#### Note of appreciation

*Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.*

## Symbol

The following standard symbols are used in this Statistics Canada publication:

. not available for any reference period  
.. not available for a specific reference period  
... not applicable  
0 true zero or a value rounded to zero  
0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded  
p preliminary  
r revised  
x suppressed to meet the confidentiality requirements of the Statistics Act  
E use with caution  
F too unreliable to be published

## Notes

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.
- This publication was prepared by:

John Côté, David Filipic, Barry Mersereau, Carole Parent, Stavros Iliadis, Robert Théberge,  
Catherine Boies, and Art Ridgeway.

## The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in *System of National Accounts, 1993*, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

## ABOUT THE FIGURES

The series on international security transactions cover portfolio transactions in stocks, bonds and Canadian money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;
- foreign money market securities because their measurement is largely through foreign banking data whose level of detail precludes a separate specification.

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks and bonds is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue nos. 67-506-XPE or 67-506-XIE).

## Canada's international transactions in securities

November 2004

Purchases of Canadian securities increased considerably in November as investment in Canadian bonds rose to its highest level since March 2003.

In total, foreign investors bought \$7.2 billion in Canadian securities, the second highest amount thus far for 2004. Bonds accounted for \$6.3 billion while purchases of stocks amounted to \$1.2 billion. Foreign investors divested \$304 million of money market paper.

For their part, Canadian investors markedly increased their holdings of foreign securities by \$4.2 billion in November — their highest investment in two years.

### Investment in Canadian bonds soars

Foreign investment in Canadian bonds soared to \$6.3 billion in November from \$661 million the month before. Purchases of corporate bonds accounted for almost two-thirds of the total as the sector witnessed a surge in new issues in the amount of \$5.0 billion, the highest level of corporate new issues since June 2003.

Most of the corporate new issues were offered in the US market including the largest private placement ever by a Canadian company in the US high yield bond market. Partially offsetting this were \$3.0 billion of retirements in Federal Government bonds, mostly denominated in US and other foreign currencies.

Overall on a currency basis, the majority of foreign investment was in Canadian dollar denominated bonds (\$4.2 billion) and US dollar bonds (\$3.3 billion), while the holdings of bonds in other foreign currencies declined by \$1.2 billion.

### Chart 1

#### Foreign investment in Canadian securities<sup>1</sup>

<sup>1</sup>. Includes bonds, stocks and money market paper.

**Chart 2****Canadian investment in foreign securities<sup>1</sup>***Reverse of balance of payments signs*

*1. Includes bonds, and stocks.*

After two months of investing in Canadian money market paper, foreign investors offloaded \$304 million worth in November. All of the divestment occurred in corporate paper (\$596 million) as foreign investors continued to purchase paper issued by federal enterprises. European investors were responsible for most of the sell-off.

**Foreign investors increase their holdings of Canadian equity**

After purchasing \$589 million worth of Canadian stocks in October, non-resident investors augmented their holdings by a further \$1.2 billion in November. Most of the activity occurred in the secondary market as foreign investors purchased \$965 million worth. Canadian stock prices (S&P/TSX Composite Index) rose for the third consecutive month in November ending the month above the 9,000 level for the first time since January 2001.

**Holdings of foreign securities rise**

Canadian demand for foreign securities strengthened to \$4.2 billion in November, the highest total to date for 2004. The majority of the investment took place in foreign bonds as Canadian investors bought \$3.8 billion worth, their biggest investment in foreign bonds in almost three years. Purchases were split evenly between US treasury and corporate bonds while investment in overseas bonds was again a lower amount.

Meanwhile, Canadian investors purchased \$393 million in foreign equities in November, down from \$1.3 billion in October. Fully two-thirds of the total was in purchases of overseas stocks.

**Related market information****Interest Rates**

*In November, US short-term interest rates increased 31 basis points to 2.07% while Canadian rates increased modestly to 2.63%. Still favouring investment in Canada, the resulting differential between the two countries fell to 0.56%, its lowest level since March 2002.*

*Meanwhile, the long-term interest rate differential between Canada and the US fell to 0.24% as Canadian rates fell 8 basis points to 4.44% and US rates increased 9 basis points to 4.20%.*

**Stock Prices**

*Canadian stock prices increased 1.8% in November with the S&P/TSX Composite index ending the month at 9,030.1. US stock prices also increased with the Standard and Poor's Composite Index finishing 3.9% higher at 1,173.8.*

**The Canadian dollar**

The Canadian dollar rose 2.22 US cents by the end of November ending the month at 84.32 US cents; its highest level since January 1992.

**Definitions**

*The data series on international security transactions cover portfolio transactions in stocks and bonds (both Canadian and foreign issues) and Canadian money market instruments.*

**Stocks** include common and preferred equities, as well as warrants.

**Debt securities** include bonds and money market instruments.

**Bonds** have an original term to maturity of more than one year.

**Money market instruments** have an original term to maturity of one year or less. **Government of Canada paper** includes treasury bills and US-dollar Canada bills. **Other money market instruments** include treasury bills and other paper issued by other Canadian governments or their enterprises, bankers' acceptances, bearer demand notes of banks, commercial paper and other short-term paper.

## Balance of Payments Division List of Publications

### **Canada's Balance of International Payments**

(the First quarter 1997 issue provides comprehensive historical coverage from 1926 to 1996) - presents Canada's economic transactions with non-residents under two main accounts: the current account which covers goods, services, investment income and current transfers; and the capital and finance account which covers capital transfers as well as both borrowings from and investments in foreign countries. The transactions are presented quarterly and annually with six broad geographical areas.

**67-001-XPB**  
**67-001-XIB**

### **Canada's International Transactions in Securities**

presents Canada's portfolio transactions in Canadian and foreign bonds and stocks and in Canadian money market securities with non-residents. New issues, retirements and trade in outstanding securities are covered as well as repurchase agreements. Monthly gross and net transactions are presented geographically according to six broad geographical areas.

**67-002-XIE**  
**67-002-XIF**

### **Canada's International Investment Position**

(the 1996 issue provides comprehensive historical data from 1926 to 1996) - presents Canada's asset position with and liability position to non-residents, including a detailed breakdown by claims (direct investment by country, portfolio, etc.) and by six broad geographical areas. The data include the foreign holding of Canada's public debt.

**67-202-XIE**  
**67-202-XIF**

### **Canada's International Trade in Services**

presents Canada's annual service transactions with non-residents. Travel, transportation, commercial services and government services which are presented by three broad geographical areas: United States, European Union and other countries. Commercial services are further categorized by industry; country of control (Canada, United States, Other); whether the service is with foreign affiliated companies or non-affiliates; and with a detailed country breakdown for commercial services.

**67-203-XIB**
