How to obtain more information

For information about this product or the wide range of services and data available from Statistics Canada, visit our website at www.statcan.gc.ca, e-mail us at infostats@statcan.gc.ca, or telephone us, Monday to Friday from 8:30 a.m. to 4:30 p.m., at the following numbers:

Statistics Canada's National Contact Centre

Toll-free telephone (Canada and the United States):

Inquiries line	1-800-263-1136
National telecommunications device for the hearing impaired	1-800-363-7629
Fax line	1-877-287-4369

Local or international calls:

Inquiries line	1-613-951-8116
Fax line	1-613-951-0581

Depository Services Program

Inquiries line	1-800-635-7943
Fax line	1-800-565-7757

To access this product

This product, Catalogue no. 57-601-X, is available free in electronic format. To obtain a single issue, visit our website at www.statcan.gc.ca and browse by "Key resource" > "Publications."

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed *standards of service* that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on www.statcan.gc.ca under "About us" > "Providing services to Canadians."

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

User information

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

5.5-1	by type	88
5.5-2	by province — All products	89
5.6	Petroleum products — Refined petroleum products, exports	90
5.6-1	by type	90
5.6-2	by province — All products	91
5.7	Petroleum products — Refined petroleum products — Closing inventory	92
6.1	Natural gas — Supply and disposition, Canada	94
6.2	Natural gas — Domestic production, Canada	96
6.3	Natural gas — Gross production by province	98
6.4	Natural gas — Deliveries of marketable gas by province	100
6.5	Natural gas — Exports by pipeline to the United States	102
6.6	Natural gas — Gas utility, direct sales by province	104
6.7	Natural gas — Total utility sales by province	106
6.8	Natural gas — Gas utility sales	108
6.8-1	to residential customers	108
6.8-2	to commercial customers	110
6.8-3	to industrial customers	112
6.9	Natural gas — Marketable natural gas, remaining established reserves in Canada	114
7.1	Coal	116
7.1-1	Coal supply and disposition in Canada	116
7.1-2	Coal supply and disposition in Canada - concluded	117

Table of contents – continued

7.2	Coal — Production	117
7.2-1	by province	117
7.2-2	all types — Canada	118
7.3	Coal — Imports by province	118
7.4	Coal — Exports by province	119
7.5	Coal — Coal transformed	119
7.5-1	to other energy types	119
7.5-2	to electricity by electric utilities	120
7.5-3	to electricity by industry	120
7.6	Coal — Producer consumption	121
7.7	Coal — Non-energy use consumption	121
7.8	Coal — Energy use, final demand	122
7.8-1	by industry	122
7.8-2	by province	123
8.1	Electricity — Supply and disposition, Canada	125
8.2	Electricity — Utility generation in Canada	126
8.3	Electricity — Industry generation in Canada	127
8.4	Electricity — Generation by province	128
8.5	Electricity — Exports to the United States by province	131
8.6	Electricity — Imports from the United States by province	132
8.7	Electricity — Demand	133
8.7-1	by sector	133
8.7-2	by manufacturing industries	134
9.1	Prices — Regular unleaded gasoline, average retail price by city (taxes included)	136
9.1-1	at full service stations	136
9.1-2	at self service stations	138
9.2	Prices — Premium unleaded gasoline, average retail price by city (taxes included)	140
9.2-1	at full service stations	140
9.2-2	at self service stations	142

Table of contents – continued

9.3	Prices — Automotive diesel fuel, average retail price by city (taxes included)	144
9.3-1	at full service stations	144
9.3-2	at self service stations	146
9.4	Prices — Home heating oil, average retail price by city (taxes included)	148
9.5	Prices — Natural gas, unit price excluding taxes	150
9.5-1	Residential sales	150
9.5-2	Commercial sales	151
9.5-3	Industrial sales	152
9.5-4	Total sales	153

Section 1

Economic indicators

This section contains selected principle economic indicators for Canada and the provinces. Data includes gross domestic product in current and constant dollars and constant dollars for selected industry groupings

such as manufacturing, energy and transportation. Data is also available for other diverse indicators such as capital and repair expenditure, industry capacity utilisation rates, labour, population and currency exchange rates and new motor vehicle sales.

1. Excluding Nunavut.

Section 2

Total energy

This section contains data on the energy supply and demand in Canada by province in heat equivalents (terajoules) for primary and secondary energy forms such as coal, crude oil, natural gas and electricity.

Data includes production, exports, imports, producer consumption, non-energy use of primary energy, transformation from primary to secondary energy and total primary and secondary domestic energy demand by sector.

Table 2.1-1
Total energy — Primary energy, by energy type — Production

	Coal	Crude oil	Natural gas	Gas plant natural gas liquids (NGL's)	Primary electricity, hydro and nuclear	Steam	Total primary energy
	terajoules						
Annual

Section 3

Energy trade

This section contains data (value) of exports and imports of selected energy related commodities

including total Canada merchandise trade. Data is available for crude petroleum, coal, natural gas, coal and other crude bituminous substances and electricity.

Section 5

Petroleum products

This section contains data (volume) on the supply and demand of refined petroleum products in Canada including refinery inputs, production, imports and

exports, domestic sales and inventory levels by province and region. Data is available for motor gasoline, diesel fuel, light fuel oil, heavy fuel and other petroleum products.

Table 5.1

Section 6

Natural gas

This section contains data (volume) on the supply and disposition of natural gas in Canada, by province. Data includes gross production, deliveries of marketable

gas, imports, exports and direct sales. Data is also available for gas utility sales by province, utility sales to various classes of customers and marketable natural gas reserves in Canada.

Table 6.1

1. Excluding Nunavut.

Section 7

Coal

This section contains data (volume) on the supply and disposition of coal in Canada, by province. Data includes production, imports, exports, transformation

to other energy types such as electricity, manufactured gases and steam, producer consumption and non-energy and energy use.

Table 7.1-1

Section 8

Electricity

This section contains data on the supply and disposition of electricity in Canada, by province. Data includes primary and secondary production, imports, exports,

and producer consumption. Data is also available for utility and industry generation of electricity by type such as hydro, conventional steam and nuclear.

Table 8.1
Electricity — Supply and disposition, Canada

	Primary electricity production	Secondary electricity production	Electricity exports	Electricity imports	Supply	Availability	Producer consumption	Disposition

Section 9

Prices

This section contains retail prices (including taxes) for selected energy products including regular and premium unleaded motor gasoline, automotive diesel

fuel and home heating oil for selected cities in Canada. Price data (excluding taxes) is also available for natural gas residential, industrial and commercial sales for selected cities.

Table 9.1-1
Prices — Regular unleaded gasoline, average retail price by city (taxes included) at full service stations

Product description

This section provides general information about the purpose, formats, structure, content and data sources for the Energy Statistics Handbook.

Purpose

The purpose of the Handbook is to provide energy analysts, economists, environmentalists, researchers and the general public, a single source of consistent energy-related data. The Handbook is a compilation of data otherwise available in numerous Statistics Canada publications and several energy industry publications.

Publication formats

The Energy Statistics Handbook is available in three formats:

1. a dynamic Internet publication accessible through the Statistics Canada Website;
2. CD-ROM;
3. in print product available through a Print-on-Demand service.

The dynamic Internet publication and CD-ROM provides subscribers the option of viewing the publication in two formats:

- HTML (hypertext mark-up language);
- PDF (portable document format).

The Print-on-Demand product is a printed version of the PDF format.

Structure of the Handbook

The Energy Statistics Handbook is organised into 12 sections. Sections 1 through 9 contain 110 data tables presenting economic or energy-related statistical information. Information is also provided on data quality, concepts and methodology. Appendices include energy conversion factors, data sources, footnotes and definitions.

Data tables in Sections 1 through 9 are organised under the following section headings:

Section 1:	Economic indicators
Section 2:	Total energy
Section 3:	Energy trade
Section 4:	Crude oil and equivalent
Section 5:	Petroleum products
Section 6:	Natural gas
Section 7:	Coal
Section 8:	Electricity
Section 9:	Prices

Structure of data tables

Each data section in the Handbook contains a series of tables displaying economic or energy-related statistical data. Each table contains several columns of related energy data observations displayed in monthly, quarterly or annual time series formats.

Monthly tables display the current and previous year's data in rows by month, as well as 10 years or more of annual totals or averages.

Quarterly tables display the current and the previous year's quarterly data and 10 years or more of annual totals or averages. Most monthly and quarterly tables include a cumulative or average-to-date comparison of the current month or quarter with the same period for the previous year.

Several data series in the publication are only available as annual series. Tables containing annual series display up to 10 years of data.

Data sources

Data in the Energy Statistics Handbook has been extracted from Statistics Canada's CANSIM database. CANSIM, the Canadian Socio-Economic Information Management System, is a time series database containing business, economic and social data and is maintained by the Dissemination Division of Statistics Canada. CANSIM statistical data is generally produced by surveying Canadian businesses, but can also be compiled from government administrative records, or obtained from other departments and organizations. To obtain additional energy series or historical data not available in the Handbook, the CANSIM database can be accessed via Statistics Canada's Internet Website.

A unique identifier number identifies CANSIM time series. The CANSIM identifier number for each series included in a table is displayed at the bottom of the table. In most cases, the CANSIM series will go back further in time than the series shown in this publication.

Publication sources

Canadian energy data, and data in the Economic Indicators section of the Handbook is available in numerous Statistics Canada (STC) publications. In some instances the data used is not in a publication, but has been obtained from associated CANSIM data files. Source publications are listed in the Appendix B.

Data quality and methodology

For information on data quality, concepts and the methodologies used to collect data displayed in the Handbook, reference should be made to the source publications. Most printed Statistics Canada publications include a brief description of the data quality and methodologies used to produce statistical series. In addition standardized descriptive information for all Statistics Canada surveys and programs are contained in the departments Integrated Meta Database (IMDB). An IMDB document for each survey and/or survey program is accessible electronically through Statistics Canada's Internet Website via hyperlinks located in the Products and Services web page and CANSIM. Data quality information can also be obtained from the "Concepts, Definitions and Methods" web page.

Units of measurement

Canadian "volume" numbers are in metric units (i.e. cubic metres, tonnes, kilowatts etc.) Metric data is presented using a "character space" (e.g. 000 000.0) to separate thousands of units. Non-metric volume data in barrels and dollar values use comas (e.g. 000,000.0) to indicate thousands of units or dollars. Except for money market, prices

and financial statistics, data values are presented as whole numbers or have been rounded to a single decimal point. Because of rounding, totals may not add to that of the individual components.

Metric units of measure

Kilo	= 1 000 = 10 ³
Mega	= 1 000 000 = 10 ⁶
Giga	= 1 000 000 000 = 10 ⁹
Tera	= 1 000 000 000 000 = 10 ¹²
Peta	= 1 000 000 000 000 000 = 10 ¹⁵

Abbreviations

ATD – Average to date

BTU – British Thermal Unit

CANSIM – Canadian Socio-Economic Information Management System

C5 – Pentanes

GJ – Gigajoule

GW.h – Gigawatt hour

GDP – Gross Domestic Product

Handbook – Energy Statistics Handbook

IEA – International Energy Agency

KW.h – Kilowatt hour

KJ – Kilojoules

KPA – Kilopascals

LPG – Liquid petroleum gas

M3 – Cubic metre

MJ – Megajoule

MW.h – Megawatt hour

NAICS – North American Industry Classification System

NGL – Natural Gas Liquid

NWT – Northwest Territories

NRCan – Natural Resources Canada

OPEC – Organisation of Petroleum Exporting Countries

OECD – Organisation for Economic Co-operation and Development

PJ – Petajoule

RESO – Report on Energy Supply–Demand in Canada

RPP – Refined Petroleum Products

STC – Statistics Canada

TJ – Terajoule

U.S. – United States

U.S.S.R. – Union of Soviet Socialist Republics

Appendix A

Conversion factors

Energy unit equivalent

KJ	= kilojoule = 1 000 joules = 0.948 213 BTU's
MJ	= megajoule = 1 000 000 joules
GJ	= gigajoule = 1 000 000 000 joules
TJ	= terajoule = 1 000 000 000 000 joules
PJ	= petajoule = 1.0 x 10 ¹⁵ joules
1 BTU	= 1 054.615 joules
1 terajoule	= 161.48 barrels crude oil
1 barrel of crude oil	= 6.193 gigajoules
1 tonne oil equivalent (TOE)	= 41.9 GJ
1 tonne coal equivalent (TCE)	= 29.3 GJ

To convert BTU / Barrel of crude oil to TJ / m³ multiply (BTU / 1000)* 6.6367

Appendix C

Footnotes and definitions

Section 1: Economic indicators

Tables 1.1-1 to 1.3

Gross domestic product (GDP)

The unduplicated value of production originating within the boundaries of Canada, regardless of ownership of the factors of production. GDP can be valued either at factor cost or at market prices.

Seasonal adjustment

Seasonal, cyclical and irregular movements cause fluctuations in economic time series. A seasonally-adjusted series is one for which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a regular pattern each year, adjusting the data can eliminate their influence on trends.

Factor cost

Factor cost represents the costs of the factors of production. The valuation is expressed in terms of the expense of the producer, rather than of the purchaser. It includes all indirect taxes, such as sales and excise taxes, customs duties and property taxes.

Table 1.4

Capital expenditures

Capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery and equipment, whether for replacement of worn or obsolete assets, as additions to existing assets or for lease or rent to others. Capital expenditures are for energy industries classified in NAICS sectors 21, 22, 31-33, 41, 44, 45, 48, 49.

Table 1.5

Capacity utilisation

Capacity utilisation is calculated by taking the actual production level for an establishment (production can be measured in dollars or units) and dividing by the establishment's maximum production level under normal conditions.

Tables 1.6**Gross domestic product price indexes**

Gross domestic product price indexes measure the price change of broad categories of goods and services making up the Gross Domestic Product (GDP).

Table 1.7**Consumer price index (CPI)**

The Consumer Price Index (CPI) is a measure of the rate of price change for goods and services bought by Canadian consumers.

Section 2: Total energy**Tables 2.1-1 to 2.3-3, 2.4-2****Primary energy**

Primary energy is the summation of the various primary energy forms in terajoules; coal, crude oil, natural gas, gas plant NGL's, primary electricity and nuclear produced steam. The tables in this publication do not include alternative energy sources, although it is estimated that these sources account for more than 7% of Canada's energy requirements.

Total coal

Total coal includes Canadian bituminous, sub-bituminous, lignite, anthracite and imported bituminous coal. It should be noted that the heat content varies depending on the mine.

Crude oil

Crude oil includes pentanes plus, condensate, crude bitumen and synthetic crude as well as conventional crude.

Natural gas

Natural gas is equal to marketable production plus field flared and waste, field uses, gathering uses, plant uses and plus or minus adjustments as found in the Crude Petroleum and Natural Gas Production publication, Catalogue 26-006-X.

Gas plant NGL's (natural gas liquids)

Gas plant NGL's include propane, butane and ethane. Condensate produced by gas plants is included with crude oil. Disposition is for both refinery produced propane and butane and for gas plant NGL's.

Primary electricity

Primary electricity production is for hydro and nuclear generated electricity. The assumption is made that international and inter-provincial movements of electricity are from primary sources. As virtually all generation is supplied to a grid system, it is not possible to determine the dispositions of primary or secondary electricity. Disposition is for both primary and secondary electricity.

Steam

Steam sold includes only known steam sales of large producers and therefore excludes any steam produced for own consumption as process steam or space heating. Primary production is from nuclear produced steam only. In the natural units tables, secondary steam production differs from other energy forms in that it is shown as transformed from other fuels. Secondary steam generation can be the product of dedicated steam plants or the result of co-generation of electricity and steam. For the dedicated plants the amount of fuels used are known, whereas for co-generation plants, only an estimate of the fuels used for steam generation may be made.

Net supply

Net supply is the amount "available" after the amounts used in transformation processes are subtracted.

Producer consumption

Producer consumption is the consumption by the producing industry of its own produced fuel – for example refined petroleum products consumed by the refined petroleum product industry, or natural gas used in the field, flared and waste, field uses, gathering uses, plant uses and metering adjustments. It does not include consumption of energy forms produced by other energy supply industries – for example; it would exclude the use of natural gas by the petroleum refining industry. In the case of electricity, it includes transmission losses, adjustments, "unaccounted for" amounts which are subject to variation because of cyclical billing, etc., but excludes generating station use output as measured at the generating station gate.

Non-energy use

Non-energy use is the amounts used for purposes other than fuel purposes. They include products being used as petrochemical feedstock, anodes/cathodes, greases, lubricants, etc.

Table 2.4-1

Definitions for Domestic energy demand sectors

Total mining and oil and gas extraction

Total mining and oil and gas extraction comprises establishments primarily engaged in extracting naturally occurring minerals. Includes metal mines, non-metal mines, coal mines, crude petroleum and natural gas extraction industries, stone quarries gravel pits, exploration for minerals, development of mineral properties and contract drilling operations. NAICS code 21.

Pulp and paper

Pulp and paper includes establishments primarily engaged in manufacturing pulp, paper and paper products. NAICS code 322.

Total manufacturing

Total manufacturing is the summation of manufacturing industries.

Forestry

Forestry includes establishments primarily engaged in forestry and logging services. NAICS codes 113 and 1153.

Construction

Construction includes establishments primarily engaged in the construction of buildings, highways, dams, etc., and those providing services to the construction industry. Special trade contractors primarily engaged in construction work in such specialities as plumbing, carpentry, painting, etc. are included here. NAICS code 23. Sales of asphalt for paving purposes, regardless of the purchaser, are included here.

Transportation

Transportation in this sector only includes the use of fuel by the transportation industry for transportation purposes. Excluded are any fuels used for activities not directly involved in transportation (i.e. Train stations, warehouses, airports, etc.). Fuels, which have been purchased for use by the agriculture, commercial and public institutions sectors for transportation purposes, are included in the sectors to which the fuel was sold.

Agriculture

Agriculture establishments are those primarily engaged in agricultural, hunting and trapping activities. NAICS codes 111, 112, 1142, 1151 and 1152. Excluded are any operations primarily engaged in food processing, farm machinery manufacture and repair.

Residential

Residential includes all personal residences including single family residences, apartments, apartment hotels, condominiums and farm homes.

Public administration

Public administration establishments include federal, provincial and municipal governments primarily engaged in activities associated with public administration. Includes such establishments as the Federal Public Service, National Defence, and RCMP and provincial and local administrations. NAICS code 91.

Commercial and other institutional

Commercial and other institutional includes service industries related to mining, transportation, as well as storage and warehousing, communications and utility (excluding electricity and natural gas), wholesale and retail trade, finance and insurance, real estate and business service, education, health and social services and other service industries.

Energy use, final demand

Energy use, final demand is the summation of the various primary and secondary energy demands in terajoules. Secondary energy sources include coke, coke oven gases, petroleum products and secondary electricity.

Section 3: Energy trade

Tables 3.1 to 3.2

Exports

Statistics Canada from the B13 forms and Summary reports captures data for Canadian exports to countries other than United States. There are approximately 29,000 forms and 250 to 350 Summary reports completed every month.

Imports

The Canada Border Services Agency capture data for all imports from the B3 form. There are approximately 450,000 forms completed every month, which account for approximately 1.5 million import transactions.

Section 4: Crude oil and equivalent

Tables 4.1 to 4.6-2

Crude oil

A mixture mainly of pentanes and heavier hydrocarbons that may be contaminated with sulphur compounds, that is recovered or is recoverable at a well from an underground reservoir and that is liquid at the conditions under which its volume is measured or estimated. It includes all other hydrocarbon mixtures so recovered or recoverable except raw gas or condensate.

Synthetic crude oil

A mixture of mainly pentanes and heavier hydrocarbons that may contain sulphur compounds, that is derived from crude bitumen and that is liquid at the conditions under which its volume is measured or estimated, and includes all other hydrocarbon mixtures so derived.

Crude bitumen

A naturally occurring viscous mixture, mainly of hydrocarbons heavier than pentane, that may contain sulphur compounds and that, in its naturally occurring viscous state, will not flow to a well.

Condensate

A mixture of mainly pentanes and heavier hydrocarbons that may be contaminated with sulphur compounds, that is recoverable at a well from an underground reservoir and that is gaseous in its virgin reservoir state but is liquid at the conditions under which its volume is measured or estimated.

Pentanes plus

A mixture of mainly pentanes and heavier hydrocarbons which ordinarily may contain some butanes and which is obtained from the processing of raw gas, condensate or crude oil.

Tables 4.7-1 to 4.7-4

Propane, and propane mixes

A normally gaseous paraffinic compound extracted from refinery gases.

Butane and butane mixes

A normally gaseous paraffinic hydrocarbon extracted from refinery gasses.

Tables 4.8-1 to 4.8-6**Petroleum**

In this table petroleum is the aggregate total of all hydrocarbon reserve mixtures including crude oil, pentanes plus, crude bitumen, synthetic crude oil and liquefied petroleum gases, all of which are liquid under the conditions which their volumes are measured or estimated.

Crude oil and equivalents

In this table crude oil and equivalents is comprised of conventional crude oil and other similar hydrocarbon mixtures including pentanes plus and synthetic crude oil.

Conventional crude oil

Conventional crude oil is a liquid mixture of pentanes and heavier hydrocarbons, recovered from an underground reservoir through a well using standard production methods.

Pentanes plus

Pentanes plus is a mixture of mainly pentanes and heavier hydrocarbon which may contain some butanes and which is obtained from the processing of raw gas, condensate or crude oil, or from marketable gas processed in a downstream reprocessing plant.

Non-conventional crude oil

Non-conventional crude oil includes crude bitumen recovered by in-situ methods, and synthetic crude oil derived from crude bitumen extracted by in-situ or oil sands mining techniques.

Synthetic crude oil

Synthetic crude oil is a mixture of mainly pentanes and heavier hydrocarbons, that is derived from crude bitumen and is liquid under the conditions which it's volume is measured or estimated.

Crude bitumen

Crude bitumen is a naturally occurring viscous mixture, composed mainly of hydrocarbons heavier than pentane, and in its naturally occurring viscous state will not flow to a well, therefore requiring " non-conventional " recovery methods.

Natural gas liquids

Natural gas liquids are those hydrocarbon components in natural gas recovered from raw natural gas as liquids by processing through extraction plants or recovered from field separators or other gathering facilities. These liquids include propane, butanes, ethane and pentanes plus.

Beginning in 1979 mixtures comprising the "natural gas liquids" series were re-allocated; the propane, butanes and ethane mixtures were included in the "liquid petroleum gas" series, and the pentanes plus in it's own series.

Liquid petroleum gases

Liquid petroleum gases consist primarily of the hydrocarbon components of propane, butanes and ethane recovered from raw natural gas as liquids, and liquids produced in refineries in the course of processing crude petroleum or its derivatives.

Marketable natural gas

Receipt of gas from fields, processing or reprocessing plants after re-injection, field uses, processing plant or re-processing plant shrinkage, plant use and losses have been deducted.

Section 5: Petroleum products**Tables 5.1 to 5.7****Production**

Measured at a net yield level, i.e. after exchanges between refinery processes.

Domestic sales

Sales by reporting companies exclusive of exports and sales to other reporting companies, and adjusted for exports and imports by non-reporting companies.

Motor gasoline

All gasoline type fuels for internal combustion engines other than aircraft.

Aviation turbo fuel (kerosene type)

All kerosene type fuels for turbo-jet or straight type jet aircraft engines.

Aviation turbo fuel (naphtha type)

All naphtha type fuels for turbo-jet or straight jet or straight jet aircraft engines.

Kerosene, stove oil

Includes mineral lamp oil, no.1 fuel oil, and stove oil (including all vaporising burning oil). Are used in space heaters, cook stoves and is suitable for use as an illuminate when burned in wick lamps.

Diesel fuel oil

All grades of distillate fuel sold for diesel engine use including low sulphur content (with sulphur content lower than 0.05%).

Light fuel Oil (nos. 2 and 3)

Includes all distillate type fuels for power burners, fuel oil no. 2 (heating oil no. 2), fuel oil no.3 (heating oil no. 3), furnace fuel oil, gas oils and light industrial fuel.

Heavy fuel oil (nos. 4, 5 and 6)

All grades of residual type fuels including low sulphur (with sulphur content lower than 1%) for both steam and diesel engines. Bunker B and Bunker C, fuel oils no. 4, 5 and 6, and residual fuel oil.

Section 6: Natural gas**Tables 6.1 to 6.9****Total marketable gas**

Receipt of gas from fields, processing or reprocessing plants after re-injection, field uses, processing plant or reprocessing plant shrinkage, plant use losses have been deducted.

Imports

Receipts of gas, by pipeline, into Canada from United States.

Exports

Export of gas, by pipeline, to the United States.

Direct sales

Represents direct, non-utility delivery for consumption.

Natural gas liquids**Propane**

In addition to its normal scientific meaning, a mixture mainly of propane which ordinarily may contain some ethane or butanes.

Butanes

In addition to its normal scientific meaning, a mixture mainly of butanes which ordinarily may contain some propane or pentanes plus.

Ethane

In addition to its normal scientific meaning, a mixture mainly of ethane which ordinarily may contain some methane or propane.

Residential sales

Gas sold usually for domestic purposes (for example, heating space, water, cooking, etc.).

Commercial sales

Gas sold to customers engaged in wholesale or retail trade, governments, institutions, office buildings, etc.

Industrial sales

Gas sold to customers engaged in a process that creates or changes raw or unfinished materials into another form or product. Includes firm, interruptible and buy/sell agreements.

Direct sales

Represents direct, non-utility, sales for consumption, where the utility acts solely as the transporter.

Section 7: Coal**Tables 7.1 to 7.8-2**

Includes Canadian bituminous, sub-bituminous, lignite, anthracite and imported bituminous coal. It should be noted that the heat content varies depending on the mine.

Bituminous

A dense, black coal, often with well-defined bands of bright and dull material with a moisture content usually less than 20%. Used primarily for generating electricity, making coke and space heating.

Sub-bituminous

A black coal used primarily for thermal generation with a moisture content between 15% and 30%.

Lignite

A brownish-black coal of low rank containing 30% to 40% moisture and volatile matter. Used almost exclusively for electric power generation.

Coal imports

Reported by industrial consumers including coke plants, and electric power producers.

Coal exports

Shipments of coal from a port to a customer reported on a "freight-on-board" basis by the seller. It may differ from trade data which is based on customs information.

Producer consumption

Producer consumption is the consumption by the producing industry of its own produced fuel.

Section 8: Electricity**Table 8. 1****Primary electricity**

Production is for hydro and nuclear generated electricity.

Secondary electricity

The amount of electricity generated from thermal generation. The main fuels used are coal, natural gas, coke, coke oven gas, refined petroleum products, wood waste and spent pulping liquor and may include some fuel used for co-generation, for which adequate data is not available to enable the split of the fuels. Disposition data is shown under primary electricity. Exports, imports and producers' consumption (which includes line losses) is included under primary electricity.

Tables 8.2 to 8.7-2

Utility generation

A utility is an organisation that, as its prime purpose, generates, transmits and / or distributes electric energy for resale. It can be private or public (provincial or municipal). Electricity can be made from hydro (including tidal and wind), steam (conventional and nuclear), internal combustion and combustion turbine sources.

Industrial generation

Generation from establishments that are not part of the electric power generation, transmission and distribution industry (North American Industry Classification System (NAICS): 2211).

Hydro generation

Electric power generated from a plant in which the turbine generators are driven by falling water.

Steam generation

A plant in which the prime mover is a steam turbine. The steam used to drive the turbine is produced in a boiler where fossil fuels are burned.

Nuclear generation

Nuclear power is electricity generated at an electric power plant whose turbines are driven by steam generation in a reactor by heat from the fission of nuclear fuel.

Internal combustion generation

A power plant in which the prime mover is an internal combustion engine. The rapid burning of a fuel-air mixture into mechanical energy generates electric power.

Combustion turbine generation

Generation from the conversion of heat energy as a gas into mechanical energy.

Electricity exports

Electric energy (firm, non-firm and other) transferred to the United States, which is measured at the metering points on the lines crossing the frontiers.

Electricity imports

Electric energy received from the United States, which is measured at the metering points on the transmission lines crossing the borders.

Section 9: Prices

Tables 9.5-1 to 9.5-4

Unit price

The sales unit price is calculated by dividing sales revenue by sales volume.

Residential sales

Gas sold usually for domestic purposes (for example, heating space, water, cooking, etc.).

Commercial sales

Gas sold to customers engaged in wholesale or retail trade, governments, institutions, office buildings, etc.

Industrial sales

Gas sold to customers engaged in a process that creates or changes raw or unfinished materials into another form or product. Includes firm, interruptible and buy/sell agreements.

Direct sales

Represents direct, non-utility, sales for consumption, where the utility acts solely as the transporter.
