Service bulletin

Monthly Railway Carloadings

October 2011

Highlights

- Total freight traffic carried by Canadian railways rose to 28.4 million tonnes in October 2011, up 10.1% from October 2010. The increase was bolstered by strong gains in cargo loadings from both sides of the border.
- From a domestic perspective, the rail industry's freight loadings rose 7.8% to 25.0 million tonnes in October compared with the same month in 2010.
- Non-intermodal cargo loadings rose to 22.6 million tonnes, up 8.7% from October 2010. The gain was the result
 of increases in more than half of the commodity classifications carried by railways. The commodity groups with
 the largest increases in tonnage were other cereal grains, lumber and colza seeds (canola).
- Intermodal freight loadings of containers and trailers loaded on flat cars remained relatively unchanged at 2.4 million tonnes in October compared with the same month the previous year.
- At an international level, traffic received from the United States rose to 3.4 million tonnes in October, a robust increase of 30.4% compared with October 2010. The gain was mainly driven by increased non-intermodal traffic.
- Geographically, 59.4% of the freight traffic originating in Canada was in the Western Division of Canada, with
 the remainder loaded in the Eastern Division. For statistical purposes, the Eastern and Western Divisions are
 separated by an imaginary line running from Thunder Bay to Armstrong, Ontario. Freight loaded at Thunder Bay
 is included in the Western Division while loadings at Armstrong are reported in the Eastern Division.

Non-metallic waste and scrap	7,882	377,419	6,096	280,446
Other manufactured and miscellaneous goods	2,295	87,801	1,938	72,596
Pool car traffic of freight forwarder and ship associated	126	1,720	677	27,650
Mixed loads or unidentified freight	83,255	1,215,437	77,378	1,146,255
Less than carload shipments	·	873		870
Total non-intermodal traffic loaded ²	2,580,507	207,700,246	2,445,274	196,558,955

Includes loadings of gypsum.
 Excludes goods transported in containers or trailers on flat cars.

Methodology and concepts

The **Railway Carloadings (Monthly)** publication presents essential data for timely analysis of the Rail Transport Industry and its contribution to the Canadian economy. Approximately 40 rail carriers report each month on their total intermodal 1 and non-intermodal2 traffic. For non-intermodal traffic, the carriers report the number of cars and tonnes by commodity of revenue-generating freight that they have loaded in Canada. For intermodal freight, the carriers report the number of units and tonnes for containers-on-flat-cars (C.O.F.C.) and trailers-on-flat-cars (T.O.F.C.), with no commodity detail. The carriers also report the total tonnage of revenue freight received from United States connections.

The total quantity of freight carried in Canada is the sum of the non-intermodal and intermodal freight loaded and the traffic received from U.S. connections. Additional information provided includes the number of units and tonnes of C.O.F.C. and T.O.F.C received from U.S. connections and the total tonnes of cargo that the carriers received from other Canadian connections. This freight that is exchanged among Canadian based carriers is counted only once in the total quantity of freight moved as it is counted only when loaded. For intermodal freight, twenty-foot equivalent units (TEUs) are derived from the dimensions of the freight-laden containers. Empty containers are not included in these statistics.

The data are collected via questionnaires and electronic reports that are filed with Statistics Canada eight working days after the reference month. These questionnaires are captured and edited and the data are then aggregated to produce tables for all of Canada and the Eastern and Western divisions of Canada.³ Tables show the data for the reference month and the year-to-date. These year-to-date figures include revisions of data from previous months.

Users of Railway Carloadings (Monthly) current and historical data should be aware of a break in the continuity of these data. Starting with the January 1999 reference period, the commodities presented in the Railway Carloadings (Monthly) publication were modified to conform to the Standard Classification of Transported Goods (SCTG) and the number of carriers surveyed more than doubled from the eighteen carriers surveyed prior to 1999.

The additional carriers were primarily shortline carriers whose data were previously included with the data of mainline carriers. The change in commodity classes has had negligible impact on the reporting of bulk commodities (e.g., wheat, potash and coal) which represent the majority of the total number of cars and tonnes. However, the reporting of manufactured and miscellaneous goods has changed significantly.

Details of the commodities included in each SCTG class presented in **Railway Carloadings (Monthly)** are available upon request. For further information, please contact Transportation Statistics, Statistics Canada, Ottawa, Ontario, K1A 0T6 (tel.: 1-866-500-8400, Internet: *TransportationStatistics@statcan.gc.ca*).

^{1.} Intermodal traffic is freight carried in containers or truck trailers that are loaded onto flat cars.

^{2.} Non-Intermodal traffic is freight carried in bulk or loaded in box cars.

^{3.} The Eastern and Western Divisions, for statistical purposes, are separated by an imaginary line running from Thunder Bay to Armstrong, Ontario. Freight loaded at Thunder Bay is included in the Western Division while loadings at Armstrong are reported in the Eastern Division.

Release date: December 2011

Symbols

The following standard symbols are used in Statistics Canada publications:

- not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- x suppressed to m
 E use with caution
- F too unreliable to be published
- * significantly different from reference category (p < 0.05)

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed standards of service that its employees observe.

To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under "About us" > "The agency" > "Providing services to Canadians."

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.
