## How to obtain more information

For information about this product or the wide range of services and data available from Statistics Canada, visit our website, [www.statcan.gc.ca](http://www.statcan.gc.ca).

You can also contact us by

**e-mail** at [infostats@statcan.gc.ca](mailto:infostats@statcan.gc.ca)

**telephone**, from Monday to Friday, 8:30 a.m. to 4:30 p.m., at the following toll-free numbers:

- Statistical Information Service 1-800-263-1136
- National telecommunications device for the hearing impaired 1-800-363-7629
- Fax line 1-877-287-4369

### Depository Services Program

- Inquiries line 1-800-635-7943
- Fax line 1-800-565-7757

## To access this product

This product, Catalogue no. 62-001-X, is available free in electronic format. To obtain a single issue, visit our website, [www.statcan.gc.ca](http://www.statcan.gc.ca) and browse by "Key resource" > "Publications."

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, this agency has developed standards of service that its employees observe. To obtain a copy of these service standards, please contact Statistics Canada toll-free at 1-800-263-1136. The service standards are also published at [www.statcan.gc.ca](http://www.statcan.gc.ca) under "About us" > "The agency" > "Providing services to Canadians."

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- X suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published
- \* significantly different from reference category ( $p < 0.05$ )

## Note on CANSIM

Data that appears in the **The Consumer Price Index** (catalogue no. 62-001-X) are also available electronically, free of charge under the *Statistics Canada Open Licence Agreement*, in our CANSIM (Canadian Socio-Economic Information Management System) database through the Internet, under tables 326-0009, 326-0012, 326-0015, 326-0020, 326-0021 and 326-0022. In general, *CANSIM* provides a longer historical series. For further information on *CANSIM* call 1-800-263-1136.

# Highlights

---

## 12-month change:

- The Consumer Price Index (CPI) rose 2.4% in the 12 months to October, after increasing 2.0% in September.
- Prices increased in all major components in the 12 months to October. Higher prices for shelter and food led the rise in the CPI. At the same time, larger year-over-year price increases for transportation and for clothing and footwear contributed the most to the acceleration in the CPI.
- Consumer prices rose in all provinces in the 12 months to October, with Alberta posting the largest gain. Conversely, British Columbia recorded the smallest year-over-year increase.

## Month-to-month change:

- On a seasonally adjusted monthly basis, the CPI increased 0.1% in October, following a 0.2% rise in September.
- On a monthly basis and before seasonal adjustment, the CPI increased 0.1% in October, matching the rise in September.

## Bank of Canada's Core Index:

- The Bank of Canada's core index rose 2.3% in the 12 months to October, after increasing 2.1% in September.

**Main contributors to the 12-month change in the CPI:**

Main upward contributors:

- Meat (+12.4%)
- Natural gas (+20.1%)
- Telephone services (+7.6%)
- Electricity (+5.6%)
- Cigarettes (+11.5%)

Main downward contributors:

- Furniture (-2.9%)
- Digital computing equipment and devices (-5.5%)
- Video equipment (-8.4%)
- Travel tours (-1.7%)
- Cereal products (-2.0%)

**Main contributors to the monthly change in the CPI, not seasonally adjusted:**

Main upward contributors:

- Purchase of passenger vehicles (+2.0%)
- Property taxes (+2.2%)
- Footwear (+4.6%)
- Air transportation (+2.4%)
- Furniture (+2.0%)

Main downward contributors:

- Gasoline (-4.0%)
- Traveller accommodation (-7.2%)
- Fresh vegetables (-2.3%)
- Non-alcoholic beverages (-2.8%)
- Dairy products (-0.8%)

# Analysis

---

The Consumer Price Index (CPI) rose 2.4% in the 12 months to October, after increasing 2.0% in September.

**Chart 1**  
**The 12-month change in the Consumer Price Index**

## 12-month change in the major components

Prices increased in all major components in the 12 months to October. Higher prices for shelter and food led the rise in the CPI. At the same time, larger year-over-year price increases for transportation and for clothing and footwear contributed the most to the acceleration in the CPI.

**Chart 2**  
Prices increase at faster rates in seven of eight major components

Shelter costs rose 2.8% in the 12 months to October, led by a 20.1% gain in natural gas prices. Consumers also paid more for electricity, homeowners' home and mortgage insurance, and rent in October compared with the same month in 2013. Property taxes rose 2.2% on a year-over-year basis, while mortgage interest cost declined 0.2%.

Food prices were up 2.8% on a year-over-year basis in October. Prices for food purchased from stores rose 3.1%, led by meat prices, which increased 12.4% in the 12 months to October. The most recent data from the Industrial Product Price Index indicate that, as of September 2014, producer prices for meat products were up 14.5% year over year. Food purchased from restaurants cost 2.2% more in October compared with the same month a year earlier.

The transportation index increased 1.1% in the 12 months to October, after rising 0.5% in September. Despite posting four consecutive monthly decreases, gasoline prices were up 0.6% on a year-over-year basis in October, after falling 0.5% in September. Gasoline prices recorded a smaller monthly decline this October (-4.0%) compared with October 2013 (-5.1%). On a year-over-year basis, consumers also paid more for air transportation and for the purchase of passenger vehicles.

Prices for clothing and footwear advanced 3.1% year over year in October, after rising 2.0% the previous month. Fewer discounts were observed this October compared with the same month a year earlier.

### 12-month change in the provinces

Consumer prices rose in all provinces in the 12 months to October, with Alberta posting the largest gain. Conversely, British Columbia recorded the smallest year-over-year increase.

**Chart 3**  
**Consumer prices rise the most in Alberta and the least in British Columbia**

In Alberta, consumer prices rose 3.0% in the 12 months to October. Natural gas prices rose 30.7% on a year-over-year basis, the largest increase among the provinces. In addition, compared with Canada as a whole, Alberta posted larger increases in the indexes for homeowners’ home and mortgage insurance and for gasoline.

Consumer prices in British Columbia rose 1.1% in October compared with the same month a year earlier. Clothing prices fell on a year-over-year basis in the province, while they rose at the national level.

## Seasonally adjusted monthly Consumer Price Index increases

On a seasonally adjusted monthly basis, the CPI increased 0.1% in October, following a 0.2% rise in September.

Chart 4

### Seasonally adjusted monthly Consumer Price Index

Of the eight major components, seven increased on a seasonally adjusted monthly basis in October. The seasonally adjusted index for alcoholic beverages and tobacco products (+0.5%) posted the largest monthly rise in October.

The clothing and footwear index rose 0.3% on a seasonally adjusted monthly basis. Before seasonal adjustment, prices for clothing and footwear increased 1.4%, as October typically marks the introduction of fall and winter apparel.

On a seasonally adjusted basis, the health and personal care index was the only major component to decline in October.

## Non-seasonally adjusted monthly Consumer Price Index increases

On a monthly basis and before seasonal adjustment, the CPI increased 0.1% in October, matching the rise in September.

Consumers paid 2.0% more for the purchase of passenger vehicles in October compared with September, while they paid less for gasoline.

Consumer prices rose in five provinces on a monthly basis in October, with Saskatchewan (+0.5%) recording the largest increase. Meanwhile, consumer prices declined the most in British Columbia (-0.4%).

## Bank of Canada's core index

The Bank of Canada's core index rose 2.3% in the 12 months to October, after increasing 2.1% in September.

On a monthly basis and before seasonal adjustment, the core index advanced 0.3% in October, following a 0.2% rise in September.

The seasonally adjusted core index increased 0.2% on a monthly basis in October, matching the gains in September and August.

### Note to readers

A *video* providing an overview of the Consumer Price Index (CPI) is available on Statistics Canada's YouTube channel.

A seasonally adjusted series is one from which seasonal movements have been eliminated. Users employing CPI data for indexation purposes are advised to use the unadjusted indexes. For more information on seasonal adjustment, see *Seasonally adjusted data – Frequently asked questions*.

The Bank of Canada's core index excludes eight of the CPI's most volatile components (fruit, fruit preparations and nuts; vegetables and vegetable preparations; mortgage interest cost; natural gas; fuel oil and other fuels; gasoline; inter-city transportation; and tobacco products and smokers' supplies) as well as the effects of changes in indirect taxes on the remaining components.

Table 15 has been updated to October 2013.

**Table 14**  
**Average retail prices, monthly, Canada**

	CANSIM vector number	August 2014	September 2014	October 2014
		dollars <sup>1</sup>		
Round steak, 1 kilogram	(v735165)	16.46	17.57	17.51
Sirloin steak, 1 kilogram	(v735176)	20.67	21.43	21.40
Prime rib roast, 1 kilogram	(v735187)	27.71	28.27	27.18
Blade roast, 1 kilogram	(v735198)	14.32	14.82	14.92
Stewing beef, 1 kilogram	(v735209)	14.63	14.88	15.33
Ground beef, regular, 1 kilogram	(v735220)	10.86	11.40	11.74
Pork chops, 1 kilogram	(v735221)	12.53	12.80	13.05
Chicken, 1 kilogram	(v735223)	7.25	7.50	7.49
Bacon, 500 grams	(v735166)	6.79	6.80	6.85
Wieners, 450 grams	(v735167)	4.05	4.05	4.17
Canned sockeye salmon, 213 grams	(v735168)	4.67	4.72	4.73
Homogenized milk, 1 litre	(v735169)	2.48	2.48	2.49
Partly skimmed milk, 1 litre	(v735170)	2.33	2.34	2.33
Butter, 454 grams	(v735171)	4.52	4.56	4.56
Processed cheese food slices, 250 grams	(v735172)	2.88	2.83	2.88
Evaporated milk, 385 millilitres	(v735173)	1.87	1.88	1.78
Eggs, 1 dozen	(v735174)	3.21	3.24	3.22
Bread, 675 grams	(v735175)	2.89	2.76	2.81
Soda crackers, 450 grams	(v735177)	2.75	2.70	2.65
Macaroni, 500 grams	(v735178)	1.42	1.38	1.39
Flour, 2.5 kilograms	(v735179)	5.01	5.08	4.73
Corn flakes, 675 grams	(v735180)	4.99	4.91	4.89
Apples, 1 kilogram	(v735181)	4.01	4.02	3.90
Bananas, 1 kilogram	(v735182)	1.67	1.66	1.67
Grapefruits, 1 kilogram	(v735183)	3.02	2.96	3.06
Oranges, 1 kilogram	(v735184)	3.25	3.08	3.11
Apple juice, canned, 1.36 litres	(v735185)	2.11	2.06	2.05
Orange juice, tetra-brick, 1 litre	(v735186)	4.01	3.96	4.00
Carrots, 1 kilogram	(v735189)	1.93	1.80	1.66
Celery, 1 kilogram	(v735190)	2.07	1.91	1.83
Mushrooms, 1 kilogram	(v735191)	8.17	8.38	8.19
Onions, 1 kilogram	(v735192)	2.17	1.96	1.79
Potatoes, 4.54 kilograms	(v735193)	6.29	5.77	5.46
French fried potatoes, frozen, 1 kilogram	(v735194)	2.58	2.60	2.68
Baked beans, canned, 398 millilitres	(v735195)	1.34	1.30	1.36
Tomatoes, canned, 796 millilitres	(v735196)	1.58	1.61	1.58
Tomato juice, canned, 1.36 litres	(v735197)	2.51	2.47	2.31
Ketchup, 1 litre	(v735199)	3.38	3.45	3.40
Sugar, white, 2 kilograms	(v735200)	2.84	2.91	2.80
Coffee, roasted, 300 grams	(v735201)	5.64	5.97	6.24
Coffee, instant, 200 grams	(v735202)	6.41	6.38	6.45
Tea (72 bags)	(v735203)	4.39	4.36	4.90
Cooking or salad oil, 1 litre	(v735204)	4.15	4.12	4.13
Soup, canned, 284 millilitres	(v735205)	1.02	0.96	1.01
Baby food, 128 millilitres	(v735206)	0.93	0.92	0.93
Peanut butter, 500 grams	(v735207)	3.50	3.50	3.46
Fruit flavoured crystals, 2.25 litres	(v735208)	1.59	1.61	1.62
Soft drinks, cola type, 2 litres	(v735210)	1.92	1.98	1.92
Soft drinks, lemon-lime type, 2 litres	(v735211)	1.87	1.92	1.86
Paper towels (2 rolls)	(v735213)	2.63	2.58	2.64
Facial tissue (200 tissues)	(v735214)	2.52	2.54	2.59
Bathroom tissue (4 rolls)	(v735215)	2.61	2.64	2.62
Shampoo, 300 millilitres	(v735216)	3.86	3.76	3.76
Deodorant, 60 grams	(v735217)	4.16	4.18	4.33
Toothpaste, 100 millilitres	(v735218)	2.44	2.48	2.43
Cigarettes (200)	(v735219)	93.31	93.39	93.61
Regular, unleaded gasoline at self-service stations, cents per litre	(v41838376)	130.9	129.7	124.3

## Explanatory notes for tables

---

### Table 1 The Consumer Price Index, major components and special aggregates, Canada, not seasonally adjusted

1. 2011 Consumer Price Index (CPI) basket weights at January 2013 prices, Canada.
2. Figures may not add to 100% due to rounding.
3. The Bank of Canada's core index excludes eight of the Consumer Price Index's most volatile components (fruit, fruit preparations and nuts; vegetables and vegetable preparations; mortgage interest cost; natural gas; fuel oil and other fuels; gasoline; inter-city transportation; and tobacco products and smokers' supplies) as well as the effects of changes in indirect taxes on the remaining components. For additional information on core CPI, please consult the Bank of Canada website: <http://www.bankofcanada.ca/rates/indicators/key-variables/inflation-control-target/>.

### Table 2 The Consumer Price Index, major components and special aggregates, Canada, seasonally adjusted

1. 2011 Consumer Price Index (CPI) basket weights at January 2013 prices, Canada.
2. A seasonally adjusted series is one from which seasonal movements have been eliminated. Each month, the previous month's seasonally adjusted index is subject to revision. On an annual basis, the seasonally adjusted values for the last three years are revised with the January data release. Users employing Consumer Price Index data for indexation purposes are advised to use the unadjusted indexes. For more information on the availability and uses of seasonally adjusted CPI data, please see the, see the *Definitions, data sources and methods* section of survey 2301.
3. The Bank of Canada's core index excludes eight of the Consumer Price Index's most volatile components (fruit, fruit preparations and nuts; vegetables and vegetable preparations; mortgage interest cost; natural gas; fuel oil and other fuels; gasoline; inter-city transportation; and tobacco products and smokers' supplies) as well as the effects of changes in indirect taxes on the remaining components. For additional information on core CPI, please consult the Bank of Canada website: <http://www.bankofcanada.ca/rates/indicators/key-variables/inflation-control-target/>.

### Table 3 The Consumer Price Index, provinces, Whitehorse, Yellowknife and Iqaluit, not seasonally adjusted

1. Data for Iqaluit are on a December 2002=100 base (200212=100) and the Standard Geographical Classification (SGC) 2001. Previous to April 1, 1999, the town of Iqaluit formed part of the Northwest Territories. On April 1, 1999, the town of Iqaluit formed part of the newly-created territory of Nunavut.

### Table 4 The Consumer Price Index, major components and selected sub-groups, Canada, not seasonally adjusted

#### Table 4-2

1. In July 2004, the 2001 basket weights introduced with the January 2003 data were adjusted; the weights for mortgage interest cost were re-evaluated.

**Table 4-7**

1. From April 2006, Statistics Canada changed its implementation of the price index formula used for traveller accommodation. As a result, data from April 2006 are not strictly comparable to earlier time periods.

**Table 5 The Consumer Price Index for Canada, all-items CPI, not seasonally adjusted, historical data**

1. The annual average index is calculated as the average of the published 12 individual monthly indexes, rounded to one decimal place. Percentage changes between the annual average indexes are calculated based on these published rounded numbers. Between May 2007 and September 2007, the annual average percentage changes in Table 5 were calculated based on annual average indexes that were not rounded. As a result, some percentage changes were different by +/- 0.1 from the official percentage change. This problem only affected the annual average column of Table 5.

**Table 6 Core Consumer Price Index (CPI) (Bank of Canada definition), not seasonally adjusted, historical data**

1. The Bank of Canada's core index excludes eight of the Consumer Price Index's most volatile components (fruit, fruit preparations and nuts; vegetables and vegetable preparations; mortgage interest cost; natural gas; fuel oil and other fuels; gasoline; inter-city transportation; and tobacco products and smokers' supplies) as well as the effects of changes in indirect taxes on the remaining components. For additional information on core CPI, please consult the Bank of Canada website: <http://www.bankofcanada.ca/rates/indicators/key-variables/inflation-control-target/>.
2. The annual average index is calculated as the average of the published 12 individual monthly indexes, rounded to one decimal place. Percentage changes between the annual average indexes are calculated based on these published rounded numbers.

**Table 7 The Consumer Price Index for Canada, major components and special aggregates, not seasonally adjusted, historical data**

1. Goods are physical or tangible commodities usually classified according to their life span into non-durable goods, semi-durable goods and durable goods. Non-durable goods are those goods that can be used up entirely in less than a year, assuming normal usage. For example, fresh food products, disposable cameras and gasoline are non-durable goods. Semi-durable goods are those goods that may last less than 12 months or greater than 12 months depending on the purpose to which they are put. For example, clothing, footwear and household textiles are semi-durable goods. Durable goods are those goods which may be used repeatedly or continuously over more than a year, assuming normal usage. For example, cars, audio and video equipment and furniture are durable goods.
2. A service in the Consumer Price Index (CPI) is characterized by valuable work performed by an individual or organization on behalf of a consumer, for example, car tune-ups, haircuts and city public transportation. Transactions classified as a service may include the cost of goods by their nature. Examples include food in restaurant food services and materials in clothing repair services.
3. The special aggregate "energy" includes: "electricity", "natural gas", "fuel oil and other fuels", "gasoline", and "fuel, parts and supplies for recreational vehicles".
4. The annual index level is the average of the 12 individual monthly indexes.

## **Table 8 Annual average percentage changes for the Consumer Price Index**

### **Table 8-1**

1. The annual index level is the average of the 12 individual monthly indexes. The percentage change for a given calendar year is calculated using the annual average indexes.

### **Table 8-2**

1. The annual index level is the average of the 12 individual monthly indexes. The percentage change for a given calendar year is calculated using the annual average indexes.
2. Data for Iqaluit are on a December 2002=100 base (200212=100) and the Standard Geographical Classification (SGC) 2001. Previous to April 1, 1999, the town of Iqaluit formed part of the Northwest Territories. On April 1, 1999, the town of Iqaluit formed part of the newly-created territory of Nunavut.

## **Table 9 The Consumer Price Index, major components, selected sub-groups and special aggregates, provinces, Whitehorse and Yellowknife, not seasonally adjusted**

### **Tables 9-1, 9-2, 9-3, 9-4, 9-5, 9-6, 9-7, 9-8, 9-9, 9-10 and 9-11**

1. The special aggregate "energy" includes: "electricity", "natural gas", "fuel oil and other fuels", "gasoline", and "fuel, parts and supplies for recreational vehicles".

### **Table 9-12**

1. The special aggregate "energy" includes: "electricity", "natural gas", "fuel oil and other fuels", "gasoline", and "fuel, parts and supplies for recreational vehicles".
2. Part of the increase first recorded in the shelter index for Yellowknife for December 2004 inadvertently reflected rent increases that actually occurred earlier. As a result, the change in the shelter index was overstated in December 2004, and was understated in the previous two years. The shelter index series for Yellowknife has been corrected from December 2002. In addition, the Yellowknife all-items Consumer Price Index (CPI) and some Yellowknife special aggregate index series have also changed. Data for Canada and all other provinces and territories were not affected.

## **Table 10 The all-items Consumer Price Index, provinces, Whitehorse, Yellowknife and Iqaluit, not seasonally adjusted, historical data**

1. Data for Iqaluit are on a December 2002=100 base (200212=100) and the Standard Geographical Classification (SGC) 2001. Previous to April 1, 1999, the town of Iqaluit formed part of the Northwest Territories. On April 1, 1999, the town of Iqaluit formed part of the newly-created territory of Nunavut.
2. The annual index level is the average of the 12 individual monthly indexes.

### **Table 11 The Consumer Price Index and selected sub-groups, by urban centre, not seasonally adjusted**

1. With the introduction of the 1992 basket in January 1995, emphasis was shifted from urban centre data to provincial data. Urban centre all-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each urban centre. This recognizes the importance of shelter in the basket, the significant and persistent differences in price movements between urban centres, and the availability of local data. For the other seven major components, the movement of the provincial counterpart is used except in the cases of Montréal, Toronto, and Vancouver, where a sub-provincial counterpart is used. The major components are aggregated using the urban centre's expenditure pattern to arrive at each urban centre's all-items index.
2. Formerly Ottawa (Ottawa-Gatineau, Ontario part), represents Ottawa only.

### **Table 12 The all-items Consumer Price Index by urban centre, not seasonally adjusted, historical data**

1. With the introduction of the 1992 basket in January 1995, emphasis was shifted from urban centre data to provincial data. Urban centre all-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each urban centre. This recognizes the importance of shelter in the basket, the significant and persistent differences in price movements between urban centres, and the availability of local data. For the other seven major components, the movement of the provincial counterpart is used except in the cases of Montréal, Toronto, and Vancouver, where a sub-provincial counterpart is used. The major components are aggregated using the urban centre's expenditure pattern to arrive at each urban centre's all-items index.
2. The annual index level is the average of the 12 individual monthly indexes.
3. Formerly Ottawa (Ottawa-Gatineau, Ontario part), represents Ottawa only.

### **Table 14 Average retail prices, monthly, Canada**

1. Prices are expressed in dollars, except for the price of gasoline which is expressed in cents per litre.

#### **Average retail prices for food, household supplies, personal care items, cigarettes and gasoline**

Table 14 shows, for the current month and the two previous months, average prices for selected food, household supplies, personal care items, cigarettes and for gasoline.

Prices for these items are collected as part of the regular monthly Consumer Price Index (CPI) survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets and drug stores, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Prices for regular unleaded self-serve gasoline are collected at gas stations. In each geographic area defined for pricing purposes, the average prices of each product are weighted by the population of the area in question to calculate the average Canadian retail price of each product. For regular unleaded self-serve gasoline, average city prices are weighted by provincial volume supplied and cities' population to calculate the Canada average retail price.

Products that are priced can vary in quality between outlets or between geographic areas. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched product and outlet sample is used for the CPI to determine the pure price movement of products through time.

## Table 15 Inter-city indexes of price differentials, as of October 2013, of consumer goods and services

### Purpose and Scope

Table 15 shows estimates of price differences between 11 Canadian cities in all 10 provinces, as of October 2013. These estimates are based on a selection of products (goods and services) purchased by consumers in each of the 11 cities.

These estimates should not be interpreted as a measure of differences in the cost-of-living between cities. The indexes provide price comparisons for a selection of products only, and are not meant to give an exhaustive comparison of all goods and services purchased by consumers. Additionally, the shelter price concept used for these indexes is not conducive to making cost-of-living type comparisons between cities (see below).

### Methodology

In order to produce optimal Inter-city indexes, product comparisons were initially made by pairing cities that are in close geographic proximity. The resulting price level comparisons were then extended to include comparisons between all of the cities, using a chaining procedure. The following initial pairings were used:

St. John's	Halifax
Charlottetown-Summerside	Halifax
Saint John	Halifax
Halifax	Ottawa
Montréal	Toronto
Ottawa	Toronto
Toronto	Winnipeg
Regina	Winnipeg
Edmonton	Winnipeg
Vancouver	Edmonton

Reliable Inter-city price comparisons require that the selected products be very similar across cities. This ensures that the variation in index levels between cities is due to pure price differences and not to differences in the attributes of the products, such as size and/or quality.

Within each city pair, product price quotes were matched on the basis of detailed descriptions. Whenever possible, products were matched by brand, quantity and with some regard for the comparability of retail outlets from which they were selected.

Additionally, the target prices for this study are final prices and as such, include all sales taxes and levies applied to consumer products within a city. This can be an important source of variation when explaining differences in inter-city price levels.

It should be noted that price data for the Inter-city indexes is drawn from the sample of monthly price data collected for the Consumer Price Index (CPI). Given that the CPI sample is optimized to produce accurate price comparisons through time, and not across regions, the number of matched price quotes between cities can be small. It should also be noted that, especially in periods when prices are highly volatile, the timing of the product price comparison can significantly affect city-to-city price relationships.

The weights used to aggregate the different product indexes within a city are based on the combined consumption expenditures of households living in the 11 cities tracked. As such, one set of weights is used for all 11 cities. Currently, 2011 expenditures are used to derive the weights. These expenditures are expressed in October 2013 prices.

The Inter-city index for a particular city is compared to the weighted average of all 11 cities, which is equal to 100. For example, an index value of 102 for a particular city means that prices for the measured commodities are 2% higher than the weighted, combined city average.

### **Additional Information on Shelter**

Shelter prices were absent from the Inter-city index program prior to 1999 because of methodological and conceptual issues associated with their measurement. The diverse nature of shelter means that accurate matches between cities are often difficult to make.

To account for some of these difficulties, a rental equivalence approach is used to construct the Inter-city price indexes for owned accommodation. Such an approach uses market rents as an approximation to the cost of the shelter services consumed by homeowners in each city. It is important to note that this approach may not be suitable for the needs of all users. For instance, since the rental equivalence approach does not represent an out-of-pocket expenditure, the indexes should not be used for measuring differences in the purchasing power of homeowners across cities.

### **Footnotes for Table 15**

1. The weights shown are rounded 2011 basket weights at January 2013 prices for Canada. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price changes up until October 2013.
2. Includes the following subgroups: sugar and syrup, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegar, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

# Data quality, concepts and methodology

---

## Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of goods and services. This basket is based on the expenditures of the target population in a certain reference period, currently 2011. Since the basket contains goods and services of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPIs are published for Canada, the ten provinces, Whitehorse, Yellowknife and Iqaluit. Some CPI information is also available for an additional sixteen urban centres. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or urban centres.

## Population coverage

The population targeted by the CPI consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse, Yellowknife and Iqaluit are not represented by the index. Prior to February 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

## Time base

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 2002=100. The official time base was changed from 1992=100 to 2002=100 starting with the CPI for May 2007. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

## Percent versus index point changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

## Price coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax (GST), as well as provincial retail sales taxes wherever applicable. In regions where the GST and provincial retail sales taxes have been combined, the Harmonized Sales Tax (HST) is included. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of products and the outlets from which prices are collected is judgmental, other than for rents and traveler accommodation. The number of prices required for a given good or service depends on the importance and the nature of the product. The samples are designed to represent volume selling goods and services and outlets.

The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

The prices of most of the goods and services surveyed for the CPI are usually collected in the first two weeks of the reference month. Food prices are collected in the first three weeks, while gasoline prices are collected in four weeks of each month. Although prices for most CPI goods and services are collected monthly, prices for products having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

## Weights and linking

The CPI maintains fixed quantitative proportions (weights) between goods and services during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In February 2013, the basket reflecting the 2011 expenditure patterns replaced the 2009 basket. The continuity of the CPI series is maintained by “linking” the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified goods and services price indexes. The weights are derived from Survey of Household Spending data. Text table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. the 2011 basket as it was reflected in the CPI in February 2013 and the 2009 basket. Because both sets of weights are expressed in January 2013 or “link month” prices, the differences reflect the shifts in the relative quantities purchased between the two baskets.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see **The Consumer Price Index Reference Paper** catalogue no. 62-553-X (Occasional) or contact Consumer Prices Division.

Text table 1

### Comparison of the 2011 and 2009 distribution<sup>1</sup> of expenditures used in the Consumer Price Index, by major component, for Canada

	2011 Expenditures		2009 Expenditures
	Expressed in 2011 prices	Expressed in January 2013 prices	Expressed in January 2013 prices
	percent		
<b>Major Components</b>			
<b>All-Items CPI</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
Food	16.4	16.6	16.4
Shelter	25.9	26.3	27.7
Household operations, furnishings and equipment	12.6	12.7	11.8
Clothing and footwear	6.2	5.8	5.0
Transportation	20.1	20.0	20.3
Health and personal care	5.0	4.9	4.9
Recreation, education and reading	11.3	11.0	10.9
Alcoholic beverages and tobacco products	2.8	2.8	3.0

1. Figures may not add to 100% due to rounding.

## Bank of Canada's core index

Starting with the October 2006 Consumer Price Index (CPI), Statistics Canada produces and disseminates the Core CPI as defined by the Bank of Canada.

The Bank of Canada's core index excludes eight of the Consumer Price Index's most volatile components (fruit, fruit preparations and nuts; vegetables and vegetable preparations; mortgage interest cost; natural gas; fuel oil and other fuels; gasoline; inter-city transportation; and tobacco products and smokers' supplies) as well as the effects of changes in indirect taxes on the remaining components. For additional information on core CPI, please consult the Bank of Canada website: <http://www.bankofcanada.ca/rates/indicators/key-variables/inflation-control-target/>.

Statistics Canada also calculates, on behalf of the Bank of Canada, a seasonally adjusted Core CPI. This series is available through *CANSIM*, Statistics Canada's official database, or by contacting us through the means mentioned on the inside cover of this publication.

## Whitehorse, Yellowknife and Iqaluit indexes

The relatively small size of the housing market in these three cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation and Owned Accommodation are not published for these three cities. Further, the all-items indexes published for these three cities are not strictly comparable with the same indexes for the provinces or the other sixteen cities.

## Calculation of urban centre indexes

With the introduction of the 1992 basket, emphasis was shifted from urban centre data to provincial data. Urban Centre all-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each urban centre. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between urban centres, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the urban centre's expenditure pattern to arrive at each urban centre's all-items index.

## Seasonal adjustment

A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as variations in climate and regular institutional events such as vacations and statutory holidays. Seasonally adjusted series are calculated using Statistics Canada's X-12 ARIMA program. Time series with no detectable seasonal movements remain unchanged from the official series. The official unadjusted series for all-items index, core consumer price index, each of the eight major component indexes and three special aggregates (all-items excluding food, all-items excluding food and energy and all-items excluding 8 of the most volatile components (Bank of Canada definition)) are seasonally adjusted independently.

Each month, the previous month's seasonally adjusted index is subject to revision. On an annual basis, the seasonally adjusted values for the last three years are revised with the January data release. Since these revisions can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.
