## The System of National Accounts

---

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

# Foreword

---

## About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

- Canadian acquisitions of foreign securities amounted to \$10.0 billion in May, the third highest on record. Meanwhile, non-residents stepped up their buying of Canadian securities to \$5.7 billion worth.

## Analysis - May 2006

Canadian acquisitions of foreign securities amounted to \$10.0 billion in May, the third highest on record. This was fuelled by exceptional purchases of foreign equities totalling \$5.9 billion. Meanwhile, non-residents stepped up their buying of Canadian securities to \$5.7 billion worth, an 18-month high.

**Chart 1**  
Canadian portfolio investment in foreign securities<sup>1</sup>

\$ billions

1. Reverse of balance of payments signs.

### Canadian purchases of foreign equities go through the roof

The Canadian investment of \$5.9 billion in foreign equities in May was the highest in five years. Canadian pension funds continued to be active investors in foreign equities, especially since January 2006. A significant factor contributing to the heavy investment trend was the deregulation of Canadian pension funds and retirement savings plans that saw the removal of limits to their holdings of foreign securities.

Overseas shares were the investment of choice in May as they were in April. Two-thirds of the investment went to equities issued by foreign firms resident outside the United States with the remaining third to US shares. This is a switch from the 11 preceding months when US shares were preferred by Canadian investors.

### Related market information

In May, Canadian short-term **interest rates** increased 15 basis points to 4.18% while US short-term rates increased 12 basis points to 4.72%. Still favouring investments in the United States, the differential between the two countries has kept narrowing since the beginning of 2006, from 0.77% in January to 0.54% in May.

Canadian long term rates declined 7 basis points to 4.45% while US long-term rates remained unchanged at 5.12%, widening the differential further to 0.67%. Canadian long-term rates have been falling behind US long-term rates since March 2005.

In May, Canadian **stock prices** fell 3.8% with the S&P/TSX Composite index closing the month at 11,744.5. Meanwhile, US stock prices dropped a similar rate of 3.1%. The Standard and Poor's Composite Index ended the month at 1,270.1, the first decline in the Index so far in 2006.

The **Canadian dollar** continued its appreciation against the US dollar in May and broke the 90 cent mark. The Canadian dollar rose another 1.34 US cents ending the month at 90.8 US cents, the highest since December 1977.

### Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

**Stocks** include common and preferred equities, as well as warrants.

**Debt securities** include bonds and money market instruments.

**Bonds** have an original term to mature of more than one year.

**Money market instruments** have an original term to maturity of one year or less.

### Heavy investment in the foreign debt sector continues

Canadians invested heavily in foreign bonds, acquiring \$4.3 billion worth in May. Canadian purchases of these instruments have been strong since September 2004.

Purchases of foreign bonds were concentrated in the US corporate sector, totalling \$4.3 billion. Meanwhile, a \$1.7 billion net purchase of overseas bonds was offset by a similar net sell-off of US government bonds.

A significant portion of foreign new issues purchased in May was in "Maple bonds". Denominated in Canadian dollars, "Maple bonds" attract Canadian investors by removing exchange rate risks while maintaining competitive yields. This is attractive to Canadian investors in the context of an appreciating Canadian currency.

Canadian investment in short-term foreign paper saw acquisitions of US government paper and the sell-off of other overseas paper both reduced from the previous month. This resulted in an overall divestment of \$229 million in May, similar to the amount for the previous month.

### Non-residents return to Canadian debt market

Foreign investors added \$1.8 billion worth of Canadian bonds to their portfolio in May, after divesting \$2.2 billion the month before.

May's increase in holdings was driven by a \$2.4 billion net purchase of outstanding Canadian bonds by non-residents. These purchases were concentrated in the federal government sector. With retirements virtually unchanged, new issues of Canadian bonds increased moderately by \$410 million, resulting in decreased net retirements from the previous month. A large proportion of these net retirements were in the corporate sector.

Geographically, the United States was by far the largest investor among all regions. US investors acquired \$1.9 billion worth of Canadian bonds while those from other countries divested \$166 million worth. On a currency basis, the net purchases of Canadian bonds were entirely Canadian-dollar denominated.

Meanwhile, non-residents reversed a \$419 million divestment in April and acquired a net \$439 million of Canadian money market paper in May. A net acquisition of \$958 million in paper issued by federal enterprises more than offset the sell-off of money market paper issued by other sectors. Geographically, British investors led all regions with a net acquisition of \$764 million worth.

### US residents favour Canadian equities

Non-residents purchased \$3.5 billion worth of Canadian equities in May, continuing a trend of heavy investment in Canadian shares since January 2006.

US residents showed no sign of slowdown in acquiring Canadian equities as they purchased \$4.2 billion in May, the highest since March 2005. Acquisitions of outstanding Canadian shares totalled \$2.8 billion in May, after the record purchases of \$6.3 billion in April. Meanwhile, net new issues of Canadian stocks were active over the month hitting a 14-month high. About half of net new issues of \$723 million were due to takeovers of foreign companies.
