Annual Report (TP 577) Statistics Canada catalogue 51-210-X.

## Data quality and limitations

---

Aircraft movement statistics are accumulated from data originating with air traffic control tower units or flight service station personnel. Because staff in these positions are highly trained in factual observation and reporting, the entries in the data bank are of a high quality.

The procedures for reporting aircraft movements on the Daily air traffic records by tower units are described in the NAV CANADA Air traffic control manual of operations (TP 703) Volume 1, Para. 1023 to 1023.5. Definitions for terms used in these paragraphs can be found in appendix I "Glossary of terms" of this report.

To maintain uniformity in the reporting of source data, air traffic control units have access to an "Air traffic designators" handbook (TP 143) listing the official Transport Canada aircraft type designators and the designators of various domestic and international air carriers. This handbook and another titled "Canada flight supplement" listing various airport codes serve as references to help ensure the reporting of the proper aircraft identity and the point of origin and destination of flights.

The processing system contains editing procedures designed to identify data errors occurring during transcription or during data capture of forms. Identified errors are manually corrected by ASC editing staff.

Errors may occur if an aircraft type code which exists is reported or data captured in error for a flight. For example, the reporting or keying of B727 for a flight actually performed by a B737 may not be detected during the system editing. That the aircraft type information is recorded by highly trained air traffic control tower staff using a common handbook of official aircraft codes will minimize this problem.

Similarly, the breakdown of the data on a geographic basis by use of location codes can be subject to error. For smaller locations, alphanumeric location codes are often used and the sequence of numbers and letters determines the geographic area to which the data are assigned. In some cases, where a sequence error has been introduced into the system either at the reporting unit or at data capture, a domestic movement may be classified as transborder or vice versa. The use of common manuals of location identifiers works to minimize this occurrence.

### Factors which may influence the data

#### 2010

Significant winter storms struck the eastern seaboard of Canada and the United States in early February 2010, forcing flight delays and cancellations. Winter storms struck the north-eastern United States, Atlantic Canada and Britain again in December resulting in numerous flight delays and cancellations.

The Vancouver 2010 Winter Olympics in February 2010 resulted in regular carriers scheduling additional flights and an influx of corporate jets. Conversely, airspace restrictions and enhanced security reduced the number of movements of the smaller local carriers.

Skyservice, Canada's second-largest charter carrier, ceased operation at the end of March 2010.

The spread of dense volcanic ash from Iceland resulted in the cancellation of numerous flights in April and May 2010.

Lightning storms, combined with dry conditions, caused a rash of forest fires in northern Manitoba and Saskatchewan and in the British Columbia interior in July 2010.

On August 4, 2010, work was begun on the closure of runway 16/34 at Edmonton City Centre Airport.

Effective September 2010, the Calgary Airport Authority no longer permits anyone with a student pilot permit to take off or land at the Calgary International Airport.

This has resulted in increased training flights at the nearby Calgary/Springbank airport.

## 2009

Porter Airlines expanded its service to include St. John's, Newfoundland and Labrador on October 5, 2009, Boston Logan effective September 14, 2009, and Thunder Bay International Airport effective June 26, 2009.

## 2008

Significant winter storms struck central and eastern Canada in February and in early March 2008 forcing flight delays and cancellations.

Porter Airlines Inc. began to offer 7 daily flights from Toronto City Centre to Newark, NJ on March 31, 2008.

Lufthansa's new daily non-stop service from Frankfurt to Calgary began on April 15, 2008.

To ensure compliance with a Federal Aviation Administration safety directive on wiring inspections for MD-80 aircraft, numerous American Airline flights had to be cancelled in April and May 2008.

Additional flights to both Canadian and European destinations from Halifax/Robert L. Stanfield International airport commenced in June 2008.

Zoom Airlines suspended operations effective August 28, 2008.

Air Canada cancelled 10 routes and suspended three other routes as of November 2008 in order to reduce fuel costs.

## 2007

Harmony Airways ceased its operations on April 9, 2007.

Icelandair began regular service from Halifax, Nova Scotia to Iceland on May 17, 2007.

Effective October 28, 2007, Air Canada added new year-round, non-stop services between Fredericton and Ottawa, Moncton and Ottawa and St. John's and Ottawa.

Emirates SkyCargo started non-stop services three times a week between Dubai and Toronto effective October 29, 2007.

The new Airbus A380 made its first landing at Montréal-Trudeau Airport on November 12, 2007.

A major winter storm struck central and eastern Canada on December 16, 2007 forcing the cancellation of flights.

## 2006

In August 2006, increased security measures were implemented preventing travellers from carrying many common liquid products onto flights.

On September 10, 2006, CanJet stopped its regular scheduled flights. The discount carrier would focus its operations on charter flights.

Porter Airlines began service Toronto/City Centre-Ottawa on October 23, 2006.

# Appendix I

---

## Glossary of terms

### Air carrier

Aircraft operators, licensed by the Canadian Transportation Agency to transport persons, mail and/or goods by air.

**Level I-III air carriers:** Effective 2010, Canadian air carriers that, in each of the two calendar years immediately preceding the report year, realized annual gross revenues of \$2,000,000 or more for the air services for which the air carrier held a licence. Also includes foreign air carriers.

**Level IV-VI air carriers:** Effective 2010, Canadian air carriers that, in the calendar year immediately preceding the report year, realized annual gross revenues of less than \$2,000,000 for the air services for which the air carrier held a licence. Between 2000 and 2009, levels IV and VI were not applicable.

### Aircraft movement

A take off, a landing, or a simulated approach by an aircraft. ATC Manops amendment 8-8-83. NC-703.

### Class of operation

Aircraft movements are classified as either "Itinerant" or "Local".

### Commercial

Flights by aircraft operators licensed by the Canadian Transportation Agency to perform commercial air services. Commercial operations are divided into two categories: Air carrier and Other commercial.

### Domestic itinerant movements

Movements, at a Canadian airport, of aircraft departing to or arriving from another point in Canada.

### FSS

Flight service station.

### Government-Civil

Aircraft owned by federal, provincial and municipal bodies as well as foreign states, but excluding those owned by crown corporations, boards and commissions. Such aircraft are coded "3" under "Purpose" in the Canadian civil aircraft register.

### Government-Military

Aircraft of any branch of the armed forces of any nation.

## **I.F.R. flight**

A flight conducted in accordance with Instrument Flight Rules.

## **International movements**

Movements, at a Canadian airport, of aircraft arriving from or departing to a point outside Canada. International movements are subclassified into "transborder" (to or from a point in the United States including Alaska, Hawaii, and Puerto Rico), and "other international" (to or from points in countries other than Canada and the United States). Since aircraft movements are reported on the basis of place "arrived from" or "departed to", an arrival at Halifax airport from London, England would appear under "other international". If the same aircraft moved on to Toronto, both the departure at Halifax and the arrival at Toronto would be shown as "domestic".

## **Itinerant movements**

At airports with control towers and/or flight service stations: for the purpose of completing air traffic records, itinerant movements are considered as movements in which aircraft proceed to or arrive from another location; or where aircraft leave the circuit but return without landing at another airport. At airports without control towers: an aircraft movement in which the aircraft arrives from or departs to a point other than the reporting airport; or a movement by an aircraft that leaves the close proximity of an airport and returns without landing at another airport.

## **Local movements**

At airports with control towers and/or flight service stations: for the purpose of completing air traffic records, local movements are considered as movements in which the aircraft remains in the circuit. At airports without control towers: an aircraft movement in which the aircraft remains in the close proximity of the airport. Local movements are often carried out during training flights (touch-and-go), equipment tests, etc.

## **Maximum take-off weight**

The maximum weight for which the aircraft is licensed to operate. For operational purposes, all weights are rounded upwards to the next 1,000 kilograms. Thus 3,200 kilograms becomes 4,000 kilograms.

## **Other commercial**

Flights performed by Commercial aircraft operators not included in the Air carrier categories. Flying schools, agricultural sprayers, water-bombers, aerial photography and survey, etc.

## **Power plant**

The source of propulsion. For example, piston engines, turbo-propellers and jet engines. "Helicopters", in this report, include both piston and turboshaft-driven engines.

## **Private aircraft**

Aircraft used solely for private purposes, not for hire and compensation, which are classified as "Private" or "Private Restricted" in the Canadian civil aircraft register or similar registries of other countries. Owners include individuals, groups and business firms.

## **Runway 88**

Through control zone flights, i.e. flights which communicate with the tower while transiting the tower control zone to another destination without landing at the reporting airport.

Data for these runways are not included in the grand total.

## **Simulated approaches**

Movements that are either missed instrument or practice instrument approaches without landing.

## **TC**

Transport Canada.

## **Tower control zone**

A controlled airspace within the proximity of an air traffic control tower, usually within a radius of less than 24 kilometres of the tower.

## **V.F.R. flight**

A flight conducted in accordance with Visual Flight Rules.

## **Weight group**

The classification of weight classes in groups for statistical purposes.
