Prix à la consommation et indices des prix

Avril-juin 1996

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), Fax: (613) 951-2848 or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

You can also visit our World Wide Web site:
<http://www.statcan.ca>

Toll-free access is provided **for all users who reside outside the local dialling area** of any of the Regional Reference Centres.

Internet: order@statcan.ca

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), télécopieur : (613) 951-2848 ou à l'un des centres de consultation régionaux de Statistique Canada :

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

Vous pouvez également visiter notre site sur le Web :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Margaret Parlor, Chef, Section des prix à la consommation

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Second Quarter, 1996

Trends in Consumer Price Movements

The price of the basket of goods and services making up the Consumer Price Index (CPI) rose, on average, 0.5% between March and June, 1996 (second quarter). This was slightly less than in the first quarter (December 1995 to March 1996) when the value of the CPI basket advanced by 0.7%. In the latest quarter, prices rose by 0.3% in both April and May but fell by 0.1% in June.

Consumer prices were, on average, 1.4% higher in June 1996 than in the same month of 1995. Since the beginning of the year, annual increases have varied between 1.3% and 1.6%. These rates were considerably lower than the 2.1% annual average increase noted in 1995.

In seasonally adjusted terms, the CPI moved up by 0.4% in the second quarter, the same as the first quarter. Seasonally adjusted monthly increases of 0.3% were registered both in April and May while a drop of 0.1% appeared in June.

Movements in provincial CPI's in the second quarter varied between lows of 0.1% in British Columbia and 0.3% in Alberta to a high of 1.5% in Nova Scotia. Increases which were well above average were reported in two other Atlantic provinces — Newfoundland (1.0%) and Prince Edward Island (1.0%).

Major components (not seasonally adjusted)

The 0.5% increase in the CPI in the second quarter reflected above average advances in the indexes for transportation, food and recreation.

A 1.5% rise in transportation charges was dominated by an advance of 7.2% in gasoline prices. Gasoline prices rose at progressively faster rates in March, April and May before falling in June. The price increases were associated with advances in crude oil prices which were affected by a rundown of inventories, unanticipated increases in world demand and uncertainty whether Iraq would reenter the international market.

The transportation index also responded to increases in the price of new cars, in Toronto transit fares and in charges for the maintenance and repair of automobiles. At the same time, auto insurance premiums were reduced in British Columbia and in Québec, and air fares declined.

Food prices rose, on average, by 1.2% as higher prices were observed for fresh vegetables (except tomatoes), fresh fruit, pork, processed meat and restaurant meals. Some of the effect of higher prices was offset by lower prices of beef, bakery products and soft drinks.

A large part of the 1.5% rise in the Recreation, Education and Reading index came from increased hotel/motel rates. Traveller accommodation charges rose by 8.1% in the second quarter, as Canada was the chosen destination of record numbers of non-resident visitors. The depressed rate of the Canadian dollar exchange rate was a major contributor to this trend. This major component index was also influenced, to a lesser extent, by higher prices for recreational vehicles, by fees and dues for the use of recreational facilities and by higher prices for newspapers.

Faits saillants

Comportement des prix à la consommation

Deuxième trimestre de 1996

Tendances des mouvements des prix à la consommation

Le prix du panier de biens et de services qui forment l'indice des prix à la consommation (IPC) a augmenté, en moyenne, de 0,5% entre mars et juin 1996 (deuxième trimestre). C'est un peu moins qu'au premier trimestre (décembre 1995 à mars 1996), où la valeur du panier de l'IPC a progressé de 0,7%. Dans le dernier trimestre, les prix ont monté de 0,3% en avril et en mai, mais fléchi de 0,1% en juin.

Les prix à la consommation étaient, en moyenne, de 1,4% plus hauts en juin 1996 par rapport au mois correspondant de 1995. Depuis le début de l'année, les augmentations annuelles ont varié entre 1,3% et 1,6%. Ces taux étaient nettement plus faibles que l'augmentation moyenne annuelle de 2,1% observée en 1995.

En chiffres désaisonnalisés, l'IPC a progressé de 0,4% au deuxième trimestre, soit la même chose qu'au premier trimestre. Des augmentations mensuelles désaisonnalisées de 0,3% ont été constatées en avril et en mai, alors qu'un repli de 0,1% est apparu en juin.

Les mouvements des IPC provinciaux au deuxième trimestre ont oscillé entre des creux de 0,1% en Colombie-Britannique et de 0,3% en Alberta et un sommet de 1,5% en Nouvelle-Écosse. Il y a eu des augmentations bien supérieures à la moyenne dans deux autres provinces de l'Atlantique : Terre-Neuve (1,0%) et Île-du-Prince-Édouard (1,0%).

Principales composantes (avant désaisonnalisation)

La hausse de 0,5% de l'IPC au deuxième trimestre est le reflet d'avances supérieures à la moyenne des indices des transports, des aliments et des loisirs.

Une augmentation de 1,5% des frais de transport a été dominée par une avance de 7,2% des prix de l'essence. Les prix de l'essence ont accéléré graduellement en mars, en avril et en mai, avant de chuter en juin. Les augmentations de prix étaient liées aux avances des prix du pétrole brut, sous l'effet d'un épuisement des stocks, d'augmentations imprévues de la demande mondiale et de l'incertitude quant au retour éventuel de l'Iraq sur le marché international.

L'indice des transports a aussi réagi aux augmentations des prix des voitures neuves, des tarifs du transport urbain à Toronto, et des frais pour l'entretien et les réparations des automobiles. En même temps, les primes d'assurance automobile ont diminué en Colombie-Britannique et au Québec, et les tarifs aériens ont fléchi.

Les prix des aliments ont monté, en moyenne, de 1,2% à la faveur d'une hausse des prix des légumes frais (sauf les tomates), des fruits frais, du porc, des viandes traitées et des repas pris au restaurant. L'effet de l'accroissement des prix a été partiellement compensé par la diminution des prix du boeuf, des produits de boulangerie et des boissons gazeuses.

Une part importante de la progression de 1,5% de l'indice des loisirs, de la formation et de la lecture est imputable aux tarifs d'hôtel et de motel. Les frais d'hébergement pour voyageurs ont monté de 8,1% au deuxième trimestre, car le Canada a été la destination de choix d'un nombre record de visiteurs non résidents. La faiblesse du taux de change du dollar canadien était un facteur déterminant de cette tendance. L'indice de cette composante principale a aussi subi l'influence, quoique dans une mesure moindre, de l'augmentation des prix des véhicules de loisirs, de la hausse des frais et cotisations pour l'utilisation d'installations de loisirs et de l'augmentation des prix des journaux.

Less conspicuous increases were registered by three other major component indexes. The Alcoholic Beverages and Tobacco Products index increased by 0.8% largely due to higher prices for cigarettes and wine purchased from stores. Higher prices for furniture and chemical products, only partially offset by price declines for paper supplies, household textiles and horticultural goods, pushed up the Household Operations and Furnishings index by 0.4%. Health and Personal Care charges increased by 0.4%, with higher charges for dental care and non-prescribed medicines offset, to some extent, by a drop in the price of some personal care items.

The overall upward pressure on the CPI in the second quarter was moderated, to some extent, by lower prices for clothing and footwear and for shelter.

Prices of nearly all types of clothing and footwear declined in the second quarter. Data on retail trade to June 1996 have indicated considerable declines in the sales of stores selling women's clothing, men's clothing and footwear between January and May this year compared to the same period last year.

Most of the 0.1% decline in the Shelter index came from lower charges for mortgage interest, new houses and piped gas. The last was influenced by a build up of inventories. A large part of the combined impact of these declines was offset by increases in residential rents, homeowners' maintenance and repair charges, and electricity rates.

Special aggregates

The Goods index moved up by 0.8% in the second quarter, almost the same as the 0.9% rise in the first quarter. A large part of the latest increase resulted from an advance of 1.6% in the prices of non-durables followed by a rise of 0.5% in the prices of durables. These increases were moderated by a decline of 1.7% in the prices of semi-durables caused mostly by the drop in clothing and footwear prices.

The Services index edged up by 0.3% following a rise of 0.5% in the first quarter. The latest rise was associated with price increases for restaurant meals, traveller accommodation, city bus and subway transportation, the use of recreational facilities, dental care and rented accommodation. An offset resulted from lower auto insurance premiums and owned accommodation charges.

The Energy index advanced by 3.0% in the second quarter following a rise of 1.5% in the first quarter. Most of the advance in the first quarter was attributable to the large rise in gasoline prices (7.2%). Smaller increases were noted in electricity rates (0.9%) and fuel oil prices (1.4%). At the same time piped gas rates fell by a large 7.4%.

The All-items excluding Food and Energy index rose by a marginal 0.1% in the second quarter following a much steeper increase of 0.7% in the first quarter.

Les indices de trois autres composantes principales ont accusé des augmentations moins évidentes. L'indice des boissons alcoolisées et des produits du tabac a avancé de 0,8%, à cause surtout de l'augmentation des prix des cigarettes et du vin acheté au magasin. La hausse des prix des meubles et des produits chimiques, qui n'a été que partiellement effacée par des baisses de prix des articles en papier, des articles ménagers en matière textile et des produits horticoles, a fait avancer de 0,4% l'indice des dépenses et de l'équipement du ménage. Les frais de santé et de soins personnels ont augmenté de 0,4%, la progression des frais pour soins dentaires et médicaments non prescrits ayant jusqu'à un certain point été effacé par la baisse du prix de certains articles de soins personnels.

Les pressions globales visant à faire augmenter l'IPC au deuxième trimestre ont été modérées, dans une certaine mesure, par la baisse des prix de l'habillement et des chaussures ainsi que du logement.

Les prix de presque tous les genres de vêtements et de chaussures se sont repliés au deuxième trimestre. Les données sur le commerce de détail jusqu'en juin 1996 révélaient des reculs considérables des ventes des magasins vendant des vêtements pour femmes, des vêtements pour hommes et des chaussures, entre janvier et mai de cette année, par rapport à la même période de l'an dernier.

Le plus clair du repli de 0,1% de l'indice du logement est venu de la diminution des frais d'intérêt hypothécaire, des prix des maisons neuves et des tarifs du gaz. Les tarifs du gaz ont subi l'influence d'une accumulation de stocks. Une forte part de l'effet combiné de ces reculs a été compensée par des augmentations des loyers de résidence, des frais d'entretien et de réparations par le propriétaire, et des tarifs d'électricité.

Agrégats spéciaux

L'indice des biens a augmenté de 0,8% au deuxième trimestre, ce qui est presque identique à la progression de 0,9% du premier trimestre. Une bonne part de la dernière augmentation est le résultat d'une avance de 1,6% des prix des biens non durables, suivie d'une hausse de 0,5% des prix des biens durables. Ces augmentations ont été modérées par une diminution de 1,7% des prix des biens semi-durables, provoquée essentiellement par la chute des prix de l'habillement et des chaussures.

L'indice des services a avancé de 0,3%, après avoir monté de 0,5% au premier trimestre. La dernière augmentation était liée aux augmentations de prix des repas pris au restaurant, de l'hébergement pour voyageurs, du transport urbain en autobus et métro, de l'utilisation des installations de loisirs, des soins dentaires et du logement en location. Il y a eu compensation par la diminution des primes d'assurance automobile et des frais de logement en propriété.

L'indice de l'énergie a avancé de 3,0% au deuxième trimestre, après avoir gagné 1,5% au premier trimestre. Le plus clair de l'avance du premier trimestre est attribuable à la forte augmentation des prix de l'essence (7,2%). Des augmentations plus modestes des tarifs d'électricité (0,9%) et des prix du mazout (1,4%) ont été observées. En même temps, les tarifs du gaz ont subi une chute importante de 7,4%.

L'indice d'ensemble, sans les aliments et l'énergie, a connu une légère progression de 0,1% au deuxième trimestre, après une augmentation beaucoup plus marquée de 0,7% au premier trimestre.

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de

importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac	

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

de 1992 et 1986 utilisées pour l'indice des
prix à la consommation, par composante
principale, pour le Canada

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures (Occasional)**, Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en appliquant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1992 pour le Canada figurant dans le **Document de référence de l'Indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992** (hors-série, no. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection de quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)	Groupe principal de produits	Nombre d'articles dont le prix est relevé (lorsque disponibles)
Food at home	170	Aliments consommés à la maison	170
Meals away from home	12	Repas pris à l'extérieur	12
Household maintenance and services	7	Entretien et services ménagers	7
Household supplies	28	Fournitures ménagères	28
Communications	3	Communication	3
Domestic help (depending on location)	2-8	Aide-domestique (dépendant de l'endroit)	2-8
Clothing and home furnishings	29	Habillement et ameublement	29
Transportation and automobile operation	22	Transports et utilisation de l'automobile	22
Health and personal care	41	Santé et soins personnels	41
Reading and recreation	51	Lecture et loisirs	51
Tobacco and alcohol	20	Tabacs et boissons alcoolisées	20

ELECTRONIC PUBLICATIONS PILOT (EPP) NOTIFICATION TO PARTICIPATING LIBRARIES

Copyright

All Statistics Canada publications and other catalogued documents included on the Electronic Publications Pilot (EPP) site are published by authority of the Minister responsible for Statistics Canada and are protected by Copyright.

Reproduction of the publications and documents, in whole or in part, for purposes of resale or redistribution requires prior written permission from Licence Services, Marketing Division, Statistics Canada, Ottawa, Ontario, Canada, K1A 0T6.

Terms and conditions of participation

Libraries participating in Statistics Canada's Electronic Publications Pilot are allowed to access the EPP site and:

- a) download full copies of the Statistics Canada publications and documents to their computers;
- b) store the downloaded publications and documents on computer-readable electronic storage media and offer access to the stored electronic documents to patrons;
- c) print full copies of the publications and documents and store them on library shelves for use by library patrons; and,
- d) provide access to a terminal whereby patrons can browse publications and documents on the dedicated EPP site.

Libraries participating in Statistics Canada's Electronic Publications Pilot are authorized to offer the following services to library patrons with regard to the publication and documents obtained as part of the EPP:

- a) if the publications and documents have been printed and stored on library shelves, to transcribe part of the content or to make photocopies of selected pages (the libraries may charge a fee for such photocopying services);
- b) if the publications and documents have been stored on computer hard-drives or diskettes, to browse the material on screen, and to transcribe part of the content or to print selected pages (the libraries may charge a fee for such printing services);
- c) if the library provides access to a terminal whereby patrons can browse publications and documents on the dedicated EPP site, to transcribe part of the content, to print or download selected pages (the libraries may charge a fee for such online browsing, printing and downloading services).

Libraries participating in Statistics Canada's Electronic Publications Pilot Project are NOT authorized to allow library patrons to reproduce publications and documents obtained as part of the EPP, in part or in whole, for non-personal use, resale or redistribution.

Further, libraries participating in Statistics Canada's Electronic Publications Pilot Project are required to inform all patrons who wish to access publications and documents obtained as part of the Project of the copyrighted nature of the publications and documents and of the process to be followed to obtain an authorization to reproduce them for transmission to other individuals or external organizations.

PROJET PILOTE D'ÉDITION ÉLECTRONIQUE AUX BIBLIOTHÈQUES PARTICIPANTES

Droit d'auteur

Les publications et autres documents catalogués de Statistique Canada, utilisés sur le site du projet pilote d'édition électronique, sont autorisés par le ministre responsable de Statistique Canada et sont protégés par le droit d'auteur.

La reproduction des publications et documents, en tout ou en partie, pour fins de vente ou de redistribution requiert l'autorisation écrite des Services d'octroi de licences, Division du marketing, Statistique Canada, Ottawa (Ontario) Canada K1A 0T6.

Conditions de participation

Les bibliothèques participant au projet pilote d'édition électronique de Statistique Canada ont accès au site du projet pilote et peuvent :

- a) télécharger des copies complètes des publications et document de Statistique Canada dans leurs ordinateurs;
- b) stocker les publications et documents téléchargés sur support de données électronique et offrir aux usagers l'accès aux documents ainsi stockés;
- c) faire imprimer des copies complètes des publications et documents et les ranger sur les étagères des bibliothèques pour que les usagers puissent les consulter;
- d) fournir aux usagers l'accès à un terminal leur permettant de visualiser les publications et les documents qui se trouvent sur le site réservé au projet pilote.

Les bibliothèques participant au projet pilote d'édition électronique de Statistique Canada sont autorisées à offrir aux usagers les services suivants qui touchent les publications et documents obtenus dans le cadre du projet pilote :

- a) si les publications et documents ont été imprimés et rangés sur les étagères des bibliothèques, les usagers peuvent en transcrire une partie du contenu ou en photocopier des pages (des frais peuvent leur être imposés pour les services de photocopie);
- b) si les publications et documents ont été stockés sur disque dur ou sur disquette, les usagers peuvent les visualiser à l'écran et en transcrire une partie du contenu ou en faire imprimer des pages (des frais peuvent leur être imposés pour les services d'impression);
- c) si les bibliothèques fournissent aux usagers l'accès à un terminal leur permettant de visualiser les publications et les documents qui se trouvent sur le site réservé au projet pilote, les usagers peuvent en transcrire une partie du contenu ou en faire imprimer ou télécharger certaines pages (des frais peuvent leur être imposés pour la consultation en direct, l'impression ou le téléchargement).

Les bibliothèques participant au projet pilote d'édition électronique de Statistique Canada NE SONT PAS autorisées à permettre aux usagers de reproduire, en tout ou en partie, à des fins de vente ou de redistribution ou autrement que pour leur usage personnel, les publications et documents obtenus dans le cadre du projet pilote.

Les bibliothèques participantes sont tenues d'informer les usagers désirant avoir accès aux publications et aux documents obtenus dans le cadre du projet pilote que ceux-ci sont protégés par le droit d'auteur. Elles doivent aussi les informer du processus à suivre pour obtenir l'autorisation de les reproduire en vue de les transmettre à d'autres personnes ou à des organismes externes.
