Aircraft Movement Statistics October 2004 (Preliminary)

Airports with NAV CANADA Air Traffic Control Towers

The data in this bulletin represent preliminary monthly statistics for airports with NAV CANADA air traffic control towers.

In October, the 42 Canadian airports with NAV CANADA air traffic control towers reported 364,493 take-offs and landings, a decrease of 5.3% compared to October 2003 (384,931). This decline represents the eighth consecutive decrease in year-over-year comparisons of monthly movements. Twenty-nine airports showed year-over-year decreases in aircraft movements for October 2004 compared to October 2003. Eleven airports showed decreases greater than 20% this month compared to five airports in September.

Itinerant movements (flights from one airport to another) decreased by 2.3% (down -6,097 movements) in October 2004 compared to October 2003, the second consecutive month of decline. Local movements (flights that remain in the vicinity of the airport) declined by 11.6% (down -14,341 movements) in October 2004, the eighth consecutive month of decline.

The top ten airports in terms of volumes of itinerant movements in October showed year-over-year variations ranging from 18.9% (1,427 movements) at Montréal/St Hubert to -11.6% (-1,309 movements) at Winnipeg Intl. Five of the top ten airports recorded increases in itinerant movements compared to six airports in September 2004.

The top ten airports in terms of local movements showed year-over-year variations ranging from 50.3 % (3,331 movements) at Boundary Bay to -31.1% (-1,831 movements) at Waterloo Regional. Four of the top ten airports recorded decreases in local movements compared to five airports in September 2004.

More detailed statistics for airports with NAV CANADA air traffic control towers and flight service stations will be released in the Aircraft Movement Statistics monthly report (TP141 - Volume 1). Statistics for airports without air traffic control towers will appear in TP 141 – Volume 2. Upon release, the TP141 reports are available (free) on-line at http://www.tc.gc.ca/pol/en/Report/tp141e/tp141.htm

For further information concerning this bulletin, please contact Aviation Statistics Centre, Statistics Canada (1-866-500-8400). Internet: aviationstatistics@statcan.ca

Data Source and Methodology

Aircraft Movement Statistics are accumulated from data originating with air traffic control tower units. Because staff in these units are highly trained in factual observation and actual reporting, the entries into the data base are of a very high quality. To maintain uniformity in the reporting of source data, the Aviation Statistics Centre (ASC) issues air traffic control units with an "Air Traffic Designators" handbook (TP-143) showing the official Transport Canada aircraft type designators and the designators of various domestic and international air carriers. Data errors caused during transcription and transmission on the NAV CANADA Aircraft Movement Statistics (NCAMS) network are identified as part of the built-in editing procedures. Furthermore, extensive editing cycles are part of the computer processing programs. All identified errors are manually corrected by ASC editing staff.

Collection

The records are completed daily, based on a twenty-four hour clock running from zero hour to 23:59. The times recorded are Greenwich Mean Time (GMT); however, published statistics are shown in local times. The records are transmitted electronically to the Aviation Statistics Centre (ASC). The Aviation Statistics Centre maintains a data bank of current information on all registered aircraft. The storage of this information allows for a reduction in the reporting burden of the survey respondents and limits the element of human error associated with the preparation of source documents. The data in the bank include registered aircraft identifications and their corresponding aircraft types, gross take-off weights, types of power plant (piston, jet or turboprop); whether the aircraft are fixed wing, helicopters or gliders. The data also provide a basis for identifying type of flights (commercial, private and government) and the geographical area in which the flights take place. The data bank also includes an Airport Environmental file against which the airport category is checked; the reported runway is validated and the time difference between GMT and local is allocated.

Symbols

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- E use with caution
- F too unreliable to be published

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136.
