Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbol

The following standard symbols are used in this Statistics Canada publication:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- ^E use with caution
- F too unreliable to be published

Notes

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.
- This publication was prepared by:

John Côté, David Filipic, Barry Mersereau, Carole Parent, Stavros Iliadis, Robert Théberge, Catherine Boies, and Art Ridgeway.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in *System of National Accounts, 1993*, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

ABOUT THE FIGURES

The series on international security transactions cover portfolio transactions in stocks, bonds and Canadian money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;
- foreign money market securities because their measurement is largely through foreign banking data whose level of detail precludes a separate specification.

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks and bonds is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the publication *Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products* (Catalogue nos. 67-506-XPE or 67-506-XIE).

Canada's international transactions in securities

December 2004

Foreign investors continued to increase their holdings of Canadian securities in December acquiring \$3.9 billion worth. Canadian equities led the way as foreign investors sold off some of their holdings of Canadian debt instruments.

For 2004, foreign investors purchased \$53.2 billion worth of Canadian securities which marked the largest annual investment ever by foreign investors. This was due in large part to a record foreign investment in Canadian stocks for the year.

Meanwhile, Canadian investors offloaded \$482 million in foreign securities in December. They continued purchasing bonds but made a substantial divestment in foreign stocks.

Investment in Canadian stocks ends the year on a high note

With Canadian stock prices ending the year on a positive note (up 2.4% over the month and 12.5% for 2004), foreign investors purchased an additional \$4.6 billion in December (up from \$1.7 billion the month before). Investment for the month was entirely in outstanding issues, making December's investment in that segment the largest since March of 2000. Trading volume in Canadian stocks with foreign investors was up as well, climbing to a record turnover of \$59 billion. American investors did the bulk of the buying in December, as they did throughout 2004.

A number of large deals throughout 2004 led to a record level of money being raised on equity markets in Canada attracting foreign investors. The year also witnessed the largest Canadian takeover of a foreign company in history, where new treasury shares were issued by the Canadian company. As a result of these factors, foreign investors increased their holdings of Canadian stocks by \$35.8 billion over 2004, the highest level of foreign investment in Canadian equities ever.

Foreign investors reduce their holdings of Canadian debt

For only the second time in 2004, foreign investors shed some of their holdings of Canadian bonds. December's divestment of \$321 million was almost entirely concentrated in Government of Canada bonds as non-resident investors sold off \$4.4 billion worth. Largely offsetting this however were \$4.0 billion in purchases of federal government enterprise issues, including \$2.6 billion in net new issues (new issues less retirements), the largest amount in that sector since June 2002.

For the year as a whole, foreign investors picked up \$20.2 billion in Canadian bonds; a substantial increase over the \$7.0 billion purchased in 2003 but just half the high of 2001. Virtually all of the buying in 2004 came from US investors. On a currency basis, the year's investment was roughly split between Canadian and US dollar denominated issues as non-resident investors sold some of their holdings of Canadian bonds denominated in other foreign currencies.

Foreign holdings of Canadian money market paper fell a further \$421 million in December after \$256 million worth was sold off in November. December's reduction was across all sectors except federal government t-bills which saw its largest increase in investment for the year.

Throughout 2004, foreign investors regularly sold their holdings of money market paper culminating in an overall reduction of \$2.7 billion for the year. Every sector, other than federal government enterprises, experienced a decline.

While Canadian short-term rates remained relatively stable throughout the year, US rates increased markedly from their historic low in January of 2004. The resulting differential between the two countries, while still favoring investment in Canada, fell to 0.28% in December, its lowest level in three years.

Related market information

Interest Rates

Canadian short-term interest rates decreased 16 basis points to 2.47% while US rates increased 12 basis points to 2.19% resulting in a differential of 0.28%. While still favouring investment in Canada, the differential between the two countries fell 139 basis points in 2004.

Long-term interest rates also followed a similar pattern as Canadian rates fell 5 basis points to 4.39% while US rates increased 13 basis points to 4.33%. Still favouring investment in Canada, the resulting differential fell to 0.06%, its lowest level since November 2000.

Stock Prices

Canadian stock prices increased by 2.4% in December as the S&P/TSX Composite index ended the month at 9,246.7. US stock prices also rose with the Standard and Poor's Composite Index finishing at 1,211.9, a gain of 3.2%. For the year as whole, Canadian and US stock prices increased by 12.5% and 9.0% respectively.

The Canadian dollar

After seven consecutive months of increases, the Canadian dollar fell 1.12 US cents in December ending the year at 83.19 US cents. The dollar gained over six US cents during 2004.

Definitions

The data series on international security transactions cover portfolio transactions in stocks and bonds (both Canadian and foreign issues) and Canadian money market instruments.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less. **Government of Canada paper** includes treasury bills and US-dollar Canada bills. **Other money market instruments** include treasury bills and other paper issued by other Canadian governments or their enterprises, bankers' acceptances, bearer demand notes of banks, commercial paper and other short-term paper.

Holdings of foreign bonds rise as those of equities fall

Bucking a trend in which Canadian investors have been fairly consistent in their purchases of foreign securities, they ended 2004 by selling \$482 million worth. The divestment occurred in foreign stocks with \$2.4 billion being sold off — a record monthly divestment of foreign stocks by Canadian investors. More than two-thirds of December's sell off occurred in overseas equities. Partially offsetting this was the purchase of \$1.9 billion in foreign bonds.

Overall for 2004, Canadian investors purchased \$16.2 billion in foreign securities. Of this, outlays of \$15.1 billion were made in foreign bonds — almost double the amount from the year before and by far the largest ever yearly investment by Canadian investors in the foreign bond market. While buying of foreign equities was at its lowest point since the mid-eighties (\$1.1 billion), there was a shift to US equities (+\$7.0 billion) as Canadian investors sold \$6.0 billion of overseas shares.

Balance of Payments Division List of Publications

Canada's Balance of International Payments

(the First quarter 1997 issue provides comprehensive historical coverage from 1926 to 1996) - presents Canada's economic transactions with non-residents under two main accounts: the current account which covers goods, services, investment income and current transfers; and the capital and finance account which covers capital transfers as well as both borrowings from and investments in foreign countries. The transactions are presented quarterly and annually with six broad geographical areas.

67-001-XPB
67-001-XIB

Canada's International Transactions in Securities

presents Canada's portfolio transactions in Canadian and foreign bonds and stocks and in Canadian money market securities with non-residents. New issues, retirements and trade in outstanding securities are covered as well as repurchase agreements. Monthly gross and net transactions are presented geographically according to six broad geographical areas.

67-002-XIE
67-002-XIF

Canada's International Investment Position

(the 1996 issue provides comprehensive historical data from 1926 to 1996) - presents Canada's asset position with and liability position to non-residents, including a detailed breakdown by claims (direct investment by country, portfolio, etc.) and by six broad geographical areas. The data include the foreign holding of Canada's public debt.

67-202-XIE
67-202-XIF

Canada's International Trade in Services

presents Canada's annual service transactions with non-residents. Travel, transportation, commercial services and government services which are presented by three broad geographical areas: United States, European Union and other countries. Commercial services are further categorized by industry; country of control (Canada, United States, Other); whether the service is with foreign affiliated companies or non-affiliates; and with a detailed country breakdown for commercial services.

67-203-XIB
