## How to obtain more information

For information about this product or the wide range of services and data available from Statistics Canada, visit our website at [www.statcan.gc.ca](http://www.statcan.gc.ca), e-mail us at [infostats@statcan.gc.ca](mailto:infostats@statcan.gc.ca), or telephone us, Monday to Friday from 8:30 a.m. to 4:30 p.m., at the following numbers:

### Statistics Canada's National Contact Centre

Toll-free telephone (Canada and the United States):

Inquiries line	1-800-263-1136
National telecommunications device for the hearing impaired	1-800-363-7629
Fax line	1-877-287-4369

Local or international calls:

Inquiries line	1-613-951-8116
Fax line	1-613-951-0581

### Depository Services Program

Inquiries line	1-800-635-7943
Fax line	1-800-565-7757

## To access this product

This product, Catalogue no. 57-601-X, is available free in electronic format. To obtain a single issue, visit our website at [www.statcan.gc.ca](http://www.statcan.gc.ca) and browse by "Key resource" > "Publications."

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, Statistics Canada has developed *standards of service* that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published on [www.statcan.gc.ca](http://www.statcan.gc.ca) under "About us" > "The agency" > "Providing services to Canadians."

**Note of appreciation**

*Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published
- \* significantly different from reference category ( $p < 0.05$ )

1.1 Economics indicators — GDP by expenditure, seasonally adjusted at annual rates	10
1.1-1 in current dollars	10
1.1-2 in 2002 dollars	11

## Table of contents – continued

1.2	Economic indicators — GDP in 2002 constant prices (seasonally adjusted)	12
1.2-1	by selected industries (NAICS)	12
1.2-2	by selected manufacturing industries (NAICS)	14
1.2-3	by selected energy industries (NAICS)	15
1.2-4	by selected transportation industries (NAICS)	16
1.3	Economic indicators — GDP by income at market prices and by provinces and territories	17
1.4	Economic indicators — Capital expenditures in energy industries, in current dollars	18
1.5	Economic indicators — Industrial capacity utilization rates, by NAICS	19
1.6	Economic indicators — GDP at market prices	20
1.7	Economic indicators — Consumer price indexes	21
1.8	Economic indicators — Consumer price indexes, energy	22
1.9	Economic indicators — Money market and financial statistics	23
1.10	Economic indicators — Foreign exchange rates for selected countries	24
1.11	Economic indicators — Labour force survey estimates (LFS), both sexes, 15 years and over, seasonally adjusted	25
1.12	Economic indicators — New motor vehicle sales, Canada, by type of vehicle	26
1.13	Economic indicators — Building permits, values by activity sector, Canada, seasonally adjusted at monthly rate	27
1.14	Economic indicators — Population of Canada, provinces and territories, annual	28
2.1	Total energy — Primary energy, by energy type	30
2.1-1	Production	30
2.1-2	Exports	30
2.1-3	Imports	31
2.1-4	Availability	31
2.1-5	Net supply	32
2.2	Total energy — Transformation of primary energy to secondary energy	33
2.3	Total energy — Primary and secondary energy, by energy type, in terajoules	34
2.3-1	Producer consumption	34
2.3-2	Non-energy use	34
2.3-3	Final demand	35
2.4	Total energy — Total primary and secondary energy	36
2.4-1	Domestic demand by sector	36
2.4-2	Use by province, (excluding solid wood waste and spent pulping liquor)	37
3.1	Energy trade — Value of selected Canadian energy exports to all countries	39
3.2	Energy trade — Value of selected Canadian energy imports from all countries	40

**Table of contents – continued**

4.1	Crude oil and equivalent — Supply and disposition, Canada	42
4.2	Crude oil and equivalent — Production	44
4.2-1	by province	44
4.2-2	Domestic, by type	45
4.2-3	by province and type	46
4.3	Crude oil and equivalent — Deliveries to provincial refineries	50
4.4	Crude oil and equivalent — Charged to refineries by type	51
4.5	Crude oil and equivalent — Imports	52
4.5-1	to Canadian refineries	52
4.5-2	by country of origin	53
4.6	Crude oil and equivalent — Exports	55
4.6-1	by province	55
4.6-2	by destination	56
4.7	Crude oil and equivalent — Supply and demand	57
4.7-1	Natural gas liquids and liquefied petroleum gases	57
4.7-2	Ethane	58
4.7-3	Propane	59
4.7-4	Butane	60
5.1	Petroleum products — Refined petroleum products, supply and disposition — All products	62
5.2	Petroleum products — Refined petroleum products, refinery production by type	64
5.3	Petroleum products — Refined petroleum products, domestic sales by type	65
5.4	Petroleum products — Refined petroleum products, domestic sales by province	66
5.4-1	All products	66
5.4-2	Motor gasoline	68
5.4-3	Aviation turbo fuel	70
5.4-4	Diesel fuel oil	72
5.4-5	Light fuel oil	74
5.4-6	Stove and kerosene	76
5.4-7	Heavy fuel oil	78
5.5	Petroleum products — Refined petroleum products, imports	80
5.5-1	by type	80
5.5-2	by province — All products	81

## Table of contents – continued

5.6	Petroleum products — Refined petroleum products, exports	82
5.6-1	by type	82
5.6-2	by province — All products	83
5.7	Petroleum products — Refined petroleum products — Closing inventory	84
6.1	Natural gas — Supply and disposition, Canada	86
6.2	Natural gas — Domestic production, Canada	88
6.3	Natural gas — Gross production by province	90
6.4	Natural gas — Deliveries of marketable gas by province	92
6.5	Natural gas — Exports by pipeline to the United States	94
6.6	Natural gas — Gas utility, direct sales by province	96
6.7	Natural gas — Total utility sales by province	98
6.8	Natural gas — Gas utility sales	100
6.8-1	to residential customers	100
6.8-2	to commercial customers	102
6.8-3	to industrial customers	104
7.1	Coal	107
7.1-1	Coal supply and disposition in Canada	107
7.1-2	Coal supply and disposition in Canada - concluded	107
7.2	Coal — Production	108
7.2-1	by province	108
7.2-2	all types — Canada	108
7.3	Coal — Imports by province	109
7.4	Coal — Exports by province	109
7.5	Coal — Coal transformed	110
7.5-1	to other energy types	110
7.5-2	to electricity by electric utilities	110
7.5-3	to electricity by industry	111
7.6	Coal — Producer consumption	111
7.7	Coal — Non-energy use consumption	112
7.8	Coal — Energy use, final demand	112
7.8-1	by industry	112
7.8-2	by province	113

**Table of contents – continued**

8.1	Electricity — Supply and disposition, Canada	115
8.2	Electricity — Utility generation in Canada	116
8.3	Electricity — Industry generation in Canada	117
8.4	Electricity — Generation by province	118
8.5	Electricity — Exports to the United States by province	121
8.6	Electricity — Imports from the United States by province	122
8.7	Electricity — Demand	123
8.7-1	by sector	123
8.7-2	by manufacturing industries	124
9.1	Prices — Regular unleaded gasoline, average retail price by city (taxes included)	126
9.1-1	at full service stations	126
9.1-2	at self service stations	128
9.2	Prices — Premium unleaded gasoline, average retail price by city (taxes included)	130
9.2-1	at full service stations	130
9.2-2	at self service stations	132
9.3	Prices — Automotive diesel fuel, average retail price by city (taxes included)	134
9.3-1	at full service stations	134
9.3-2	at self service stations	136
9.4	Prices — Home heating oil, average retail price by city (taxes included)	138
9.5	Prices — Natural gas, unit price excluding taxes	140
9.5-1	Residential sales	140
9.5-2	Commercial sales	141
9.5-3	Industrial sales	142
9.5-4	Total sales	143

# Section 1

## *Economic indicators*

This section contains selected principle economic indicators for Canada and the provinces. Data includes gross domestic product in current and constant dollars and constant dollars for selected industry groupings

such as manufacturing, energy and transportation. Data is also available for other diverse indicators such as capital and repair expenditure, industry capacity utilisation rates, labour, population and currency exchange rates and new motor vehicle sales.

**Table 1.1-1**  
**Economics indicators — GDP by expenditure, seasonally adjusted at annual rates in current dollars**

	Gross domestic product (GDP) at market prices	Personal expenditure on consumer goods and services	Government current expenditure on goods and services	Government gross fixed capital formation	Business gross fixed capital formation			
					Business gross fixed capital formation	Residential structures	Non-residential structures	Machinery and equipment
millions of dollars

1. Excluding Nunavut.

## Section 2

### *Total energy*

This section contains data on the energy supply and demand in Canada by province in heat equivalents (terajoules) for primary and secondary energy forms such as coal, crude oil, natural gas and electricity.

Data includes production, exports, imports, producer consumption, non-energy use of primary energy, transformation from primary to secondary energy and total primary and secondary domestic energy demand by sector.

**Table 2.1-1**  
**Total energy — Primary energy, by energy type — Production**

	Coal	Crude oil	Natural gas	Gas plant natural gas liquids (NGL's)	Primary electricity, hydro and nuclear	Steam	Total primary energy

## Section 3

### *Energy trade*

This section contains data (value) of exports and imports of selected energy related commodities

including total Canada merchandise trade. Data is available for crude petroleum, coal, natural gas, coal and other crude bituminous substances and electricity.

**Table 3.1**  
**Energy trade — Value of selected Canadian energy exports to all countries**

# Section 4

## *Crude oil and equivalent*

This section contains data (volume) on the supply and disposition of crude oil and equivalent in Canada by province. Data includes production by type (heavy,

light, synthetic and bitumen), imports by country, refinery receipts, exports by destination, and inventory levels.

**Table 4.1**

# Section 5

## *Petroleum products*

This section contains data (volume) on the supply and demand of refined petroleum products in Canada including refinery inputs, production, imports and

exports, domestic sales and inventory levels by province and region. Data is available for motor gasoline, diesel fuel, light fuel oil, heavy fuel and other petroleum products.

**Table 5.1**

## Section 6

### *Natural gas*

This section contains data (volume) on the supply and disposition of natural gas in Canada, by province. Data includes gross production, deliveries of marketable gas,

imports, exports and direct sales. Data is also available for gas utility sales by province, utility sales to various classes of customers.

**Table 6.1**  
**Natural gas — Supply and disposition, Canada**

1. Prior to April 1, 1999 Northwest Territories includes the area now known as Nunavut. After April 1, 1999, Northwest Territories excludes the area now known as Nunavut.

# Section 7

## *Coal*

This section contains data (volume) on the supply and disposition of coal in Canada, by province. Data includes production, imports, exports, transformation

to other energy types such as electricity, manufactured gases and steam, producer consumption and non-energy and energy use.

**Table 7.1-1**

## Section 8

### *Electricity*

This section contains data on the supply and disposition of electricity in Canada, by province. Data includes primary and secondary production, imports, exports,

and producer consumption. Data is also available for utility and industry generation of electricity by type such as hydro, conventional steam and nuclear.

**Table 8.1**

# Product description

This section provides general information about the purpose, formats, structure, content and data sources for the Energy Statistics Handbook.

## Purpose

The purpose of the Handbook is to provide energy analysts, economists, environmentalists, researchers and the general public, a single source of consistent energy-related data. The Handbook is a compilation of data otherwise available in numerous Statistics Canada publications and several energy industry publications.

## Publication formats

The Energy Statistics Handbook is available in three formats:

1. a dynamic Internet publication accessible through the Statistics Canada Website;
2. CD-ROM;
3. in print product available through a Print-on-Demand service.

The dynamic Internet publication and CD-ROM provides subscribers the option of viewing the publication in two formats:

- HTML (hypertext mark-up language);
- PDF (portable document format).

The Print-on-Demand product is a printed version of the PDF format.

## Structure of the Handbook

The Energy Statistics Handbook is organised into 12 sections. Sections 1 through 9 contain 110 data tables presenting economic or energy-related statistical information. Information is also provided on data quality, concepts and methodology. Appendices include energy conversion factors, data sources, footnotes and definitions.

Data tables in Sections 1 through 9 are organised under the following section headings:

Section 1:	Economic indicators
Section 2:	Total energy
Section 3:	Energy trade
Section 4:	Crude oil and equivalent
Section 5:	Petroleum products
Section 6:	Natural gas
Section 7:	Coal
Section 8:	Electricity
Section 9:	Prices

## Structure of data tables

Each data section in the Handbook contains a series of tables displaying economic or energy-related statistical data. Each table contains several columns of related energy data observations displayed in monthly, quarterly or annual time series formats.

Monthly tables display the current and previous year's data in rows by month, as well as 10 years or more of annual totals or averages.

Quarterly tables display the current and the previous year's quarterly data and 10 years or more of annual totals or averages. Most monthly and quarterly tables include a cumulative or average-to-date comparison of the current month or quarter with the same period for the previous year.

Several data series in the publication are only available as annual series. Tables containing annual series display up to 10 years of data.

## Data sources

Data in the Energy Statistics Handbook has been extracted from Statistics Canada's CANSIM database. CANSIM, the Canadian Socio-Economic Information Management System, is a time series database containing business, economic and social data and is maintained by the Dissemination Division of Statistics Canada. CANSIM statistical data is generally produced by surveying Canadian businesses, but can also be compiled from government administrative records, or obtained from other departments and organizations. To obtain additional energy series or historical data not available in the Handbook, the CANSIM database can be accessed via Statistics Canada's Internet Website.

A unique identifier number identifies CANSIM time series. The CANSIM identifier number for each series included in a table is displayed at the bottom of the table. In most cases, the CANSIM series will go back further in time than the series shown in this publication.

## Publication sources

Canadian energy data, and data in the Economic Indicators section of the Handbook is available in numerous Statistics Canada (STC) publications. In some instances the data used is not in a publication, but has been obtained from associated CANSIM data files. Source publications are listed in the Appendix B.

## Data quality and methodology

For information on data quality, concepts and the methodologies used to collect data displayed in the Handbook, reference should be made to the source publications. Most printed Statistics Canada publications include a brief description of the data quality and methodologies used to produce statistical series. In addition standardized descriptive information for all Statistics Canada surveys and programs are contained in the departments Integrated Meta Database (IMDB). An IMDB document for each survey and/or survey program is accessible electronically through Statistics Canada's Internet Website via hyperlinks located in the Products and Services web page and CANSIM. Data quality information can also be obtained from the "Concepts, Definitions and Methods" web page.

## Units of measurement

Canadian "volume" numbers are in metric units (i.e. cubic metres, tonnes, kilowatts etc.) Metric data is presented using a "character space" (e.g. 000 000.0) to separate thousands of units. Non-metric volume data in barrels and dollar values use comas (e.g. 000,000.0) to indicate thousands of units or dollars. Except for money market, prices and financial statistics, data values are presented as whole numbers or have been rounded to a single decimal point. Because of rounding, totals may not add to that of the individual components.

## Metric units of measure

Kilo	= 1 000 = 10 <sup>3</sup>
Mega	= 1 000 000 = 10 <sup>6</sup>
Giga	= 1 000 000 000 = 10 <sup>9</sup>
Tera	= 1 000 000 000 000 = 10 <sup>12</sup>
Peta	= 1 000 000 000 000 000 = 10 <sup>15</sup>

# Abbreviations

ATD – Average to date

BTU – British Thermal Unit

CANSIM – Canadian Socio-Economic Information Management System

C5 – Pentanes

GJ – Gigajoule

GW.h – Gigawatt hour

GDP – Gross Domestic Product

Handbook – Energy Statistics Handbook

IEA – International Energy Agency

KW.h – Kilowatt hour

KJ – Kilojoules

KPA – Kilopascals

LPG – Liquid petroleum gas

M3 – Cubic metre

MJ – Megajoule

MW.h – Megawatt hour

NAICS – North American Industry Classification System

NGL – Natural Gas Liquid

NWT – Northwest Territories

NRCan – Natural Resources Canada

OPEC – Organisation of Petroleum Exporting Countries

OECD – Organisation for Economic Co-operation and Development

PJ – Petajoule

RESO – Report on Energy Supply–Demand in Canada

RPP – Refined Petroleum Products

STC – Statistics Canada

TJ – Terajoule

U.S. – United States

U.S.S.R. – Union of Soviet Socialist Republics

# Appendix A

## Conversion factors

### Energy unit equivalent

KJ	= kilojoule = 1,000 joules = 0.948213 BTU's
MJ	= megajoule = 1,000,000 joules
GJ	= gigajoule = 1,000,000,000 joules
TJ	= terajoule = 1,000,000,000 000 joules
PJ	= petajoule = 1.0 x 1,015 joules = 948,213,000,000 joules
1 BTU	= 1,054.615 joules
1 terajoule	= 161.48 barrels crude oil
1 barrel of crude oil	= 6.193 gigajoules
1 tonne oil equivalent (TOE)	= 41.9 GJ
1 tonne coal equivalent (TCE)	= 29.3 GJ

To convert BTU / Barrel of crude oil to TJ / m<sup>3</sup> multiply (BTU / 1000)\* 6.6367

### Petroleum product weights

Approximate weights of one cubic metre of petroleum product.

Still Gas	468.7 kg
LPG's	507.5 kg
Aviation gasoline	704.4 kg
Motor gasoline	745.2 kg
Aviation turbo fuel	807.4 kg
Kerosene	807.4 kg
Diesel	839.5 kg
Light fuel oil	839.5 kg
Lubricant oils and greases	938.9 kg
Heavy fuel oil	992.8 kg
Asphalt	999.7 kg
Petroleum coke	1,199.3 kg

## IEA Conversion Factors

International Energy Agency (IEA) conversion factors for converting one metric tonne of oil product to one ton (ton of oil equivalent).

### Oil and oil products

Crude oil	1.022
NGL	1.080
Refinery feed stocks	1.015
Refinery gas	1.150
LPG's	1.130
Aviation gasoline	1.070
Motor gasoline	1.070
Jet fuel	1.065
Kerosene	1.045
Naphtha	1.075
Gas/Diesel	1.035
Other products including heavy fuel oil	0.960

## Footnotes and definitions

### Section 1: Economic indicators

#### Tables 1.1-1 to 1.3

##### Gross domestic product (GDP)

The unduplicated value of production originating within the boundaries of Canada, regardless of ownership of the factors of production. GDP can be valued either at factor cost or at market prices.

##### Seasonal adjustment

Seasonal, cyclical and irregular movements cause fluctuations in economic time series. A seasonally-adjusted series is one for which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a regular pattern each year, adjusting the data can eliminate their influence on trends.

##### Factor cost

Factor cost represents the costs of the factors of production. The valuation is expressed in terms of the expense of the producer, rather than of the purchaser. It includes all indirect taxes, such as sales and excise taxes, customs duties and property taxes.

#### Table 1.4

##### Capital expenditures

Capital expenditures include the cost of procuring, constructing and installing new durable plant and machinery and equipment, whether for replacement of worn or obsolete assets, as additions to existing assets or for lease or rent to others. Capital expenditures are for energy industries classified in NAICS sectors 21, 22, 31-33, 41, 44, 45, 48, 49.

#### Table 1.5

##### Capacity utilisation

Capacity utilisation is calculated by taking the actual production level for an establishment (production can be measured in dollars or units) and dividing by the establishment's maximum production level under normal conditions.

**Tables 1.6****Gross domestic product price indexes**

Gross domestic product price indexes measure the price change of broad categories of goods and services making up the Gross Domestic Product (GDP).

**Table 1.7****Consumer price index (CPI)**

The Consumer Price Index (CPI) is a measure of the rate of price change for goods and services bought by Canadian consumers.

**Section 2: Total energy****Tables 2.1-1 to 2.3-3, 2.4-2****Primary energy**

Primary energy is the summation of the various primary energy forms in terajoules; coal, crude oil, natural gas, gas plant NGL's, primary electricity and nuclear produced steam. The tables in this publication do not include alternative energy sources, although it is estimated that these sources account for more than 7% of Canada's energy requirements.

**Total coal**

Total coal includes Canadian bituminous, sub-bituminous, lignite, anthracite and imported bituminous coal. It should be noted that the heat content varies depending on the mine.

**Crude oil**

Crude oil includes pentanes plus, condensate, crude bitumen and synthetic crude as well as conventional crude.

**Natural gas**

Natural gas is equal to marketable production plus field flared and waste, field uses, gathering uses, plant uses and plus or minus adjustments as found in the Crude Petroleum and Natural Gas Production publication, Catalogue 26-006-X.

**Gas plant NGL's (natural gas liquids)**

Gas plant NGL's include propane, butane and ethane. Condensate produced by gas plants is included with crude oil. Disposition is for both refinery produced propane and butane and for gas plant NGL's.

**Primary electricity**

Primary electricity production is for hydro and nuclear generated electricity. The assumption is made that international and inter-provincial movements of electricity are from primary sources. As virtually all generation is supplied to a grid system, it is not possible to determine the dispositions of primary or secondary electricity. Disposition is for both primary and secondary electricity.

## Steam

Steam sold includes only known steam sales of large producers and therefore excludes any steam produced for own consumption as process steam or space heating. Primary production is from nuclear produced steam only. In the natural units tables, secondary steam production differs from other energy forms in that it is shown as transformed from other fuels. Secondary steam generation can be the product of dedicated steam plants or the result of co-generation of electricity and steam. For the dedicated plants the amount of fuels used are known, whereas for co-generation plants, only an estimate of the fuels used for steam generation may be made.

## Net supply

Net supply is the amount "available" after the amounts used in transformation processes are subtracted.

## Producer consumption

Producer consumption is the consumption by the producing industry of its own produced fuel – for example refined petroleum products consumed by the refined petroleum product industry, or natural gas used in the field, flared and waste, field uses, gathering uses, plant uses and metering adjustments. It does not include consumption of energy forms produced by other energy supply industries – for example; it would exclude the use of natural gas by the petroleum refining industry. In the case of electricity, it includes transmission losses, adjustments, "unaccounted for" amounts which are subject to variation because of cyclical billing, etc., but excludes generating station use output as measured at the generating station gate.

## Non-energy use

Non-energy use is the amounts used for purposes other than fuel purposes. They include products being used as petrochemical feedstock, anodes/cathodes, greases, lubricants, etc.

**Table 2.4-1**

### Definitions for Domestic energy demand sectors

#### Total mining and oil and gas extraction

Total mining and oil and gas extraction comprises establishments primarily engaged in extracting naturally occurring minerals. Includes metal mines, non-metal mines, coal mines, crude petroleum and natural gas extraction industries, stone quarries gravel pits, exploration for minerals, development of mineral properties and contract drilling operations. NAICS code 21.

#### Pulp and paper

Pulp and paper includes establishments primarily engaged in manufacturing pulp, paper and paper products. NAICS code 322.

#### Total manufacturing

Total manufacturing is the summation of manufacturing industries.

#### Forestry

Forestry includes establishments primarily engaged in forestry and logging services. NAICS codes 113 and 1153.

## Construction

Construction includes establishments primarily engaged in the construction of buildings, highways, dams, etc., and those providing services to the construction industry. Special trade contractors primarily engaged in construction work in such specialities as plumbing, carpentry, painting, etc. are included here. NAICS code 23. Sales of asphalt for paving purposes, regardless of the purchaser, are included here.

## Transportation

Transportation in this sector only includes the use of fuel by the transportation industry for transportation purposes. Excluded are any fuels used for activities not directly involved in transportation (i.e. Train stations, warehouses, airports, etc.). Fuels, which have been purchased for use by the agriculture, commercial and public institutions sectors for transportation purposes, are included in the sectors to which the fuel was sold.

## Agriculture

Agriculture establishments are those primarily engaged in agricultural, hunting and trapping activities. NAICS codes 111, 112, 1142, 1151 and 1152. Excluded are any operations primarily engaged in food processing, farm machinery manufacture and repair.

## Residential

Residential includes all personal residences including single family residences, apartments, apartment hotels, condominiums and farm homes.

## Public administration

Public administration establishments include federal, provincial and municipal governments primarily engaged in activities associated with public administration. Includes such establishments as the Federal Public Service, National Defence, and RCMP and provincial and local administrations. NAICS code 91.

## Commercial and other institutional

Commercial and other institutional includes service industries related to mining, transportation, as well as storage and warehousing, communications and utility (excluding electricity and natural gas), wholesale and retail trade, finance and insurance, real estate and business service, education, health and social services and other service industries.

## Energy use, final demand

Energy use, final demand is the summation of the various primary and secondary energy demands in terajoules. Secondary energy sources include coke, coke oven gases, petroleum products and secondary electricity.

## Section 3: Energy trade

### Tables 3.1 to 3.2

#### Exports

Statistics Canada from the B13 forms and Summary reports captures data for Canadian exports to countries other than United States. There are approximately 29,000 forms and 250 to 350 Summary reports completed every month.

## Imports

The Canada Border Services Agency capture data for all imports from the B3 form. There are approximately 450,000 forms completed every month, which account for approximately 1.5 million import transactions.

## Section 4: Crude oil and equivalent

### Tables 4.1 to 4.6-2

#### Crude oil

A mixture mainly of pentanes and heavier hydrocarbons that may be contaminated with sulphur compounds, that is recovered or is recoverable at a well from an underground reservoir and that is liquid at the conditions under which its volume is measured or estimated. It includes all other hydrocarbon mixtures so recovered or recoverable except raw gas or condensate.

#### Synthetic crude oil

A mixture of mainly pentanes and heavier hydrocarbons that may contain sulphur compounds, that is derived from crude bitumen and that is liquid at the conditions under which its volume is measured or estimated, and includes all other hydrocarbon mixtures so derived.

#### Crude bitumen

A naturally occurring viscous mixture, mainly of hydrocarbons heavier than pentane, that may contain sulphur compounds and that, in its naturally occurring viscous state, will not flow to a well.

#### Condensate

A mixture of mainly pentanes and heavier hydrocarbons that may be contaminated with sulphur compounds, that is recoverable at a well from an underground reservoir and that is gaseous in its virgin reservoir state but is liquid at the conditions under which its volume is measured or estimated.

#### Pentanes plus

A mixture of mainly pentanes and heavier hydrocarbons which ordinarily may contain some butanes and which is obtained from the processing of raw gas, condensate or crude oil.

### Tables 4.7-1 to 4.7-4

#### Propane, and propane mixes

A normally gaseous paraffinic compound extracted from refinery gases.

#### Butane and butane mixes

A normally gaseous paraffinic hydrocarbon extracted from refinery gasses.

## Section 5: Petroleum products

### Tables 5.1 to 5.7

#### Production

Measured at a net yield level, i.e. after exchanges between refinery processes.

#### Domestic sales

Sales by reporting companies exclusive of exports and sales to other reporting companies, and adjusted for exports and imports by non-reporting companies.

#### Motor gasoline

All gasoline type fuels for internal combustion engines other than aircraft.

#### Aviation turbo fuel (kerosene type)

All kerosene type fuels for turbo-jet or straight type jet aircraft engines.

#### Aviation turbo fuel (naphtha type)

All naphtha type fuels for turbo-jet or straight jet or straight jet aircraft engines.

#### Kerosene, stove oil

Includes mineral lamp oil, no.1 fuel oil, and stove oil (including all vaporising burning oil). Are used in space heaters, cook stoves and is suitable for use as an illuminate when burned in wick lamps.

#### Diesel fuel oil

All grades of distillate fuel sold for diesel engine use including low sulphur content (with sulphur content lower than 0.05%).

#### Light fuel Oil (nos. 2 and 3)

Includes all distillate type fuels for power burners, fuel oil no. 2 (heating oil no. 2), fuel oil no.3 (heating oil no. 3), furnace fuel oil, gas oils and light industrial fuel.

#### Heavy fuel oil (nos. 4, 5 and 6)

All grades of residual type fuels including low sulphur (with sulphur content lower than 1%) for both steam and diesel engines. Bunker B and Bunker C, fuel oils no. 4, 5 and 6, and residual fuel oil.

## Section 6: Natural gas

### Tables 6.1 to 6.8

#### Total marketable gas

Receipt of gas from fields, processing or reprocessing plants after re-injection, field uses, processing plant or reprocessing plant shrinkage, plant use losses have been deducted.

#### Imports

Receipts of gas, by pipeline, into Canada from United States.

#### Exports

Export of gas, by pipeline, to the United States.

#### Direct sales

Represents direct, non-utility delivery for consumption.

#### Natural gas liquids

##### Propane

In addition to its normal scientific meaning, a mixture mainly of propane which ordinarily may contain some ethane or butanes.

##### Butanes

In addition to its normal scientific meaning, a mixture mainly of butanes which ordinarily may contain some propane or pentanes plus.

##### Ethane

In addition to its normal scientific meaning, a mixture mainly of ethane which ordinarily may contain some methane or propane.

#### Residential sales

Gas sold usually for domestic purposes (for example, heating space, water, cooking, etc.).

#### Commercial sales

Gas sold to customers engaged in wholesale or retail trade, governments, institutions, office buildings, etc.

#### Industrial sales

Gas sold to customers engaged in a process that creates or changes raw or unfinished materials into another form or product. Includes firm, interruptible and buy/sell agreements.

**Direct sales**

Represents direct, non-utility, sales for consumption, where the utility acts solely as the transporter.

**Section 7: Coal****Tables 7.1 to 7.8-2**

Includes Canadian bituminous, sub-bituminous, lignite, anthracite and imported bituminous coal. It should be noted that the heat content varies depending on the mine.

**Bituminous**

A dense, black coal, often with well-defined bands of bright and dull material with a moisture content usually less than 20%. Used primarily for generating electricity, making coke and space heating.

**Sub-bituminous**

A black coal used primarily for thermal generation with a moisture content between 15% and 30%.

**Lignite**

A brownish-black coal of low rank containing 30% to 40% moisture and volatile matter. Used almost exclusively for electric power generation.

**Coal imports**

Reported by industrial consumers including coke plants, and electric power producers.

**Coal exports**

Shipments of coal from a port to a customer reported on a "freight-on-board" basis by the seller. It may differ from trade data which is based on customs information.

**Producer consumption**

Producer consumption is the consumption by the producing industry of its own produced fuel.

**Section 8: Electricity****Table 8. 1****Primary electricity**

Production is for hydro and nuclear generated electricity.

## Secondary electricity

The amount of electricity generated from thermal generation. The main fuels used are coal, natural gas, coke, coke oven gas, refined petroleum products, wood waste and spent pulping liquor and may include some fuel used for co-generation, for which adequate data is not available to enable the split of the fuels. Disposition data is shown under primary electricity. Exports, imports and producers' consumption (which includes line losses) is included under primary electricity.

## Tables 8.2 to 8.7-2

### Utility generation

A utility is an organisation that, as its prime purpose, generates, transmits and / or distributes electric energy for resale. It can be private or public (provincial or municipal). Electricity can be made from hydro (including tidal and wind), steam (conventional and nuclear), internal combustion and combustion turbine sources.

### Industrial generation

Generation from establishments that are not part of the electric power generation, transmission and distribution industry (North American Industry Classification System (NAICS): 2211).

### Hydro generation

Electric power generated from a plant in which the turbine generators are driven by falling water.

### Steam generation

A plant in which the prime mover is a steam turbine. The steam used to drive the turbine is produced in a boiler where fossil fuels are burned.

### Nuclear generation

Nuclear power is electricity generated at an electric power plant whose turbines are driven by steam generation in a reactor by heat from the fission of nuclear fuel.

### Internal combustion generation

A power plant in which the prime mover is an internal combustion engine. The rapid burning of a fuel-air mixture into mechanical energy generates electric power.

### Combustion turbine generation

Generation from the conversion of heat energy as a gas into mechanical energy.

### Electricity exports

Electric energy (firm, non-firm and other) transferred to the United States, which is measured at the metering points on the lines crossing the frontiers.

**Electricity imports**

Electric energy received from the United States, which is measured at the metering points on the transmission lines crossing the borders.

**Section 9: Prices****Tables 9.5-1 to 9.5-4****Unit price**

The sales unit price is calculated by dividing sales revenue by sales volume.

**Residential sales**

Gas sold usually for domestic purposes (for example, heating space, water, cooking, etc.).

**Commercial sales**

Gas sold to customers engaged in wholesale or retail trade, governments, institutions, office buildings, etc.

**Industrial sales**

Gas sold to customers engaged in a process that creates or changes raw or unfinished materials into another form or product. Includes firm, interruptible and buy/sell agreements.

**Direct sales**

Represents direct, non-utility, sales for consumption, where the utility acts solely as the transporter.
