Permis de bâtir

Octobre 1999

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Current Investment Indicators Section, Investment and Capital Stock Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9689) or to the Statistics Canada Regional Reference Centre in:

Ordering/Subscription information

All prices exclude sales tax

Catalogue no. 64-001-XIB, is available monthly on Internet for CDN \$19.00 per issue or CDN \$186.00 for a one-year subscription. Users can obtain single issues or subscribe at <http://www.statcan.ca/cgi-bin/downpub/feepub.cgi>.

This product is also available on paper through a Print-on-Demand service. The prices for delivery in Canada are \$57.00 per issue and \$350.00 for a one-year subscription. The prices for delivery outside Canada are US \$57.00 per issue and US \$350.00 for a one-year subscription. The paper version can be ordered by mail, at Statistics Canada, Dissemination Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6; by phone, at (613) 951-7277 or 1 800 700-1033; by fax, at (613) 951-1584 or 1 800 889-9734; by Internet, at order@statcan.ca; or in person, at local Statistics Canada offices. For changes of address, please provide both old and new addresses.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Section des indicateurs courants de l'investissement, Division de l'investissement et du stock de capital, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9689) ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

The data published in Building Permits (Catalogue No. 64-001-XPB) are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional centres at the numbers listed on the inside front cover of this publication, or contact the Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, Ontario, K1A 0T6 (613) 951-8200

NOTE CONCERNANT CANSIM

Les données qui sont publiées dans Permis de bâtir (n° 64-001-XPB au catalogue) peuvent être obtenues sous forme lisible par machine, de CANSIM (Système Canadien d'information socio-économique). Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM peuvent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone figurent au verso du couvert de cette publication ou en communiquant directement avec la Division du Marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6 (613)951-8200.

IMPORTANT NOTICE

INTRODUCTION of NUNAVUT

Starting with the release of April 1999 data, the territory of Nunavut has been introduced, affecting at the same time the geographical coverage and data for the Northwest Territories.

AVIS IMPORTANT

INTRODUCTION du NUNAVUT

Débutant avec la relâche des données du mois d'avril 1999, nous introduisons le territoire du Nunavut. Ceci aura un effet sur la couverture géographique et les données pour les Territoires du Nord-Ouest.

Changes in boundaries, status or names of geographical entities that occurred before January 1999, are reflected in this publication. These geographical changes may be obtained by writing to:

Statistics Canada
Investment and Capital Stock Division
Current Investment Indicators Section
9 D-2, Jean Talon Building
Tunney's Pasture
Ottawa, Ontario
K1A 0T6
or by telephoning: (613) 951-9689

Les changements de limites territoriales, de status et de noms d'entités géographiques qui ont eu lieu avant janvier 1999 sont inclus dans la présente publication. Ces changements géographiques sont disponibles en écrivant à:

Statistique Canada
Division de l'investissement et du stock de capital
Section des indicateurs courants de l'investissement
9 D-2, Édifice Jean Talon

PART I: SUMMARY ANALYSIS

PARTIE I: ANALYSE SOMMAIRE

Building permits value up 6.1% in October
La valeur des permis en hausse de 6,1 % en octobre

Highlights

Building Permits

October 1999

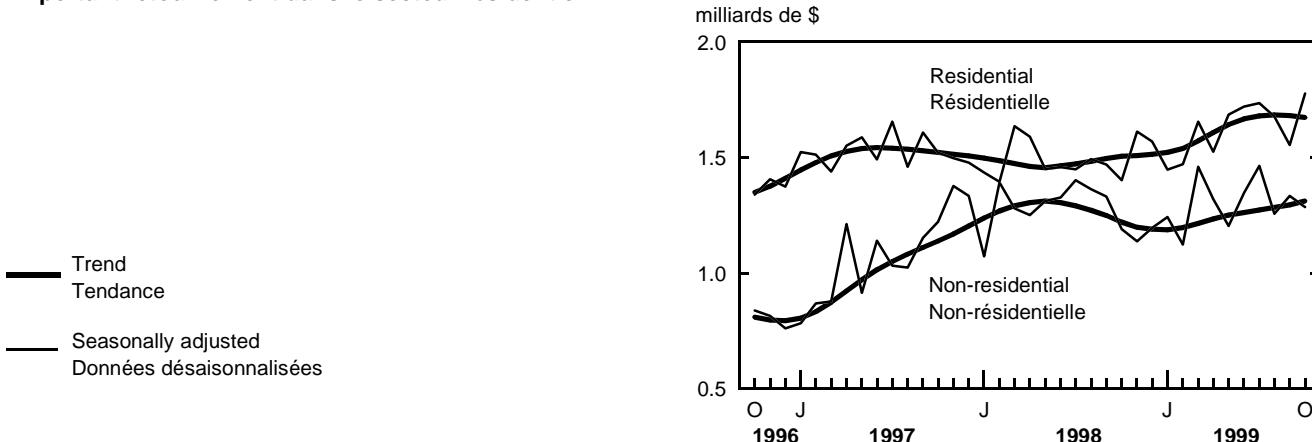

- Municipalities issued \$3.1 billion worth of building permits in October, up 6.1% from September on the strength of robust gains in housing intentions. A slight decline in non-residential permits tempered the overall increase.
- The value of permits in the residential sector increased 14.4% to \$1.8 billion - the best showing since early 1990. This gain reflected strength in intentions for both multi- and single-family dwellings. In contrast, non-residential building permits fell 3.6% to \$1.3 billion, mainly due to declines in the institutional component.
- During the first 10 months of 1999, construction intentions reached \$29.3 billion, up 5.8% from the same period in 1998 - the best result since the construction peak of 1989. Housing intentions recorded the largest increase, up 10.0% to \$16.2 billion, while non-residential permits rose a marginal 0.9% to \$13.0 billion.

Faits saillants

Permis de bâtir

Octobre 1999

- En octobre, la valeur des permis de bâtir délivrés par les municipalités s'élevait à 3,1 milliards de dollars, en hausse de 6,1 % par rapport à septembre. L'augmentation est surtout attribuable à une vigoureuse progression des intentions de construction résidentielle. Une légère baisse de la valeur des permis de construction non résidentielle délivrés est venue tempérer l'augmentation globale.
- La valeur des permis dans le secteur de l'habitation s'est accrue de 14,4 % pour atteindre 1,8 milliard de dollars. Il s'agit du meilleur résultat depuis les premiers mois de 1990. Cette hausse traduit le dynamisme des intentions de construction de logements unifamiliaux et multifamiliaux. Par contre, la valeur des permis de construction dans le secteur non résidentiel a chuté de 3,6 % pour s'établir à 1,3 milliard de dollars, surtout en raison des diminutions enregistrées dans la composante institutionnelle.
- Au cours des dix premiers mois de 1999, la valeur des intentions de construction a atteint 29,3 milliards de dollars, en hausse de 5,8 % par rapport à la même période en 1998. Ce sont les meilleurs chiffres depuis le sommet atteint en 1989. Les intentions de construction résidentielle ont enregistré la plus forte hausse, soit 10,0 %, pour se chiffrer à 16,2 milliards de dollars, tandis que les permis de construction non résidentielle n'ont augmenté que de 0,9 %, s'établissant à 13,0 milliards de dollars.

Large rebound in the residential sector**Important retournement dans le secteur résidentiel****Multi-family dwellings led the way**

- Permits for multi-family dwellings recorded their second best monthly performance in 1999 (+39.5% in October to \$556 million) after two consecutive monthly declines. Moreover, single-family dwelling permits, which rose a significant 5.7% to \$1.2 billion, also helped to push up the overall residential sector
- Recent increases in mortgage rates have apparently not altered consumer confidence, as economic indicators such as retail sales and economic growth remained on an upward trend. These factors, combined with growing employment, point to an active housing market in the coming months.
- At the provincial level, the best showings (in dollars) were in Ontario (+12.8% to \$867 million), British Columbia (+41.2% to \$264 million) and Quebec (+17.1% to \$277 million). In Ontario, both components rose while only multi-family permits increased in British Columbia and Quebec.
- In contrast, the largest declines occurred in Alberta (-6.1% to \$219 million) and in Manitoba (-20.8% to \$30 million). It was the fourth consecutive monthly decline for Alberta.

Les logements multifamiliaux ouvrent la voie

- Les permis de construction de logements multifamiliaux ont connu leur deuxième meilleur rendement de 1999, enregistrant une hausse de 39,5 % en octobre et atteignant ainsi 556 millions de dollars, après deux baisses mensuelles consécutives. En outre, la valeur des permis de construction de logements unifamiliaux s'est établie à 1,2 milliard de dollars, grâce à une hausse appréciable de 5,7 %. Cette hausse a contribué à l'augmentation globale du secteur résidentiel .
- Les majorations récentes des taux hypothécaires n'ont apparemment pas ébranlé la confiance des consommateurs, les indicateurs économiques tels que les ventes au détail et la croissance économique demeurant en hausse. Ces facteurs, conjugués à une croissance de l'emploi, laissent présager un marché actif de l'habitation pour les mois à venir.
- À l'échelon provincial, les meilleures résultats (en dollars) ont été enregistrées en Ontario (+12,8 %, pour s'établir à 867 millions de dollars), en Colombie-Britannique (+41,2 %, pour se chiffrer à 264 millions de dollars) et au Québec (+17,1 %, pour atteindre 277 millions de dollars). En Ontario, les deux composantes étaient en hausse tandis que seulement les permis de construction de logements multifamiliaux augmentaient en Colombie-Britannique et au Québec.
- À titre de comparaison, les plus fortes baisses se sont produites en Alberta (-6,1 %, pour se chiffrer à 219 millions de dollars) et au Manitoba (-20,8 %, pour s'établir à 30 millions de dollars). C'est la quatrième baisse mensuelle consécutive pour l'Alberta.

- From January to October, the good standing of the residential sector has been supported by buoyant gains in both single-family (+9.1% to \$11.7 billion) and multi-family (+12.3% to \$4.6 billion) dwelling construction intentions. Accordingly, the cumulative value up to October is the best result of the decade for the residential sector.
- On a year-to-date basis, the largest gains occurred in Ontario, Quebec and Nova Scotia, which were due to advances in both the single- and multiple-family components. In the western provinces, British Columbia and Alberta were hit by the largest losses. Manitoba was the only western province that surpassed its 1998 level.
- De janvier à octobre 1999, la bonne tenue du secteur résidentiel a été soutenue par la vigueur des progressions dans les intentions de construction de logements unifamiliaux (+9,1 %, pour atteindre 11,7 milliards de dollars) et de logements multifamiliaux (+12,3 %, pour se chiffrer à 4,6 milliards de dollars). Par conséquent, la valeur cumulative jusqu'à octobre représente le meilleur résultat de la décennie pour le secteur résidentiel.
- Depuis le début de l'année, les plus forts accroissements ont été observés en Ontario, au Québec et en Nouvelle-Écosse, en raison des hausses dans les composantes des logements unifamiliaux et des logements multifamiliaux. Dans les provinces de l'Ouest, la Colombie-Britannique et l'Alberta sont les provinces qui ont subi les plus grandes pertes. Le Manitoba est la seule province de l'Ouest qui a réussi à dépasser son niveau de 1998.

Institutional projects dropped sharply

- In October, the value of non-residential building permits stood at \$1.3 billion, a 3.6% decrease from September. In the first 10 months of this year, the overall value for the non-residential sector reached \$13.0 billion, up a modest 0.9% compared with the same period in 1998.
- A sharp drop in building permits for institutions was behind the overall decline in non-residential intentions in October. Municipalities issued \$262 million in permits for institutional buildings, down 34.9% from September's record-setting level. All categories of institutional buildings declined, especially the education category, with the exception of the welfare/home category. However, at \$3.1 billion (+11.5% over 1998), the value of institutional permits issued between January to October was the highest level on record for that period.
- Industrial construction intentions increased 27.8% to \$379 million in October, led by gains in the factories/plants category. However, for the first 10 months of 1999, industrial permits, at \$3.2 billion, were down 5.4% compared with the same period in 1998.

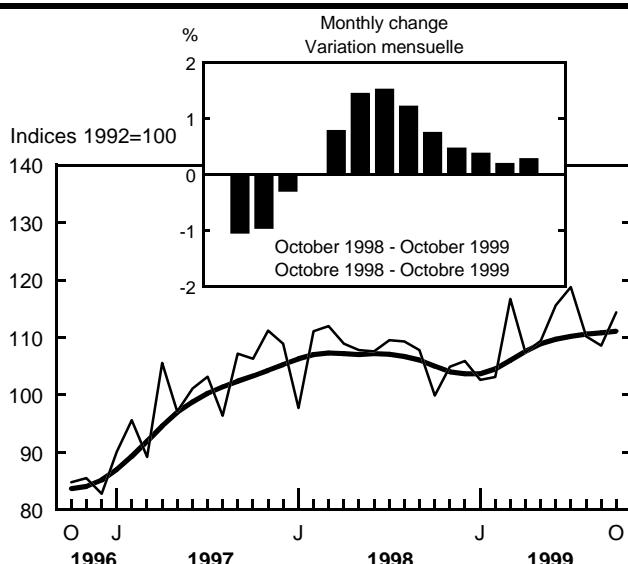

Les projets de construction institutionnelle chutent de façon marquée

- En octobre, la valeur des permis de bâtir dans le secteur non résidentiel s'élevait à 1,3 milliard de dollars, en baisse de 3,6 % par rapport à septembre. Au cours des dix premiers mois de l'année, la valeur globale dans le secteur non résidentiel a atteint 13,0 milliards de dollars, légèrement en hausse (+0,9 %) par rapport à la même période en 1998.
- La forte baisse des permis de bâtir dans le secteur institutionnel est à l'origine de la diminution globale des intentions de construction non résidentielle en octobre. La valeur des permis de construction délivrés par les municipalités dans le secteur institutionnel s'est établie à 262 millions de dollars, en baisse de 34,9 % par rapport au niveau record de septembre. Toutes les catégories d'immeubles institutionnels ont enregistré une baisse, en particulier la catégorie de l'éducation, à l'exception des immeubles de services sociaux et de maisons de repos. Cependant, à 3,1 milliards de dollars (en hausse de 11,5 % par rapport à 1998), la valeur des permis de construction institutionnelle délivrés de janvier à octobre 1999 n'a jamais été aussi élevée pour cette période.
- Les intentions de construction industrielle ont augmenté de 27,8 % pour atteindre 379 millions de dollars en octobre, la catégorie des fabriques et des usines ouvrant la voie. Cependant, pour les 10 premiers mois de 1999, les permis dans le secteur industriel étaient en baisse de 5,4 % par rapport à la même période en 1998, s'établissant à 3,2 milliards.

- In October, the commercial component showed a slight 1.6% increase to \$644 million, with the largest increase in recreation projects. On a 10-month basis, commercial projects were down 0.2% to \$6.8 billion compared with the same period in 1998.
- Among the provinces, the most significant monthly increases in the non-residential sector (in dollars) were in Nova Scotia (+124.8% to \$46 million) - essentially the result of school projects - and in Quebec (+7.3% to \$241 million), due mostly to the commercial component. The largest decrease occurred in Ontario (-12.5% to \$525 million), mainly the result of a decline in the institutional component. As well, declines occurred in all the western provinces.
- For the first 10 months of 1999, Ontario had the largest increase in the non-residential sector, followed by Nova Scotia and Quebec. Alberta recorded the biggest decline, followed by Manitoba and New Brunswick.
- En octobre, la composante commerciale a enregistré une légère augmentation (+1,6 % pour se chiffrer à 644 millions de dollars), la plus forte augmentation touchant les projets récréatifs. En considérant la valeur cumulative, les projets commerciaux étaient en baisse de 0,2 % par rapport à la même période en 1998, se chiffrant à 6,8 milliards de dollars.
- À l'échelle provinciale, on a constaté les plus fortes augmentations mensuelles dans le secteur non résidentiel (en dollars) en Nouvelle-Écosse (+124,8 %, pour atteindre 46 millions de dollars), principalement en raison de projets scolaires, et au Québec (+7,3 %, pour s'établir à 241 millions de dollars), surtout grâce à la composante commerciale. La plus forte baisse a été enregistrée en Ontario (-12,5 %, pour se chiffrer à 525 millions de dollars), principalement attribuable à la composante institutionnelle. Toutes les provinces de l'Ouest ont également enregistré des diminutions.
- Pour les 10 premiers mois de 1999, c'est l'Ontario qui a connu la plus forte augmentation dans le secteur non résidentiel, suivie de la Nouvelle-Écosse et du Québec. Par contre, l'Alberta a accusé la plus forte baisse, suivie du Manitoba et du Nouveau-Brunswick.

Building Permits Indices¹
Indices des permis de bâtir¹

- Trend-cycle²
Tendance-cycle²
- Seasonally adjusted
Désaisonnalisées

¹ This series is deflated by using the construction input price index, which includes costs of material and labour.

¹ Cette série est dégonflée à l'aide de l'indice des prix des intrants dans le secteur de la construction, soit le coût du matériel et de la main-d'oeuvre.

² The trend-cycle shows the seasonally adjusted value of Building Permits without irregular influences, that can obscure the short-term trend.

² La tendance-cycle exprime la valeur désaisonnalisée des permis de bâtir, nette de toutes variations irrégulières qui peuvent masquer la tendance à court terme.

Building Permits Indices

- With the release of April 1999 data, the territory of Nunavut has been introduced, affecting at the same time the geographical coverage and data for the Northwest Territories.
- The short-term trend for building permits, which smooth irregular month-to-month movement not sustained over a long period, has generally exhibited an upward pattern between January 1996 and the first quarter of 1998. In 1998, the trend declined steadily, although not sharply. Since January 1999, the trend never stopped to grow, and reached 111.1 in October, up 5.8% over the level of October 1998.
- In the residential sector, the short-term trend had been generally on the rise until September 1997. In the first months of 1998, the trend declined but showed a turnaround in the midst of 1998, more than offsetting the losses. Finally, the trend followed a more stable path since the middle of 1999 to reach 95.6 in October, still 6.9% higher than the level recorded in October 1998.
- Considering the non-residential sector, the trend had been on a decline since June 1998 after a continuous rise in 1997. The situation had moved to a steady rise in the beginning of 1999, and never stopped to grow since. In October, the index surpassed once again its 1998 level to reach 138.3, up 4.5% the result of October 1998.

Indices des permis de bâtir

- Avec la relâche des données pour le mois d'avril 1999, on introduit le territoire du Nunavut, ce qui aura un effet sur la couverture géographique et les données pour les Territoires du Nord-Ouest.
- La tendance à court terme de la construction, laquelle aplani les mouvements irréguliers qui d'un mois à l'autre ne sont pas maintenus au cours d'une longue période, a montré une tendance généralement à la hausse entre janvier 1996 et le premier trimestre de 1998. En 1998, la tendance a diminué de façon continue, mais pas drastiquement. Depuis janvier 1999, la tendance n'a jamais arrêté de monter pour atteindre 111.1 en octobre, en hausse de 5.8% par rapport au résultat d'octobre 1998.
- Dans le secteur résidentiel, la tendance à court terme a été généralement en hausse jusqu'en Septembre 1997. Dans les premiers mois de 1998, la tendance a diminué mais a montré un revirement au milieu de la même année, effaçant du même coup les pertes. Enfin, la tendance a poursuivi une tendance plus stable depuis le milieu de 1999 pour atteindre 95.6 en Octobre, ce qui est encore 6.9% supérieur au niveau enregistré pour Octobre 1998.
- Au niveau du secteur non-résidentiel, la tendance avait été sur une pente descendante depuis juin 1998, et ce, après une croissance continue en 1997. La situation a toutefois évolué vers une hausse continue depuis le début de l'année 1999, de sorte que l'indice d'octobre a surpassé son niveau de 1998, pour atteindre 138.3, ce qui représente une hausse de 4.5% par rapport à l'an dernier.

¹ Indices are based on the value of the building permits issued and comprise the two following stages: deflation (1992=100) and seasonal adjustment of data. For more details on the methodology see section III of the publication.

¹ Les indices sont basés sur la valeur des permis de bâtir émis et comprennent les deux étapes suivantes: dégonflement (1992=100) et désaisonnalisation des données. Pour plus de détails concernant la méthodologie, consultez la section III de la publication.

¹ Indices are based on the value of the building permits issued and comprise the following three stages: deflation (1992=100) seasonal adjustment and filtering of data (based on Henderson 23 terms moving average) to produce a trend-cycle. For more details on the methodology see section III of the publication.

¹ Les indices sont basés sur la valeur des permis de bâtir émis et comprennent les trois étapes suivantes: dégonflement (1992=100), désaisonnalisation et lissage (basés sur la méthode de moyenne mobile d'Henderson 23 termes) afin de produire une tendance-cycle. Pour plus de détails concernant la méthodologie, consultez la section III de la publication.

**PART II: CURRENT DATA
(UNADJUSTED)**

**PARTIE II: DONNÉES COURANTES
(NON DÉSAISONNALISÉES)**

| 1,000 - 49,000 | 4 | 175 | 44 | - | - | - |

Building Permits data being generally subject to varying degree of under valuation, users should be cautious in making comparison from one area to another. It is however believed that average building (excluding land) cost trend within any area is reliable.

Les données sur les Permis de bâtir étant sujettes à divers niveaux de sous-évaluation doivent être utilisées avec prudence lorsqu'il s'agit d'établir des comparaisons d'une région à une autre. Cependant le mouvement de la valeur moyenne des bâtiments (à l'exclusion du terrain) pour une région s'avère fiable.

² Refer to projects valued at less than \$250,000 for which the breakdown by type of building is not available.

² Réfère aux projets dont la valeur est inférieure à \$250,000 pour lesquels la ventilation par genre de bâtiment n'est pas disponible.

**PART III: METHODOLOGY,
CONCEPTS AND DATA
DISSEMINATION**

**PARTIE III: MÉTHODOLOGIE,
CONCEPTS ET DIFFUSIONS
DES DONNÉES**

Introduction

The purpose of the monthly survey of building permits issued by Canadian municipalities is to collect data on construction intentions. The results of this survey are used by C.M.H.C.¹ as a reference base for conducting a monthly survey of housing starts and completions in accordance with its mandate. The statistics on building permits are also essential for the computation of capital expenditures. Furthermore, since the issuance of a building permit is one of the first steps in the construction process, these statistics are widely used as a leading indicator of building activity.

Survey Methodology

The Building Permits Survey covers all Canadian municipalities that issue permits. The number of Canadian municipalities currently surveyed exceeds 2,600, representing all the provinces and territories. They account for 94% of the Canadian population. Participation to the survey being voluntary, the survey does not use a predetermined sample of municipalities. In practice, all urban agglomerations are represented in the survey, as well as a fair percentage of rural municipalities. With certain exceptions, the minimum coverage corresponds to the municipalities already included in the Housing Starts and Completions Survey. Non-responding municipalities that issue permits are urged on a regular basis to respond to the survey. Therefore, the number of municipalities covered is increasing continually.

Collection of Data

The survey is usually conducted by mail, although certain municipalities have the option of responding by telephone. The municipal officer responsible for issuing permits is asked to fill out a form² each month describing all major construction projects. The value of the permits reported includes the following expenditures: materials, labour, profit and overhead. The cost of land is never included in the estimated value of the permit while acquisition costs (legal fees, surveying fees and accrued interest) may be included at times.

The municipalities forward a copy of their completed report to the nearest regional office of Statistics Canada and another copy to the local office of the Canada Mortgage and Housing Corporation (C.M.H.C.). To reduce their overhead, an increasing number of respondents are producing a computerized report.

Reports from municipalities which are part of a census metropolitan area or a census agglomeration must be received within 20 days following the month of reference. The other municipalities have 30 days to produce their reports. Only those municipalities that are late in reporting and that are included in the above-mentioned C.M.H.C. survey are subject to follow-up by telephone.

² A sample of the Building Permit Form is shown in annex at the end of this section.

Introduction

L'enquête mensuelle sur les permis de bâtir menée auprès des municipalités canadiennes vise à recueillir des informations sur les intentions de construction. Les résultats de cette enquête servent d'une part de base de référence à la S.C.H.L.¹ dont l'un des mandats est d'effectuer le relevé mensuel du nombre de logements mis en chantier et parachevés. D'autre part, la statistique sur les permis de bâtir constitue un élément essentiel dans le calcul des dépenses d'immobilisation. De plus l'émission du permis de bâtir étant l'une des premières étapes du processus de construction, cette statistique est grandement utilisée comme indicateur avancé de cette activité.

Méthodologie de l'enquête

L'enquête "Permis de bâtir" vise toutes les municipalités canadiennes émettant des permis. Celles-ci au nombre de 2,600 en provenance de toutes les provinces et territoires regroupent 94% de la population canadienne. Elles ne font pas l'objet d'un échantillon pré-déterminé, elles participent plutôt à cette enquête sur une base volontaire. En pratique, toutes les agglomérations urbaines y sont représentées ainsi qu'un bon pourcentage des municipalités rurales. Sauf exception, l'enquête couvre au minimum les municipalités déjà incluses dans l'enquête "Logements mis en chantier et parachevés". Sur une base régulière les municipalités non-répondantes et émettant des permis sont incitées à répondre à l'enquête. De ce fait, le nombre de municipalités couvertes s'accroît continuellement.

Collecte de données

L'enquête est généralement menée par la poste bien que certaines municipalités puissent choisir de répondre par téléphone. L'agent municipal responsable de l'émission des permis rempli mensuellement un formulaire² sur lequel chacun des projets de construction d'envergure doit être décrit. La valeur des permis rapportés comprend les dépenses suivantes: matériaux, main d'œuvre, profits et frais généraux. Le coût du terrain n'est jamais inclus dans la valeur estimative du permis tandis que les frais d'acquisition (actes notariés, frais d'arpentage, intérêts encourus) peuvent à l'occasion y être intégrés.

Après avoir rempli leur rapport, les municipalités en acheminent une copie au bureau régional de Statistique Canada le plus proche et l'autre au bureau local de la Société canadienne d'hypothèques et du logement (S.C.H.L.). Afin de réduire leur fardeau, de plus en plus de répondants produisent un rapport informatisé.

Les rapports des municipalités qui font parties d'une région métropolitaine de recensement ou d'une agglomération de recensement doivent nous parvenir dans les 20 jours suivant le mois visé. Les autres municipalités ont 30 jours pour produire leur rapport. Seules les municipalités retardataires, incluses dans l'enquête de la S.C.H.L. ci-haut mentionnée, font l'objet d'un suivi téléphonique.

))))))))

¹ Société Canadienne d'hypothèques et du logement.
² Un spécimen du formulaire "Permis de bâtir" est montré en annexe à la fin de cette section.

The reports received at our regional offices are verified, coded and processed; the data is then forwarded to Statistics Canada Head Office.

Types of Errors

Since the building permit data are extracted from municipal administrative documents, two types of response errors are possible: errors attributable to the permit applicant and errors in transcription by the responding municipality. However, experience has shown that transcription errors are not very common and the increasing number of municipalities producing computerized reports tends to reduce the frequency of this type of error. Errors attributable to a false statement of the cost of construction are more probable. A qualitative survey conducted among major Canadian municipalities has revealed an underestimation of the declared value of buildings for which permits are issued. Since permit fees are in most cases based on the value of the construction, this leads unquestionably to underestimation of project values. The results of that survey also reveal that, in half of the municipalities covered, the value submitted by the applicant is not subject to any verification by municipal officers.

Quality Control

Strict quality control procedures are applied to ensure that collection, coding and data processing are as accurate as possible. In addition to the usual checks to ensure that the forms are fully completed, quality control procedures established by the Business Survey Methods Division are applied to the coded and processed data. Checks are also performed on totals and the magnitude of data. Reports that fail to meet the quality standards are subject to verification and are corrected as required.

Reliability

The data presented in this publication are solely those supplied by the respondents. No imputation is done for lack of coverage, concealment or the underevaluation of permits issued. For this reason, the sampling error cannot be computed.

Comparison of data must be done with reservation considering that the methods of issuing permits and the methods of estimating building values can differ from one municipality to another. Also, comparisons involving different periods must take into account the constant increase in the number of municipalities participating in the survey.

The monthly statistics are not corrected for cancelled or expired permits. According to the municipal officers, the proportion of cancelled and unused permits is below 5%.

A leur réception dans nos bureaux régionaux, les rapports sont vérifiés, codés et saisis; l'information est par la suite acheminée au bureau central de Statistique Canada.

Types d'erreurs

Les données sur les permis de bâtir étant extraites de documents administratifs municipaux, deux types d'erreurs de réponse sont possibles: les erreurs imputables au demandeur de permis et les erreurs de transcription faites par la municipalité répondante. L'expérience prouve que les erreurs de transcription sont peu fréquentes. De plus, du fait qu'un nombre croissant de municipalités produisent des rapports automatisés la fréquence de ce type d'erreur tend à diminuer. Toutefois, les erreurs provenant d'une déclaration erronée du coût du projet de construction sont toujours probables. Une enquête sur "La qualité des données permis de bâtir" tenue auprès des principales administrations municipales canadiennes a révélé que la valeur déclarée des bâtiments pour lesquels un permis est émis est généralement sous-évaluée. Le mode de tarification des permis qui, dans la plupart des cas, est établi en fonction de la valeur de construction mène indubitablement à une sous-évaluation de la valeur des projets. De plus, les résultats de cette enquête révèlent que pour la moitié des municipalités enquêtées, la valeur soumise par le demandeur ne fait l'objet d'aucune vérification de la part des agents municipaux.

Contrôle qualitatif

Des procédures de contrôle qualitatif rigoureuses sont utilisées afin de s'assurer que la collecte, la codification ainsi que le traitement des données sont effectués avec le plus de précision possible. En plus des vérifications habituelles visant à s'assurer que les formulaires sont complètement remplis, les données codées et saisies sont soumises à un contrôle qualitatif établi par la Division des méthodes d'enquêtes-entreprises. Des vérifications sont également exercées sur les totalisations et l'ordre de grandeur des données. Chaque rapport qui ne répond pas aux critères de qualité retenus fait l'objet d'une vérification et est corrigé au besoin.

Fiabilité

Les données présentées dans cette publication sont uniquement celles fournies par les répondants. Aucune imputation n'est faite pour le manque de couverture, la clandestinité ou la sous-évaluation des permis émis. Pour cette raison, l'erreur d'échantillonnage ne peut être calculée.

Toute comparaison de données doit être faite avec réserve étant donné que les modalités d'émission de permis ainsi que les méthodes d'estimation des valeurs peuvent différer d'une municipalité à l'autre. De plus, puisque le nombre de municipalités participant à l'enquête s'accroît constamment, on doit tenir compte de ce fait lors de comparaisons touchant des périodes différentes.

Les statistiques mensuelles ne font pas l'objet de correction pour les permis annulés ou périssés. D'après les agents municipaux, le volume d'annulation ou d'inutilisation est inférieur à 5%.

Survey Coverage

The observed monthly rate of coverage is shown in table 14 on a provincial and infraprovincial basis (economic region, CMA, CA, rural area). For any given geographical entity, it is obtained by dividing the population of reporting municipalities by the total population of the area under study. The reference base for these computations is the population as determined by the 1996 Census.

Nature of and Basis for Classification

The classification used in this publication deals strictly with **structures** for which a building permit was issued. Permits are generally issued for the following: construction of new buildings, alterations, additions, renovations, etc. Minor repair jobs such as painting, tiling, roofing, etc., for which no permit is required, and engineering work (such as dams, roads, pipelines, etc.), which, by definition, is not a building, are not included in the building permit series. Estimates of such work may be obtained from the publications Capital expenditures by type of asset (cat. no 61-223) and Private and Public Investment in Canada Intentions (cat. no 61-205).

The description given by the municipalities as to the **type of building** (box #6 of Section A on the form) and the **type of work** involved (box #7 of Section A on the form) forms the basis for classification. The classification of buildings into major groups and subgroups is based on the following: intended use in the case of new buildings; present or intended use of buildings to which improvements are to be made; present use of the existing structure where the proposed construction is intended to provide additional facilities; principal use of the structure where the proposed construction has more than one intended use; however, where the building contains dwellings, the value of the construction is divided between residential and non-residential use.

Building Categories

This publication, uses the following classification for the **value of permits issued** for construction of new buildings or for improvements: residential, industrial, commercial, institutional and government.

Residential. Includes all buildings intended for private occupancy whether on a permanent basis or not. Dwellings are divided into the following types: single-family, mobile, cottage, semi-detached, row house and apartment building.

Industrial. Includes all buildings used for manufacturing and processing; transportation, communication and other utilities, and agriculture, forestry and mining.

Couverture observée

Le taux de couverture observé paraît mensuellement au tableau 14 et est donné sur une base provinciale et infraprovinciale (région économique, RMR, AR, région rurale). Il est obtenu en divisant la population des municipalités rapportantes par la population totale des entités géographiques représentées. La base de référence de ces calculs est la population telle que dénombrée au recensement de 1996.

Nature et fondement de la classification

La classification utilisée dans la présente publication porte strictement sur les **bâtiments** pour lesquels un permis de bâtir a été émis. Généralement les permis émis correspondent aux travaux suivants: construction de nouveaux bâtiments, transformation de logement, ajout structurel, rénovation, etc. Les travaux de réparation (peinture, réfection de plancher, de toiture, etc.) pour lesquels aucun permis n'est requis et les travaux de génie (tels les barrages, les routes, les oléoducs, etc.), qui par définition ne sont pas des bâtiments, ne sont pas compris dans la présente statistique. Des estimations de ces travaux sont toutefois disponibles en consultant "Dépenses en immobilisations par type d'actif" (no 61-223 au catalogue) et "Investissements privés et publics" (no 61-205 au catalogue).

La description fournie par les municipalités concernant le **type de bâtiment** (case #6 de la Section A du formulaire) ainsi que le **type de travail** à effectuer (case #7 de la Section A du formulaire) constitue le fondement de la classification. La classification des bâtiments en groupes ou sous-groupes principaux se fondent sur les éléments suivants: la destination prévue, dans le cas des immeubles nouveaux; l'utilisation réelle ou prévue des bâtiments auxquels des améliorations sont effectuées; affiliation de l'immeuble où la construction envisagée a pour objet d'assurer des commodités accessoires; la principale utilisation de l'ensemble lorsque la construction projetée est destinée à plus d'une fin, toutefois lorsque le bâtiment abrite des logements on procède à la répartition de la valeur des travaux entre l'usage résidentiel et non résidentiel.

Catégories de bâtiments

Dans cette publication la **valeur des permis émis** soit pour l'érection de nouveaux édifices ou pour l'exécution de travaux d'amélioration sont regroupés d'après les genres de bâtiments suivants: résidentiel, industriel, commercial, institutionnel et gouvernemental.

Construction résidentielle. Comprend tout bâtiment destiné à l'occupation privée soit sur une base permanente ou non. Les logements sont regroupés sous les types suivants: les logements unifamiliaux, mobiles, chalets, semi-détachés, en rangée ainsi que les appartements.

Construction industrielle. Englobe tout bâtiment destiné à la fabrication ou à la transformation de produits; au transport, aux communications et autres services d'utilité publique, à l'agriculture, à la sylviculture ainsi qu'à l'exploitation minière.

Commercial. Includes all buildings used to house activities related to the tertiary sector, such as stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial installations such as signs, billboards, etc.

Institutional and Government. Includes expenditures made by the community, public and government for buildings and structures like schools, universities, hospitals, clinics, churches, homes for the aged.

The **number of dwelling units** indicates the number of self contained dwelling units created. This should not be confused with the number of structures. For example, an apartment building containing six dwellings will be shown as six dwelling units. When an existing structure is converted into additional housing units, the number of units added is included. This publication uses the following classification for dwelling units:

Single-family. Refers to dwellings commonly called "**single house**". It includes single dwellings that are completely isolated on all sides, including single dwellings linked to other dwellings below ground. Included are bungalows, split levels, two-storey single-family homes built by conventional methods or prefabricated.

Mobile homes. Refers to houses designed and constructed to be transported on their own chassis and for easy moving.

Cottage. Refers to dwellings that cannot be occupied year-round or on a permanent basis because the facilities required for comfort are inadequate.

Double or Semi-detached. Refers to dwellings in which each of the two dwellings are side by side and joined by a common wall or garage, but not attached to any other building and surrounded by open space.

Row Dwellings. Refers to a row of three or more dwellings attached to each other without dwellings above or below.

Apartment Building. Includes dwellings in a variety of buildings such as duplexes, semi-detached duplexes, triplexes, row duplexes, apartments as such and dwellings adjacent to non-residential structures.

Conversion. Refers to the number of dwellings added by conversion of existing structures.

Construction commerciale. Il s'agit de tout bâtiment destiné à abriter des activités se rattachant au secteur tertiaire. Par exemple: les magasins, entrepôts, garages, immeubles à bureaux, théâtres, hôtels, salons funéraires, salons de beauté, ainsi que des installations commerciales diverses tel que les enseignes, affiches, etc.

Construction institutionnelle et gouvernementale. Comprend les dépenses faites par les collectivités, les corps publics et les gouvernements pour la construction d'immeubles ou bâtiments; par exemple, écoles, universités, hôpitaux, cliniques, églises, foyers de vieillards.

Le **nombre d'unités de logements** correspond au nombre de logements indépendants créés. Il ne faut pas confondre avec le nombre de structures. Par exemple, dans le cas d'un édifice à appartements comptant six logements on fera référence à six unités de logement. Dans le cas de transformation de bâtiments en unités de logement additionnelles, on tient compte du nombre de nouvelles unités créées. Dans cette publication les unités de logements sont regroupées de la façon suivante:

Maison unifamiliale. Ce genre de logement est communément appelé "**maison simple**". Il comprend les logements individuels complètement isolés de tout côté, y compris les maisons individuelles liées à un autre logement uniquement sous le sol. Sont inclus les unifamiliales à deux étages, les bungalows, split level, qu'ils soient construits de façon conventionnelle ou préfabriquée.

Maison mobile. Maison conçue et construite pour être transportée sur son propre châssis et qu'on peut déplacer sans grand délai.

Chalet. Logement qui ne peut être habité à l'année ou en permanence puisque les installations nécessaires au confort sont insuffisantes.

Maison double ou semi-détachée. Correspond à toute maison d'habitation où chacun des deux logements sont côté à côté réunis soit par un mur commun ou un garage, mais non attenants à une autre construction et entourés d'espaces libres.

Maison en rangée. Il s'agit d'une rangée d'au moins trois logements réunis côté à côté sans autre logement au-dessus ou au-dessous.

Maison d'appartements. Cette catégorie inclut les logements compris dans une variété de bâtiments tels que: les duplex, les duplex jumelés, les triplex, les duplex en rangée, les appartements proprement dit et les logements adjacents à tout édifice non domiciliaire.

Transformation. Il s'agit du nombre de logements ajoutés par suite de la transformation d'un bâtiment déjà existant.

Geographic Classification

Geographic entities are classified according to Standard Geographical Classification (SGC) used by Statistics Canada. Each reporting entity is assigned a twelve-digit SGC code for identification according to the following geographic levels:

- **Province and Territory (PR)** : There are ten provinces and two territories.
- **Economic Region (ER)**: Refers to infraprovincial regions established by the Standards Division of Statistics Canada in 1976. There are seventy-four ERs.
- **Census Division (CD)**: Refers to a group of census subdivisions established by provincial law. There are two hundred and eighty-eight CDs (data on this geographic group is available on request).
- **Census Metropolitan Area (CMA)**: Its delineation corresponds to the 1986 Census definition. The term CMA refers to the main labour market area of an urban area (the urbanized core) of at least 100,000 population, based on the Census population figures. The twenty-five CMAs are shown in this publication. Although the 1986 Census defines the Ottawa-Hull area as a single CMA, the area is shown in this publication as two separate entities since it is located in two different provinces.
- **Census Agglomeration (CA)**: Refers to the smaller labour market area of an urbanized core of at least 10,000 population, as defined by the 1991 Census. There are one hundred and twelve CAs in Canada. When a CA overlaps the boundaries of two provinces, it is shown partly in each province. The Lloydminster agglomeration is an exception to this rule. It is treated as if it was totally located in Alberta.
- **Other Municipalities of at Least 10,000 Population**: Refers to municipalities not included in census agglomerations but with populations of at least 10,000 inhabitants. The distinction is made between these municipalities and CAs in order to permit comparison between the Building Permits Survey and the Housing Starts and Completions Survey which refers to this geographical concept.
- **Rural Area**: Refers to all geographic entities not included in a CMA or CA and not identified as an urban centre by the Canada Mortgage and Housing Corporation.

Classification géographique

Les entités géographiques sont classifiées selon la Classification Géographique Type (CGT) en usage à Statistique Canada. Un code (CGT) de douze chiffres a été attribué à chaque entité rapportante afin de pouvoir les classifier selon les niveaux géographiques suivants:

- **Province et territoire (Pr)**: On compte dix provinces et deux territoires.
- **Région économique (RE)**: Il s'agit des régions infra-provinciales de Statistique Canada établies par la Division des normes en 1976. On en compte soixante-quatorze.
- **Division de recensement (DR)**: L'expression division de recensement signifie un regroupement de subdivision de recensement établie par une loi provinciale. On en dénombre deux cent quatre-vingt-huit (des données sous un tel regroupement géographique sont disponibles sur demande).
- **Région métropolitaine de recensement (RMR)**: Leur délimitation correspond à la définition du recensement de 1986. Le terme (RUR) désigne la principale zone du marché du travail d'une région urbaine (noyau urbanisé) comptant 100,000 habitants ou plus, d'après les chiffres de population du recensement. Les vingt-cinq (RMR) figurent dans cette publication. Toutefois, bien que le recensement de 1986 définisse Ottawa-Hull comme une seule (RMR), elle est présentée ici en deux entités distinctes étant donné qu'elles sont situées dans des provinces différentes.
- **Agglomération de recensement (AR)**: Elle correspond aux zones des marchés de travail moins vastes des noyaux urbanisés comptant 10,000 habitants ou plus, tel que défini au recensement de 1991. On compte cent douze (AR) au Canada. Lorsqu'une (AR) chevauche deux provinces elle est présentée partiellement dans chacune de celles-ci. L'agglomération de Lloydminster fait toutefois exception à cette règle, paraissant en totalité en Alberta.
- **Autres municipalités de 10,000 de population et plus**: Il s'agit de municipalités ne faisant pas partie d'agglomérations de recensement dont la taille est d'environ 10,000 habitants. On distingue ces municipalités afin de rendre possible la comparaison entre l'enquête sur les permis de bâtir et celle sur les mises en chantier qui utilise ce concept.
- **Partie rurale**: Sont regroupés sous cette rubrique toutes les entités géographiques ne faisant pas partie d'un (RMR) ou d'une (AR) et n'étant pas non plus un centre urbain identifié par la Société Canadienne d'hypothèques et de logement.

- **Census Subdivision (CSD):** Refers to the general term applying to municipalities, Indian reserves, Indian settlements and unorganized territories. However, since Indian reserves and settlements do not issue building permits, they are not included in this publication.
- **Non-standard Geographic Unit:** The geographic units shown in this publication do not all satisfy the above definition of census subdivision. Some provincial or municipal administrations producing monthly reports do not correspond to the official geographic entities; they are nevertheless shown in this publication under the geographic entity used by these administrations. These so-called non-standard geographic units are few in number and are mostly concentrated in the Maritime provinces; e.g. 'Commission d'urbanisme de Madawaska', Cape Breton Planning Commission, Greater Moncton District, Acadian Peninsula, etc.
- **Sub-division de recensement (SDR):** L'expression subdivision de recensement se rattache aux municipalités, aux réserves indiennes, aux établissements et aux territoires non organisés. Toutefois étant donné que les établissements et les réserves indiennes n'émettent pas de permis de bâtir elles ne sont pas comprises dans cette publication.
- **Unité géographique non-standard:** Les unités géographiques qui apparaissent dans cette publication ne correspondent pas toutes à la définition de subdivision de recensement tel que défini ci-haut. Certaines administrations provinciales ou municipales étant dans l'impossibilité de produire des rapports mensuels conformes aux entités géographiques officielles, nous les publions selon l'entité géographique utilisée par ces administrations. Ces unités géographiques dites non-standards ne sont cependant pas très nombreuses et sont surtout concentrées dans les provinces maritimes. Exemples: Commission d'urbanisme de Madawaska, 'Cape Breton Planning Commission', 'Greater Moncton District', Péninsule Acadienne, etc.

Territorial Revisions

Territorial boundaries were established according to the 1991 Census definitions. Changes in boundaries, status or name of census subdivisions between censuses are introduced in this publication on a yearly basis. Changes affecting the other geographic units (CMAs, CAs, CDs and ERs) are introduced every five years, eighteen months following the census.

Revision of Data

Two types of revisions can affect the results of the Building Permits Survey:

(1) Revisions Due to the Correction of Coding Errors

These types of revisions are done on a monthly basis only to the data pertaining to the month preceding the reference period.

(2) Revisions Due to the addition of Late Reports

Late reports for the month preceding the reference period are incorporated into the survey results on a continuing basis. However, reports received after the two-month deadline following the reference month are introduced only at the end of the year. As a result, the data for the last twelve months are subject to revision.

Révisions territoriales

Les limites territoriales ont été établies conformément aux définitions du recensement de 1991. Durant les périodes intercensitaires les changements de limites, de statuts et de noms des (SDR) sont introduits dans cette publication sur une base annuelle. Les changements affectant les autres unités géographiques (RMR, AR, DR, RE) sont pour leurs parts incorporés sur base quinquennale dix huit mois après la tenue du recensement.

Révision des données

Les révisions pouvant affecter les résultats de l'enquête sur les permis de bâtir sont de deux natures:

(1) Révisions dues à la correction d'erreurs de codage

Mensuellement, seules les données du mois précédent la période de référence peuvent être affectées par de telles révisions.

(2) Révisions dues à l'addition de rapports tardifs

Les rapports tardifs se rapportant au mois précédent la période de référence sont incorporés aux résultats de l'enquête sur une base courante. Cependant les rapports reçus après la limite de deux mois suivant le mois de référence ne sont introduits qu'à la fin de l'année. Par conséquent, les données des douze derniers mois sont sujets à révision.

Adjustment for Seasonality

Seasonally adjusted data for the total number of housing units as well as for the aggregate value of building permits are obtained indirectly, i.e., by adding their seasonally adjusted components. The total number of dwelling units is obtained by summing the seasonally adjusted data for single-family and multiple-use units; the total value of building permits is obtained by summing the following elements: residential, industrial, commercial and institutional. Some series contain no apparent seasonality. In these cases, undadjusted values have been tabulated and aggregated to the adjusted values of the other series.

At the end of the year, the chronological series adjusted for seasonality are revised to take into account the most recent seasonal fluctuations. These revisions apply only to the last three years in the series. The revised data are introduced into the CANSIM databank and was for the first time incorporated into the 1989 annual publication on building permits (64-203), which was available at the beginning of 1990.

Index of Building Construction

Building permits represent one of the first steps of the construction process. They express investment intentions of various economic agents and therefore lead any labour and material expenditures. However, due to the existence of seasonality and extreme building permit values, it is difficult to infer from raw data any real changes in the behaviour of economic agents. In table 8, deflated and adjusted data for seasonality already enable a better interpretation of construction activity because they reflect the real level of intentions. Price indexes used to deflate building permit values are the residential and non-residential construction input price indexes. These composite price indexes are derived from union wage rate indexes and construction material indexes, which are available from the CANSIM databank, matrices 400 and 423. In table 9, a filter is applied to the seasonally adjusted permit values in order to eliminate irregular movements. This allows us to identify major movement in the series.

Availability of Data

This publication contains only part of the data produced on building permits. However, you may order unpublished tables³ or address special requests, now available on diskette, to the **Current Investment Indicators Section ((613) 951-9689, call collect)**. The majority of the series presented here is also available on CANSIM in matrices 80 (levels 3-7, 16-32), 129, 137, 443, 987, 991, 992 and 4073.

))))))))

³ A list of these tables is available from Statistics Canada Head Office or from the regional offices.

Désaisonnalisation

Les données désaisonnalisées portant sur le total des unités et la valeur agrégée des permis de bâtir sont obtenues indirectement, c'est-à-dire par l'addition de leurs composantes désaisonnalisées. On obtient les unités totales de logement par l'agrégation des données désaisonnalisées de type unifamilial et multiple; la valeur totale des permis résulte pour sa part de la somme des éléments suivants: résidentiel, industriel, commercial et institutionnel. Certaines séries ne présentent aucune saisonnalité apparente. Ainsi, les valeurs non-désaisonnalisées des ces séries ont été utilisées et agrégées aux valeurs désaisonnalisées des autres séries.

À la fin de l'année, les séries chronologiques désaisonnalisées sont révisées afin de tenir compte des plus récentes fluctuations saisonnières. Seules les trois années de fin de série sont affectées par ce processus de révision. Les données révisées sont introduites à la banque de données CANSIM, elles ont été incorporées pour la première fois à la publication annuelle de 1989 sur les permis de bâtir (64-203) laquelle était disponible au début de 1990.

Indice de la construction

Les permis de bâtir représentent une des premières étapes du processus de construction. Ils expriment les intentions d'investissement des différents agents économiques et par conséquent devancent les dépenses en main d'œuvre et en matériaux. Cependant, dû à la présence de la saisonnalité et des valeurs extrêmes à l'intérieur des séries, les données brutes ne permettent pas de distinguer tout changement d'attitude des agents économiques. Au tableau 8, les données désaisonnalisées et dégonflées de l'effet de prix permettent déjà une meilleure interprétation de la valeur des permis puisqu'elles reflètent le niveau réel des intentions. Les indices de prix employés pour le dégonflement de la valeur des permis de construire sont les indices de prix des entrées dans la construction résidentielle ou non résidentielle. Ces indices synthétiques sont calculés à partir des indices des salaires syndicaux et des matériaux de construction obtenus de la banque de données CANSIM, matrices 400 et 423. Au tableau 9, un filtre est appliqué aux permis de bâtir afin d'éliminer les valeurs extrêmes. Ce procédé permet d'identifier les mouvements fondamentaux des séries. En lissant le mouvement de la série, celle-ci devient donc un indicateur de tendance beaucoup plus fiable de l'activité économique.

Disponibilité des données

La présente publication ne renferme qu'une partie des données produites sur les permis de bâtir. On peut cependant en s'adressant à la section des **Indicateurs courants de l'investissement ((613) 951-9689, frais virés)** commander soit des tableaux non-publiés³ ou soumettre des requêtes spéciales. Ces dernières sont maintenant disponibles sur disquette. La plupart des séries présentées ici sont aussi disponibles sur CANSIM dans les matrices 80 (niveaux 3 à 7 et 16 à 32), 129, 137, 443, 987, 991, 992 et 4073.

Bandes de microdonnées connexes à grande diffusion

Il existe une bande de microdonnées à grande diffusion assurant le couplage des données de l'Enquête sur les frais de logement de 1987 et des données sur le revenu des ménages et sur l'équipement ménager. Le prix demandé pour chaque exemplaire de la bande et la documentation connexe est de \$1,000. On peut se procurer cette bande auprès de la Section des enquêtes sur le revenu et le logement, Division des enquêtes-ménages, Statistique Canada, K1A 0T6, (613)951-9775 ou 951-9778.

On peut également se procurer des bandes portant sur l'Enquête sur les dépenses des familles auprès de la Section des enquêtes sur les dépenses des familles.

Totalisations spéciales

Il est également possible de produire, sur la base de recouvrement des coûts, des totalisations spéciales établies conformément à vos spécifications. Veuillez adresser vos demandes de renseignements à cet égard à la Section des Indicateurs courants de l'investissement.

Vous pourrez obtenir de plus amples renseignements sur ces produits et sur d'autres aspects des enquêtes auprès de la Section des Indicateurs courants de l'investissement, Division de l'investissement et du stock de capital, Statistique Canada, K1A 0T6, (613)951-9689.

General Information

Confidential when completed.

The collection of this information is authorized by the Statistics Act, Revised Statutes of Canada. 1985. Chapter S19.

To avoid duplication of enquiry and to provide consistent statistics, this survey is being conducted under cooperative agreements, made in accordance with the Statistics Act, Revised Statutes of Canada, 1985, Chapter S19 under Section 11 for the exchange of information with: the Manitoba Bureau of Statistics, the Saskatchewan Bureau of Statistics and the British Columbia Central Statistics Bureau for respondents in each of the respective provinces; and under Section 12 for joint collection and sharing information with: the Northwest Territories Bureau of Statistics and the Canada Mortgage and Housing Corporation.

Agreements coming under Section 12 of the Canada Statistics Act shall not apply to any respondent who give notice in writing to the Chief Statistician that he/she objects to the sharing of the information.

Results of this survey will enable Statistics Canada (STC) to estimate residential and non-residential construction activity at various geographical level. The latter are published monthly in Catalogue 64-001 and annually in Building Permits – Annual Summary, Catalogue 64-203.

PLEASE REFER TO THE SURVEY REPORTING GUIDE AND SELF CODING GUIDE WHEN COMPLETING YOUR REPORT. Additional copies of these guides are available from our STC regional representative.

Coverage Profile Update

Is the geographical coverage of this monthly report different from that of your last report due to a change in boundaries, level of administration, etc.

1 Yes
Oui

Renseignements généraux

Confidentiel une fois rempli.

La collecte de cette information est autorisée par la Loi sur la statistique, Lois révisées du Canada, 1985, chapitre S19.

Afin d'éviter tout chevauchement des enquêtes et de fournir des statistiques uniformes, Statistique Canada mène cette enquête aux termes d'accords conjoints conclus en vertu de l'article 11 de la Loi sur la statistique, Lois révisées du Canada, 1985, chapitre S19 pour l'échange de renseignements avec: le «Manitoba Bureau of Statistics», le «Saskatchewan Bureau of Statistics» et le «British Columbia Central Statistics Bureau» pour les répondants de ces différentes provinces; et en vertu de l'article 12 pour le rassemblement conjoint et l'échange de renseignements avec: le «Northwest Territories Bureau of Statistics» et la Société canadienne d'hypothèques et du logement.

Les accords aux termes de l'article 12 de la Loi sur la statistique ne s'appliquent pas aux répondants qui s'opposent à l'échange de renseignements dans une lettre jointe au questionnaire dûment rempli et adressé au statisticien en chef du Canada.

Les résultats de cette enquête permettront à Statistique Canada (SC) d'estimer l'activité de la construction résidentielle et non résidentielle à différents niveaux géographiques. Ces derniers sont publiés mensuellement dans Permis de bâtir, n° 64-001 au catalogue et annuellement dans Permis de bâtir – Sommaire annuel, n° 64-203 au catalogue.

VEUILLEZ CONSULTER LE GUIDE DE DÉCLARATION DE L'ENQUÊTE ET LE GUIDE POUR AUTOCODAGE POUR COMPLÉTER VOTRE RAPPORT. Des copies supplémentaires sont disponibles auprès du représentant régional de SC.

Mise à jour du profil de couverture

Confidentiality
Confidentialité

Statistics Canada is prohibited by law from publishing any statistics which would divulge information obtained from this survey that relates to any identifiable business, without the previous written consent of that business. The data reported will be treated in strict confidence, used for statistical purposes and published in aggregate form only. The confidentiality provisions of the Statistics Act are not affected by either the Access to Information Act or any other legislation.

La loi interdit à Statistique Canada de publier des statistiques recueillies au cours de cette enquête qui permettraient d'identifier une entreprise sans que celle-ci en ait donné l'autorisation par écrit au préalable. Les données déclarées resteront confidentielles, serviront exclusivement à des fins statistiques et seront publiées uniquement sous forme agrégée. Les dispositions de la Loi sur la statistique qui traitent de la confidentialité ne sont modifiées d'aucune façon par la Loi sur l'accès à l'information ou toute autre loi.

Mailing Instructions
Directives de renvoi

Please complete and return this form no later than 10 days after the end of the reporting period. Using the envelopes provided, send one copy to the nearest Statistics Canada Regional Office and one to the local office of the Canada Mortgage and Housing Corporation.

Veuillez compléter et retourner ce formulaire au plus tard 10 jours après la fin de la période visée. On vous demande de faire parvenir dans les enveloppes fournies, une copie au bureau régional de Statistique Canada et une au bureau local de la Société canadienne d'hypothèques et de logement.
